AN INDEX OF THE REPORTS APPEAR-
ING IN THIS VOLUME WILL BE FOUND AT
THE END OF THE BOOK.

INAUGURAL ADDRESS OF MAYOR THOMAS J. McGRATH,
COUNCIL CHAMBER, CITY HALL, MONDAY,
JANUARY 2, 1928

Gentlemen of the Council:

Following the custom of years, I submit to the Council for 1928 a short resume of the work accomplished during 1927 and a prospectus of work which may be attempted during this year. As the Council will readily perceive, an extraordinary amount of work has been accomplished the past year and our hope may be that in the year just opening we may be able to make as satisfactory a showing as during the year just closed. A great deal of this accomplishment was achieved in the face of handicaps of various kinds, the chief of which was the unsettled weather conditions during the months in which we hoped to achieve the greatest results. By intensive planning and the active and earnest co-operation of all the department heads, it has been possible to overcome these handicaps and to finish the year in a very satisfactory manner. One aim particularly has been borne in mind in all that which has been undertaken this year and that was to close everything before weather conditions made it impossible to do further outside work. Happily, all work that was started has been completed. In consequence, we will not suffer any loss in material or labor which frequently results where streets half completed are carried over from one season to another.

The Work of the Year

Before outlining the plans for new work it may be of interest to give a sketchy account of what has been accomplished in 1927.

Streets

Under a Council appropriation of \$250,000, supplemented by a budget appropriation of \$31,000, the City in July began its program of street construction embracing 58 new streets. As this was an extraordinarily large program and as some of the streets were not accepted until late in the year, it was utterly impossible to complete the whole program. As a result there are 13 streets remaining for the program of 1928. All the other streets have been completed with gravel or stone sidewalks and sewers and drains. The policy this year has been to put sewers and drains in every new street and as a result our sewer and drain appropriation has been much larger than usual. The results obtained by this policy more than offset the extraordinary expense and we all have the confident feeling that when the street is done it will not be necessary to tear it up for sewers or drains.

A little later it will be possible to present an analysis of all the street and other work done this year. This is not possible at the present moment and consequently all that can be done is to give a summary of accomplishments. Of all street work, and this includes rebuilding as well as new work, a total of 11.36 miles of work has been done. The Council is perhaps familiar with the

immense amount of rebuilding work which has been carried on this year, a work which touched every section of the City. If possible this work of rebuilding should be continued so that at the end of a few years every street in the City will be in excellent condition. Once we have arrived at the point where all accepted streets are in condition, the resources of the City can be allotted for the purpose of creating new streets in the rapidly developing sections of the City.

Under a late order of the Council appropriating \$125,000 to complete the street program of 1927, thirteen streets are embraced in the schedule for 1928. Some of these streets are extremely difficult problems to handle but the administration feels that while the work will cost more than ordinary road building, the ultimate charge will not be altogether unsatisfactory. The street acceptance program for this year will be necessarily limited by the enormous demands for other work. If, however, a little later in the year it should be found possible to allot more money for new streets I am quite sure the Council will agree to extend this program to embrace all such streets as may be possible to do within whatever appropriation may be made. There are, of course, a number of sections that will demand the constant attention of the City Government and I hope that it may be possible this year to do a little more work in the growing sections of Wollaston and Montclair. These localities are bringing many new people here, and the City should, as soon as possible, do its utmost to give these localities the same consideration that has been given to older parts of the City. In mentioning these two wards I do not want to overlook the necessity of more street work in other wards of the City, particularly in Ward One where the territory to the east of Mount Wollaston Cemetery has only been touched by new street development. In laying out a street program, it should be our united effort to give these more populous and developing places our earliest consideration. I realize that this is the policy in the minds of the members of the City Council and consequently I feel that if we can allot more money for new streets this year that these sections will receive a generous portion.

Sidewalks

During the year it has been a pleasure to carry into effect Council orders for sidewalks totalling over seven miles in length. This pleasure has been enhanced by the further fact that every dollar spent for sidewalks, as was the money spent on the rebuilding of streets, has come directly from the budget of the year. I hope that in 1928 we may be able to be equally generous in the matter of sidewalks and that our total mileage this year will equal that of the year just closed. Streets are essential but not more so than sidewalks. The street that is well drained and well kept and offers the further advantage of good substantial sidewalks, adds not only to the wealth of the individual owner but likewise to the wealth of the City.

Drainage

As the City develops, one problem grows in intensity. This problem is drainage and at the outset of the year I was convinced of the necessity of extending our drainage system as far as possible.

With this thought in mind I also had a further thought that this work, although it is of supreme importance, should be financed out of budget funds. An appropriation totalling \$50,000 was asked for and granted by the City Council for drainage work outside of the drainage done on new streets. The first big proposal was the proper drainage of the enormous basin around Wilson avenue in Montclair, a work which cost approximately \$26,000. This work has been completed and as a result considerable territory heretofore inundated after every storm is now thoroughly drained. In many other sections of the City this drainage work has been carried forward with the result that we have very substantially added to our drainage system. Some streets that were built years ago but which did not have a drainage system were taken care of this year. In all approximately six miles of drainage have been installed with pipes ranging in size from 10 to 36 inches. Eighty-three manholes and 313 catch basins have been included in this work.

In 1928 much attention must be paid to this matter of drains. The City could easily spend a great deal of money on work of this character, but with our resources always in sight we can undertake only that work which is of the most urgent character. The plans made in 1926 by Metcalf and Eddy have been of help in formulating new plans for this essential work and this year I hope it may be possible to undertake one or two big projects. The present drainage system in Ward Three is wholly inadequate to serve its purpose and so I have almost decided that one of our major projects this year shall be the proper drainage of this section. There are some bad spots in Ward Four and a number of poorly drained sections in Wards Five and Six. To the best of our ability in the coming year we will take care of these bigger demands.

Water and Sewer

During 1927 there were 712 water connections made. In addition to this work, new mains to the extent of $5\frac{1}{2}$ miles were also laid.

There were 525 sewer connections and a little over five miles of main sewer installed in 1927.

The City has petitioned the Legislature this year to grant authority to the Metropolitan District Commission to enable the City to drain by gravity certain parts of this sewerage system. These new projects embrace Squantum and Adams Shore and I am hopeful that the Legislature will grant the permission to erect the pumping stations that are needed in these sections. If this authority is forthcoming, it means that the city must do its part in extending its sewerage system. This means a larger outlay than formerly, but I am confident that the City Council will co-operate with me in giving sewers to two sections which greatly need them.

Schools

In my inaugural address at the beginning of 1927, I stated with perhaps more hope than truth, that our large construction program was nearly complete and that for a time we might escape any extraordinary outlays for school buildings. As the school population has demonstrated at the opening of the September term, it

was found that even with the increase in school facilities, there were yet some sections of the City that were lacking in school accommodations. During 1927 the City opened two new Junior High Schools. One was in the Atlantic section of the City and the other one is located on Granite street for the benefit of the school population in the South and West parts. Both of these schools have their full quota of children and the withdrawal of children from other schools has not appreciably lessened the number attending the other schools. The Council of 1927 authorized the fourth Junior High unit in the Quincy Point section. This building will be ready for occupancy in September of this year and with its opening the completion of the Junior system will be achieved.

By request of the City Council, the School Committee has prepared a five year school building program. The estimate for these new buildings is based on a normal 7% increase in school population, a percentage of increase which is the average of our experience for some years past. School accommodations in certain sections of the City are almost imperative, particularly so at Houghs Neck, Adams Shore, Merrymount and Montclair. These four sections have been deemed by the School Committee as deserving of first consideration at the hands of the City Government and the estimated cost of these buildings will be in the neighborhood of \$400,000. At Houghs Neck it is proposed to build a new structure since it is impossible to add to the present building. At Adams Shore it is proposed to build the first unit of what will ultimately be a Junior High school. At Merrymount it is proposed to build an elementary school of eight rooms. Except in Merrymount the City owns land which may be used for a new building. The site for the school at Merrymount has recently been acquired by order of the City Council.

This demand for new school buildings brings to the attention of the Council one of the perplexing problems confronting the City Government. It is an extraordinary demand to set aside the sum of \$400,000 for new school buildings. But considering the situation as it exists in the places selected for additional school accommodations this year it must be admitted that some of our younger children are forced to attend school under unusual and unsatisfactory conditions. We all realize that the children at Houghs Neck, to take one instance where there is serious overcrowding, have been compelled to go on part time this year and some younger children have been forced to attend a morning session beginning at an hour earlier than the usual school session. The School Committee is attempting to remedy these conditions and I hope that the Council and the School Committee may arrive at what can be deemed to be the best policy to pursue in meeting the demands for new school buildings this year. The School Committee has requested the Council to join with it in considering this matter of new buildings and I hope that out of this conference a plan that will be reasonable and possible, may be decided upon.

I only state my own feelings mildly when I say that I am somewhat disturbed over the school problem for this year. I am thoroughly convinced that there is lamentable lack of room in the four sections of the City and will do everything in my power to help along a reasonable program. On one hand we have a need for these additional rooms and on the other we have the problem of how to finance the proposals.

The Finances of the City

A survey of our financial condition at this particular point may be of interest to us all. On Jan. 1, 1928, the borrowing margin of the City will be \$314,319. Out of this we must make an appropriation of at least \$100,000 for sewer extension and possibly \$50,000 more to take care of the expense incurred in street widenings and in the bridge which I hope may be built over Squantum street in Ward Six. At the outset, therefore, we have only the sum of \$164,319 which may immediately be used for school purposes. The cost of the land and the building at Merrymount may be in the neighborhood of \$125,000. That will leave us with \$39,319 as the nucleus for whatever new building may be further authorized. This amount will be increased up to and including July 31 by the sum of \$232,000 making a total available credit on Aug. 1 of \$271,319. If the Council, in its wisdom, should feel that any of these other proposals of the School Committee should be favorably acted upon, this credit of \$271,319 would almost complete all of the program outlined by the School Committee. I am going into detail in this matter simply to demonstrate to the Council, as near as I can, just what our financial possibilities are. As the plan is here outlined it will be seen that we may, if it should be deemed necessary, provide for these new school buildings without petitioning the Legislature for permission to borrow outside the debt limit. This proposal has been advanced by some, but I am reluctant to ask the Legislature to give the City permission to do this if it can be found that the matter can be taken care of by a little planning by the City Government. Our last experience with the Legislature in a similar proposal was not satisfactory and I hope that we may not be forced to run the risk of a refusal by the General Court for extraordinary privileges in the matter of loans for purposes which are now provided for inside the debt limit.

Hospital

The demands upon the City Government are so varied that one can only give partial attention to any one particular project. I think we all realize that in passing from a consideration of the needs of the School system we must immediately give sympathetic attention to matters of almost equal importance. I am forced to bring to the attention of the City Council the needs of the hospital. At the present, despite the fact that only two years ago a splendid new building was equipped as a Maternity and Children's Ward, the work at the hospital has increased to such an extent that a new building, either for the general or for the specific use of maternity cases, is an absolute necessity. The Board of Managers and the doctors will at a later date request a conference with the City Council in an effort to provide means for meeting this demand for additional hospital room. The oldest building in use, and now given over to a Men's Ward, is deemed to be unsafe and unsatisfactory. If a new building should be allowed those that are now receiving care in the old building would have the benefit of newer, more commodious and safer quarters. The cost of a building similar in size to the Maternity Building would be from \$200,000 to \$250,000. If the Council, in its good judgment, should favorably pass upon the school building projects, the remaining credits up to the 31st of December, 1928, would in no sense permit the City to undertake a new hospital building this year. Consid-

ering the fact that the Quincy City Hospital is each year extending its beneficent work and that the demand for room is increasing even faster than the population increase, it seems quite desirable that earnest thought should be given to this matter of a new building. If, however, the Council should deem it wise to undertake this work during the present year it would be absolutely necessary that the Legislature give permission to finance some of our school projects outside the debt limit. It is my purpose, therefore, before the year's work is finally decided upon, to ask the Council for advice as to what we should assume toward these new projects. We all realize the necessity of many propositions that come to us for a settlement but our enthusiasm and good intentions must always be tempered by our complete knowledge and understanding of our financial resources. It, therefore, seems to me only prudent to summarize all our needs at the beginning of the year and from this summary select those that are more urgently needed and which are presumably within our finances.

Comfort Station

At the beginning of last year I called the attention of the Council to a matter which has been agitated for many years. In a growing community like Quincy a Comfort Station is a real necessity and we all must regret that the pressure of other matters has delayed this essential convenience. It would be a very welcome thing if the City could find the means and the location for a station for the service of our own people and of those who come into the City to trade. I regret that I can make no recommendation or give any assurance that this work can be undertaken this year, but simply rely on the hope that we might find a means somehow to carry out a plan that meets with our unqualified approval.

The Grade Crossing Situation

On this important subject I can say nothing except to state that the matter has now reached the Courts upon a petition of the New Haven Railroad. Their petition for review has been argued and the judgment of the Court has not yet been given. If the City wins in this proceeding it augurs well for the final success of our plea that the decree plan shall be carried into effect. From time to time there have been suggestions made that the decree plan of grade crossings abolition should be either discarded or modified. I believe that our better judgment is to hold to the plan now on record and not jeopardize the whole project by changes of any kind. The decree plan is as satisfactory as any method for the betterment of conditions at these crossings and so I hope that the final judgment of the Courts will be in our favor.

Chestnut and Other Streets

Probably no matter of the past year has given rise to more controversy and has been the subject of more review than has the contemplated building line and widening of Chestnut street. After these hearings were closed and the Council took the matter under consideration, a building line ten feet distant from the present street line was established. Unfortunately, through an error in the order passed by the City Council, the taking was found to be void

and the Council rescinded its building line ordinance. I think it is the general understanding that since the Council has given its assent to this proposition that the processes of new legislation toward the same end will not be delayed in the early part of 1928. With the establishment of the building line on Chestnut street the City Council is face to face with two other problems in streets directly connected with Chestnut street. The widening of Foster street and Cottage avenue has been agitated for many years and it seems almost necessary to do something toward widening these streets. They are situated right in the heart of the City and would, if widened, add considerably to the area that might be used for business purposes. It seems hardly conceivable that the Council would give its consent to the widening of Chestnut street if it did not contemplate the widening of these two other highways. I hope, therefore, that these matters may be taken up early in the year so that it may be definitely known just what it is intended to do with these problems.

Perhaps no body of citizens is more conversant with the needs of the City than is the City Council. All matters of public importance reach the Council in some form at some time. At times proponents of particular legislation grow impatient over the delays or rejections by the City Government and do not always stop to consider the reasons why these matters are not favorably received. One reason, and this is perhaps the most important reason of all, is that the City Government is forced, through sheer necessity, to shape its legislation by an understanding of the City's financial means. I feel that we are all enthusiastic over these projects which have for their object the advancement of the City. The widening of Chestnut and Foster streets and Cottage avenue are cases in point. Another instance of a project of considerable merit is a street from Granite street to School street through the so-called Edwards Meadows. For many years during my service in the Council I had a feeling that this was an almost impossible project and that it did not in any sense merit serious consideration from the City Government. More intimate knowledge of conditions in the City has convinced me that a street of this character would be an inestimable benefit to the City. The owner of one large tract of land in this area has offered to the City a roadway 60 feet in width through his property without charge, with the stipulation that if the City should accept his offer that he should be exempt from betterments if this new street should be built. I am bringing the matter to the attention of the City Council simply for the reason that the congested conditions of Hancock street makes necessary a parallel street and this location from Granite street to School street offers a splendid street to bring into development a great deal of land adjacent to the business centre of the City. The matter is of sufficient importance for at least a study on the part of the City Council and I hope that the project may receive this during the course of the present year.

Traffic Committee

Early in the present year, a body composed of 35 of our citizens was asked to assist in the solving of the traffic problem in this City. This body of earnest men has met regularly and has done a great deal to bring about better traffic conditions in all sections of the City. Some of their more important suggestions have been incorporated into the regulations of the City and in other cases

their suggestions have been advantageously adopted by the Police Department. The Committee has worked untiringly to help a situation that was hurting the best interests of the people of Quincy. It has given time and thought to the consideration of matters that are extremely perplexing, but I am happy to state, that as a result of its enthusiastic and disinterested service, a great deal has been accomplished in the proper regulation and control of traffic in this City. In this work the Committee has had the support of the Chief of Police and of the men of his department, and I am certainly grateful to them for their work during this year. I hope that they may continue to serve their City during 1928 since I feel that there is yet much work to be done. Owing to the magnitude of the problem it was not possible to touch all parts of the City, but during this year I feel that this Committee can apply the same thought and study to other sections of the City as they have given to the tremendously important question of the traffic situation as it exists in Quincy Square.

In treating our traffic and its regulations it should not be overlooked that a distinct advance has been accomplished here during the past year. Early in the year the Council received the benefit of a demonstration of the efficiency of traffic control signals. As a result of this, permission was given to the Mayor to install signal lights along Hancock street from Barry's corner to Temple street. These signals have given such satisfaction that later the Council was asked for an additional appropriation to extend the signals from Quincy Square to Doble's corner and at certain points along the Southern Artery from Hancock street to Quincy avenue. In addition to these, one or two independent signals have been located at bad traffic points. These latter lights have not yet been installed but I expect that they will be within a short time and then the City will have an excellent traffic control system along some of its principal highways.. I hope it may be possible to further extend this system the coming year, particularly along Washington street, and at such other points as we may find it necessary. Once these signals are in operation and pedestrians and drivers understand their workings, and observe the rules, I believe we will have fewer accidents and much more freedom upon our City streets.

The Budget

I am pleased to report that the departmental budgets adopted in March, 1927, have been very closely maintained during the year. At the outset I was hoping that we might achieve our purpose as to the running expenses of the year so that there would be no necessity of additional budgets. Fortunately, we have been able to get through the year with but extremely few and unimportant supplementary grants. Consequently I have high hopes that in 1928 the efficiency of the budget method will be still further increased so that there will be no possibility of adding to the original amounts except for unforeseen extraordinary contingencies.

As we budget for current needs so I hope we may also budget for those exceptional matters that must be taken care of through loans. It is extremely advisable for the members of the Council and the Mayor to know early in the year just what is contemplated to be done, and after we have made our program, to adhere to it. Of course some allowance will have to be made because of the fact that our resources are not completely in hand in the early part of

the year and consequently some of the needs that are contemplated must wait until credits are available. If, however, the planning is done the fulfilment of the schedule can be based on the money available at a certain time. We did this exceedingly well last year and I am asking for the co-operation of the Council in carrying out a similar program this year.

The Southern Artery

During the year the Southern Artery has been completed and the first installment of the City's payment totalling \$113,600 has been paid. I assume that another assessment will be made on the City during the coming year, and as was the custom in financing the first assessment, a new bond issue will probably be necessary. Under date of December 20, 1927, Mr. William F. Williams, Commissioner of Public Works, informs the City that the work on the Southern Artery has been completed and that under the terms of the Act this street now becomes a public way of the City. I regret that I have not the final figures of the engineer in charge as to the total cost of this work, but will, as soon as they are received, send them to the City Council. The Council has granted permission to the Quincy Electric Light and Power Company to lay conduits and wires in the Southern Artery, and early in the New Year orders will be given for the lighting of this highway. By this letter of the Commission, a new highway reaching from Hancock street to Quincy avenue is thereby placed under the control of the City of Quincy with all the attendant expenses of lighting, policing and maintenance.

Police Department

The Police Department remains practically as organized at the beginning of 1927. Increasing demands are made upon this department for services, particularly to school children. But I hope that with the elimination of officers heretofore necessary at traffic points, that the men formerly on this important work may be available for other duties. With the present number of men and the cost of maintaining the department I do not think it advisable to add to this cost unless conditions make such additions necessary. Traffic work has heretofore taken many of the men and as a consequence the department has been pressed to the limit in order to satisfy the increasing demands for service in different sections. But I trust that with the co-operation of the Chief of the Department and its members that we may take care of these demands without the necessity of adding to the personnel. During the year a very pleasing change has been made in the management of the department through the designation of the Captain for night duty. In a city the size of Quincy and with night conditions as they are in all cities there should be some one on duty who will be able to respond to any emergency which might arise. This has been taken care of by the change recently made.

Fire Department

Quincy has been fortunate in that it has not been menaced by any extraordinary fires. Our prayer is that this condition will long persist. I believe, however, that when things are tranquil and we are going along in an even and uneventful way, we should make

some preparation for contingencies that may arise. The Department at the present time is controlled by one permanent chief and three district engineers serving on a part-time basis. Such an arrangement cannot go on indefinitely and I hope that before the year is out that steps may be taken to give the department a permanent Assistant Chief for night service. Experience shows conclusively that the fire menace is always greatest during the night and consequently the control of the department during these hours should be in strong and capable hands. The present arrangement is thoroughly unsatisfactory. To remedy it may provoke some controversy, but I believe that the best interests of the City demand that some of the present personnel be trained for executive work in this extremely important public service. Millions of dollars in property and many lives depend for their safety upon a well drilled and efficient fire department. I have no criticism to make of the efficiency of the present department. I simply feel that a department with such responsibility should be under the control at night of an officer thoroughly trained in his work and capable of handling any problem that may arise out of a conflagration. This matter will be brought to the Council in concrete form very early in the year, and means found to give the department the services of an Assistant Chief.

Increase in Indebtedness

I regret that the total indebtedness of the year exceeds the total at the beginning of 1927 by \$102,000, but the increase is due wholly to the assessment for the Southern Artery. The aim the past year was to keep the total amount of debt at the Jan. 1, 1927, figure, but this extra item for the new highway upset these plans. Of the other debt created, every dollar has been expended in extending our sewer and water systems, and for new streets, and the new school in Ward Two. The total debt on Jan. 1, 1928, is \$5,180,000. During 1928 the City will amortize \$442,500 of debt.

As we look ahead for 1928 we may think of the demands of the year and as to how these demands will affect the total debt a year hence. To begin with we have our appropriation for new streets which amounts to \$125,000. In addition to this item the other accounts may be summarized as follows:

Sewer construction	\$80,000 or	\$100,000
New bridge and widening of West Squantum street.....		50,000
School buildings		300,000
Hospital addition		200,000
Item of new streets stated above		125,000
		<hr/>
		\$755,000
Debt maturing during year.....		442,500
		<hr/>
Increase during 1928		\$312,500
Debt Jan. 1, 1928.....		5,180,000
		<hr/>
Debt Jan. 1, 1929.....		\$5,492,500

If the City should authorize the loans here summarized it would mean that the total debt would have been increased in two years—Jan. 1, 1927, to Jan. 1, 1929—by the sum of \$414,500. This is rather a stupendous figure and before agreeing to such a program I think we should earnestly and diligently inquire into our ability

to meet the obligation created by the debt. To meet the debt maturities of 1928 will require approximately \$3.50 per thousand of our present valuation, with the interest charge taking a little less than \$2 additional. Economic and industrial conditions in Quincy do not warrant an increase in the tax rate, and I am certain of the help of the Council in meeting the necessities of this year without adding to the taxpayers' burden. Building operations have been very satisfactory the past year, but the total of new wealth will be less than \$6,000,000. With this sum we must finance an increase in the school and some departmental budgets, and at the same time provide for matters that unexpectedly come to the surface in every year. The problem is not easy, but with hope and confidence we may assume to work it out in a satisfactory way.

Tax Collection Slow

By a reference to one part of the financial statement here given it will be seen that the tax collections for the year were far from satisfactory. Our record for years in this particular has been one of the poorest in the State and this year has been no better than its predecessors. We collected on the 1927 levy slightly better than 56 per cent. The record is disappointing since the November totals promised that we might better the average of other years. But the result is so poor that I am forced to bring the matter to the attention of the Council and the public. The fault is not due to carelessness or indifference on the part of the collector. Year after year effort has been made to collect the taxes, but a peculiarly Quincy custom has balked the best intentions of all administrations. Delayed payments of taxes cost the city thousands of dollars annually through temporary loan obligations and interest which is in no measure offset by the interest charges on overdue bills. Our position in this regard has been severely criticized by the State authorities, and consequently I am forced to take every means to clear up this dead weight of uncollected taxes. By this year's sales the City did realize on much of the outstanding amounts up to the 1926 levy, with the result that the relatively small sum of \$37,072.26 only remains unpaid. In the early months of this year attempts will be made to collect as much as possible of this sum, and also the remaining sums due of 1927. Attention must be called, however, to the seriousness of a condition whereby only 56 per cent of the City's income is collected in the year of levy. If the City could collect its taxes promptly the City Government would not be lacking in means to further some of the projects necessary to the welfare of the community. One of our main efforts this year will be to collect these outstanding taxes.

During the year a great deal of attention has been given to old tax titles, and doubtful or dubious bills. The result of this effort has been gratifying in that a fairly good sum has been realized from bills that seemed almost hopeless. This work has been done by a young lawyer specially skilled in this field, and the final result of the labor will be a rather handsome sum in back taxes, and the further advantage of a clear title to some of the property. Once this title is acquired the City may sell to bona fide owners.

Again I want to thank the members of the Council for the pleasant relations which have existed the past year, and to hope that this ideal situation may carry through the present year. Differences of opinion and of points of view will always be found in

any body of citizens, but these should in no sense mar personal or official relations, or frustrate our common purpose to labor for the best interests of the City. In carrying forward these interests I pledge the Council my active and earnest support.

In concluding this summary I am pleased to recognize the splendid achievements of the department heads, particularly the commissioner of public works, the superintendents of the sewer and water departments and the City engineers and their staffs. They all met their responsibilities so commendably that I cannot allow this time to pass without publicly acknowledging my indebtedness to them for the accomplishments of the year.

Appended to this statement are tables showing certain financial facts concerning the City.

City Debt for Year 1927

The total funded debt of the City, January 1, was \$5,078,000. During the year this was reduced by payments as follows:

City debt within the limit	\$340,500 00
Sewer debt within the limit	65,000 00
Outside the debt limit:	
Sewer	23,000 00
Water	106,000 00
County Hospital	9,000 00
City Hospital	17,000 00
High school land and building	59,000 00

Southern Artery	113,000 00
	<hr/>
	\$5,180,000 00

BORROWING MARGIN FOR 1928

“General Laws. Chapter 44, Section 70.”

Except as otherwise authorized by law a City shall not authorize indebtedness to an amount exceeding two and one-half per cent on the average of the assessors' valuation of the taxable property for the three preceding years, the valuation being first reduced by the amount of all abatements allowed thereon, previous to December 31 of the preceding year.

Net valuation, 1925	\$107,150,620 00
Net valuation, 1926	120,344,225 00
Net valuation, 1927	129,123,442 00
	<hr/>
	\$356,618,287 00
Three years' average	118,872,762 00
Two and one-half per cent	2,971,819 00
Debt January 1:	
City	\$2,379,500 00
Sewer	278,000 00
	<hr/>
	\$2,657,500 00
Margin within the debt limit	\$314,319 00

Bonds coming due, which increases borrowing margin in 1928:

	City	Sewer	Total
January	\$6,000 00	\$6,000 00
February	8,000 00	8,000 00
March
April	52,000 00	\$16,000 00	68,000 00
May	3,000 00	7,000 00	10,000 00
June	10,000 00	4,000 00	14,000 00
July	101,000 00	25,000 00	126,000 00
August	64,500 00	4,000 00	68,500 00
September	42,000 00	3,000 00	45,000 00
October	34,000 00	13,000 00	47,000 00
November	14,000 00	14,000 00
December	36,000 00	36,000 00
	<hr/>	<hr/>	<hr/>
	\$370,500 00	\$72,000 00	\$442,500 00

REPORT OF THE AUDITOR

APRIL 1, 1928.

Honorable Thomas J. McGrath:

In accordance with the ordinance of the City, I submit the annual report of my department, showing in detail the receipts and expenditures of each department.

Also several statements showing the financial condition of the City at the close of the financial year, December 31, 1927.

ELIZABETH N. DUNN,
Auditor of Accounts.

IN COUNCIL

Order No. 98

Appropriation Order

FEBRUARY 28, 1927.

Ordered:

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1927, and ending December 31, 1927, to be expended by and under the direction of the several officers or boards as herein designated.

That the appropriation for Bonds, Interest, and Expenses of Water Department, be paid from Water Receipts.

REPORT OF ASSESSING DEPARTMENT

DECEMBER 31, 1927.

To His Honor, the Mayor, and the Honorable City Council:

The following is respectfully submitted as the report of the Assessing Department for the year 1927:

Valuation and Rate

The valuation of the city April 1, 1927, as determined by the Assessors, follows:

Real Estate

Value of buildings	\$76,707,525 00
Value of land	38,157,525 00
Value of land and buildings.....	\$114,864,600 00

Personal Property

Value of personal property.....	\$15,125,950 00
Total valuation of the city as determined April 1st, 1927	129,990,550 00
Amount to be raised by taxation	3,535,742 96
Tax rate	27 20
The valuation was also increased by omitted assessments levied in December 1927.....	135,700 00
The total valuation of the city upon which taxes were assessed for the year 1927, when all assessments had been made, was.....	130,126,250 00
The polls returned by the police and those registered for the year amounted to 19,835, at \$2.00 each..	39,670 00
The Assistant Assessors who returned the personal property were as follows:	

1-1 Hattie C. Dunn	4-1 Emma L. Baldovin
1-2 Ellen E. Johnson	4-2 Frank Bruce
1-3 Helen M. Hamilton	5-1 Clara M. Taylor
1-4 Lillian M. Martin	5-2 Stephen P. Casey
2-1 Joseph R. Moran	5-3 Anna E. Usher
2-2 Joseph Scarvo	5-4 Susan Noyes
3-1 Rose Marini	6-1 Pearl H. Watson
3-2 Charles Parker Sheldon	6-2 Sarah Gill
6-3 Ethel B. Rank	

Stone Yards—Stock in Trade—Machinery—Boats

Timothy F. Ford
Joseph P. Kerrigan
William W. Jenness

Public Garages

Pauline Lalley
Elsie M. Ricker
Kino J. Maggiani

New Buildings

Ernest C. Fleet
James F. Fryar

Summary from the Table of Aggregates

Resident property owners.....	12,483
Non-resident property owners	2,322
Poll tax only	19,530
Number of horses assessed	367
Number of cows	93
Number of dwelling houses	15,503
Number of acres of land	6,000

The clerical work of the Assessing Department has been materially changed during the year. The type of tax bill which had been in use for two years was discarded in favor of a bill which has been in use for many years in Quincy and which gave the taxpayer more information than he received under the discarded bill. The method of preparing it in longhand gave a better appearing bill and in many ways added to the accuracy of the statements contained therein. From every angle the departure was very satisfactory and it is felt that the present method of preparing the tax bills serves the interest of the taxpayer and the city far beyond what was possible under the other bill.

In other ways the work of the Assessing Department has been brought up to a modern standard with the result that under the present system of doing work the Quincy department ranks with the best conducted departments in the state. The changes that were made were the result of experience and of long study of various methods and all steps finally taken toward bettering the service were submitted for approval to the State Commissioner of Taxation.

Respectfully submitted,

MICHAEL T. SULLIVAN,
J. WINTHROP PRATT,
ALBERT NELSON,

Assessors of the City of Quincy.

REPORT OF COLLECTOR OF TAXES

To His Honor, the Mayor of the City of Quincy:

REPORT OF DEPARTMENT OF HEALTH

JANUARY 1, 1928.

*To His Honor the Mayor and the President and Members of the
City Council.*

GENTLEMEN:—The following report of the activities of the Health Department during the past year is modelled on the scoring system adopted by the American Public Health Association. The Appraisal Form recognizes eight major headings in city health work. A definite value is assigned to these headings, the total equaling 1,000 points. If the heading under "Health of the Child" is further subdivided we get eleven major health activities.

Activities	Possible Score	1926 Score	1927 Score
Vital Statistics	60	57	60
Communicable Disease Control.....	175	136	149
Venereal Disease	50	30	26
Tuberculosis Control	100	67	80
Health of the Child			
Pre-natal	75	48	50
Infant	75	45	48
Pre-school	50	33	42
School	150	91	
Sanitation	175	135	145
Laboratory	70	57	65
Popular Health Instruction.....	20	12	18
Totals	1000	711	

The appraisal of the public health activities in Quincy for the year 1926 was made by Dr. W. F. Walker, Field Director of the American Public Health Association. The appraisal of the public health activities for the year 1927 has been made by the department itself, with the assistance of Dr. Clarence L. Scammon, Director of the Division of Communicable Diseases, State Department of Health. Dr. Walker suggested many improvements which it has been the policy of the department to follow wherever possible. It will be possible to make some further improvements without much additional expense, but many of the suggested improvements will require considerable increase in the budget. These suggestions are worthy of consideration and the problems involved must be met sooner or later. A comprehensive public health program demands an expenditure of about \$1.00 per capita. During 1927 it cost 84½ cents per capita, reckoning the city population as 65,275.

Vital Statistics

"A classification of deaths under one year and births by nativity of mothers should be made in order to learn the influence of the several different nativities present upon the infant mortality rate." This has been done.

Communicable Disease Control

"The suggestions made for the improvement of this service are:

1. An extension of the information gathered on epidemiological case histories made of communicable diseases. The card at present shows only residence; name of patient; age; date of report; school; by whom reported; disposition, such as hospitalization or death; date of release and such other notes as the nurse may care to make upon the reference side of the card.

In order to obtain sufficient information for the conduct of epidemiological studies or to study the effect of toxin anti-toxin or other immunizing procedures, the history ought to be considerably extended. To cover these items the following suggestions are made in conformity with the forthcoming report of the Committee on Record Forms of the American Public Health Association:

"There should be place for entry of the source and quality of the milk, water and ice supplies. In intestinal disorders—typhoid or para-typhoid—the ingestion of raw fruits, vegetables, and sea food for the past three weeks should be noted as a possible source. There should be a complete listing of persons with whom the patient was intimately associated in proximity of the date of infection.

Likewise, all immediate family and other intimate contacts should be listed, so that they may be known and supervised.

The control measures applied to these contacts should be noted, including immunization, active or passive, as well as isolation during the incubation period. The date of onset and the date of using biologicals in the treatment of the case, and the amount of such products used should be carefully recorded."

2. During 1926 it was not routine practice to make instructive nursing visits to cases of whooping cough. Good practice indicates the desirability of two such visits, the object of which is to give instruction concerning the nursing care of the cases and protection of contacts.

3. It would seem desirable that the consulting diagnostic service offered by the Health Department for the use of private physicians should be somewhat more generally advertised to the profession than is apparently the case at present.

4. Probably the most important recommendation in connection with communicable disease control is the extension of toxin anti-toxin immunization against diphtheria. It would seem advisable in this connection that use be made of such potent educational material as the diphtheria films published by the Metropolitan and John Hancock Life Insurance Companies and other organizations."

In discussing these four recommendations we may say that new complete history cards for communicable diseases are now in use. Mimeographed instruction sheets are left in the home where contagious disease is present.

Two instructive nursing visits are made in cases of whooping cough.

The consulting diagnostic service has been somewhat extended, particularly as far as assistance from the State Department of Health in the recent infantile paralysis epidemic was concerned.

An extensive and energetic campaign has been waged against diphtheria. An extra physician is attending the baby clinic in each ward for three successive weeks. His duty is to immunize, against diphtheria, all children brought to the clinic for that purpose. It takes him eighteen weeks to make the circuit of the city and then he starts over the same route again. From the spring of 1927 until the end of the year 3,100 children were immunized against diphtheria. This included a large number of children in the first two grades of the schools. The school program of diphtheria prevention was carried out very smoothly by means of the assistance of the School Department and Dr. Edward Lane of the State Health Department.

Venereal Disease Control

1. "It is recommended that an effort be made to encourage reporting of venereal infection and that likewise physicians be encouraged to report cases discontinuing treatment while still in the infectious stage.

2. It is suggested that the Health Department maintain either through its nursing service, its Sanitary Inspector, or with the aid of the Police Department, facilities for following up venereally infected persons and returning them to medical supervision, preferably to their private physicians, but to the clinic if the former is not feasible."

An attempt has been made to follow out these suggestions, but the results have been discouraging.

Tuberculosis Service

"It is suggested:

1. That additional nursing service be provided for the supervision of the home care of cases and contacts and to stimulate the periodic examination and clinical follow-up of contacts as an aid in the detection of cases.

2. That additional facilities be provided for the care of children suspected of tuberculosis. Such facilities might be open air classrooms, preventoria or day camps. In providing these facilities consideration should be given to adjusting the child's daily activities in school or otherwise to his physical capacity. The ten-year program outlined by the State Department, which will be undertaken by Quincy in the fall, should furnish the children to be cared for in such a manner."

It is to be hoped that the Department of Health may be able to provide additional nursing service in 1928. It was possible, however, to give ten underweight children an additional six-weeks' vacation at the Norfolk County Health Camp.

Pre-natal Service

"It would seem within the possibility of Quincy, in which the Visiting Nurses Service is so well accepted, that the maternal death rate could be materially decreased if Quincy mothers became sufficiently interested in this service.

1. It is suggested that efforts be made through women's clubs and other organizations to bring this possibility to the attention of local mothers and receive their endorsement and cooperation.

2. It is also suggested that sufficient clinical services be provided for those cases which would not ordinarily be under medical supervision during pregnancy.

3. As an extension or modification of clinical service it would seem desirable to encourage physicians to refer cases to the Visiting Nurses for pre-natal supervision, with the understanding that the results of periodic visits would be immediately reported to the physician. Such report should contain a statement of the general physical condition in which the mother is found, with provisions for the immediate reporting by telephone in case of unfavorable conditions."

As the Health Department was duplicating to a considerable extent the pre-natal work which was being done by the Quincy Visiting Nurses for the various insurance companies furnishing pre-natal service, it was decided about March 1st to abandon whatever pre-natal work the Health Department was doing. A pre-natal clinic is extremely desirable, but as yet there has not been sufficient sentiment aroused in its favor. There were fifteen maternal deaths during childbirth; seven of these might possibly have been prevented. There were fifty-six stillbirths and forty-four infant deaths under one month.

Infant Welfare Service

1. "It would seem desirable in this service that the nursing activities be somewhat extended. At present there is but 1.7 nursing visits to home per case registered at the clinic. This is hardly sufficient to insure the best carrying out of clinic instructions.

2. Since the infant mortality rate of Quincy is not truly portrayed by the relation of local deaths under one year to local births, it would seem desirable that a study of the effect of non-resident births and deaths be made this year, and for several years back, if possible, in order that more accurate data may be presented concerning the effect of the nursing and clinical service at present provided.

3. There are at present several baby boarding homes in Quincy taking babies, mostly from other parts of the State. Since these infants are technically residents of Quincy and since their health is recorded on Quincy records, it would seem advisable to extend the present nursing inspection service of these homes so that a monthly visit may be made."

During the past year 1,552 visits were made as compared to 400 visits in 1926.

Pre-school Service

"It has been the policy to drop cases at two years of age. It is recommended that this practice be discontinued and that a complete pre-school service be substituted in its place, including toxin anti-toxin work, consideration of habits, pre-school physical examination and nursing follow-up, with the aim of turning over to the school system children physically fit to learn and to a large degree free from physical defects."

There is now a pre-school clinic held once a month. The toxin anti-toxin work is being handled very efficiently. The State Department of Mental Hygiene is holding a weekly habit clinic at the Quincy Dispensary. In addition to this, since May, 1927, there has been a monthly Orthopaedic Clinic held at the same time as the Child Welfare Clinic at Woodward Institute. Emphasis is placed upon the prevention of orthopaedic deformities.

Health of the School Child

This is under the care of the School Department.

Municipal Sanitation

1. "The principal suggestion in connection with sanitary inspection services is for extension of supervision of food-handling establishments. Though it may not be possible to provide physical examination of all food handlers, provision should be made for examination of those cases suspected of having some communicable disease.

2. The per cent of milk supply pasteurized could well be increased; this would probably result in a decrease in the number of distributors. Recent epidemics in Massachusetts of typhoid fever from milk supplies show the danger of even a small per cent of unpasteurized milk.

3. In order to obtain the highest quality of market milk, bacteria counts should be made and the results reported, if possible, directly to the farmers as a basis of inspection of production.

4. While the city is but 70 per cent sewered, an additional 27 per cent of the population are served by cesspools. A study of the incidence of typhoid fever with the possibility of fly dissemination and the danger of soil or water pollution from the 374 privies should be undertaken.

5. The 374 privies at private dwellings should either be eliminated or put in sanitary condition.

6. The inspection of installation of new plumbing has in the majority of cities become the function of some other department than the Health Department, usually it is placed under the Building Department, as it fits in so closely with the supervision of other building inspections, and permits this service to function more economically, whereas in the Health Department it is entirely unrelated to other services. For this reason the position of Plumbing Inspector is omitted from the recommended provisions for Quincy."

All milk handlers were examined by private physicians employed by the various milk distribution agencies. Eighty-nine per cent of the milk is now pasteurized as compared with seventy-seven per cent in 1926. Bacterial counts are now reported to the farmers. No study of the incidence of typhoid fever has been made because there were only four cases during the year. Forty-seven privies were eliminated during the year.

Laboratory Service

No recommendations were made by Dr. Walker.

Popular Health Instruction

"There is need, however, for interpreting health activities and results to the public through a regular bulletin published monthly, which will combine the principal activities of the Health Department, the Board of Education and the nursing service. Films on important health subjects might well be used by theatres and before local clubs."

There is now a monthly bulletin with a mailing list of 350. During the year films on diphtheria prevention and the production of clean milk were shown both at a local fair and at baby clinics.

We do not include in this report the Budget and Personnel as recommended by Dr. Walker.

It is to be hoped that in the near future that Quincy might have more commodious quarters for the Health Department. A "Health Centre" would be the most logical way of coordinating all the various health activities of the city and could be used as well for the Health Department.

The Health Department Budget for 1926 was \$56,219. In 1927 the Health Department spent \$55,282. It will be seen that an increased amount of work and, therefore, of service has been performed at a decreased cost. It will be further noticed that while an increased amount has been expended for personal services, a decreased amount has been spent for expenses. Salaries for 1926 amounted to \$22,709. In 1927 salaries were \$23,597. "Higher individual rates, securing more capable employees, and greater attention to effectiveness of organization and procedure, so that more work may be done better with fewer employees at higher pay, is the way to true economy and better service in the long run."

Besides the various recommendations made by Dr. Walker, I should like to place on record the following suggestions for the extension and improvement of Health Department activities:

1. A baby clinic at Houghs Neck.
2. A local tuberculosis preventorium to take care of those children that cannot be accepted at Norfolk County Health Camp.
3. Establishment of a nursing supervisor.
4. Establishment of a full-time food inspector.
5. Establishment of generalized nursing service wherein each nurse would handle all the public health problems in her own section of the city.
6. The immediate purchase of at least three new automobiles.

For all the cooperation and assistance that the Health Department has received I should like to thank the State Department of Health, the Quincy Visiting Nurses, the School Department, and His Honor the Mayor and the President and Members of the City Council. The loyalty and interest of the employees of the Health department have helped the progress of the work more than any other factor.

Respectfully submitted,

E. B. FITZGERALD, M. D.,
Health Commissioner.

MORTALITY STATISTICS

Number of Deaths and Death Rates

During the year 1927 there were 559 deaths which occurred in Quincy. This number was an increase of 23 over 1926 when there were 536 deaths. There was a very slight increase in the death rate. Based on the estimated population of 65,275 on July 1st (mid-year), the death rate for 1927 was 8.6 per 1,000 population as compared with 8.5 in 1926. Of the persons who died in Quincy during the year, 35 were non-residents but there were 99 residents of Quincy who died outside the city. There were, therefore, 623 Quincy residents who died during the year. The "resident death rate" was 9.5 per 1,000 population.

SEX. Of the 559 deaths in 1927, 291 or 52.1 per cent were males as compared with 54.4 per cent in 1926. The proportion of males in the population as shown by the United States Census of 1920 was 50.6 per cent. The estimates for 1927 were 33,029 males and 32,246 females. Based on these estimates the death rate per 1,000 for males was 8.8 as compared with 9.1 in 1926. The rate for females in 1927 was 8.4 as compared with 7.8 in 1926.

AGE. Of the 559 deaths in 1927, 65 or 11.6 per cent were of infants under one year of age as compared with 12 per cent in 1926. Among the deaths registered during 1927 there were 10 over 90 years of age, 6 of whom were males and 4 were females. The oldest was 94 years, 1 month, 27 days. The average age at death fell in the 60-64 year group, as it did in 1926.

NATIVITY. 341 or 61.5 per cent of the decedents whose nativity was reported on the death certificate were native.

SEASONAL DISTRIBUTION OF DEATHS. The largest number of deaths in any one month occurred in February, when there were 59, and the next largest in December when there were 58. The lowest number occurred in August when 29 were registered.

INFANT MORTALITY. The infant deaths in 1927 were 57 per 1,000 live births. The infant mortality rates since 1910 are shown below:

1910	103	1919	64
1911	102	1920	66
1912	82	1921	55
1913	108	1922	73
1914	75	1923	70
1915	76	1924	53
1916	72	1925	58
1917	71	1926	66
1918	90	1927	57

The highest proportion of deaths under one year of age occurs during the early period of infancy and especially is this true of the first week. In 1927 there occurred 29 deaths in the first week, constituting 44.6 per cent of all deaths under one year of age. In the first month there were 44 deaths or 67.7 per cent of all infant deaths. These percentages are higher than in 1926 when the deaths under one week constituted 40.6 per cent, and under one month 59.4 per cent of all infant deaths.

CAUSES OF DEATHS:

PNEUMONIA caused 42 deaths in 1927 or 64 per 100,000 population. It was responsible for 49 deaths or 77 per 100,000 population in 1926.

HEART DISEASE. The deaths from heart diseases in 1927 numbered 147 or 26.5 per cent of all deaths or 222 per 100,000 population as compared with 124 deaths or 23.3 per cent of all deaths or 194 per 100,000 population in 1926.

TUBERCULOSIS in its various forms claimed 37 victims in 1927, of whom 35 died from tuberculosis of the respiratory system. Deaths from tuberculosis constituted 6.6 per cent of all deaths in 1927. The rate per 100,000 population in 1927 was 56.5 as compared with a rate of 44.5 in 1926. In addition 11 Quincy residents died of tuberculosis in sanatoria, making the total number of deaths from this disease 48. Subtracting from the number 2 non-residents who died in Quincy, the corrected rate per 100,000 population was 70.5. Of the 26 deaths in Quincy from tuberculosis among males, 13 or 50 per cent of the decedents were former granite workers.

CEREBRAL HEMORRHAGE and apoplexy caused 38 deaths or 6.8 per cent of all deaths or a death rate of 58 per 100,000 population. In 1926 there were 41 deaths from this cause, corresponding to almost 8 per cent of deaths from all causes or a death rate of 65 per 100,000 population.

CANCER caused 65 deaths in 1927, corresponding to a death rate of 100 per 100,000 population as compared with 56 deaths with a rate of 89 per 100,000 population in 1926.

BRIGHT'S DISEASE and nephritis were the cause of 33 deaths in 1927, corresponding to a rate of 50 per 100,000 population as compared with 44 deaths and a rate of 70 per 100,000 population in 1926.

DISEASES OF EARLY INFANCY and congenital malformations caused 36 deaths in 1927, a rate of 55 per 100,000 population compared with 32 deaths and a rate of 51 in 1926.

EXTERNAL CAUSES. The number of deaths from external causes was 41, with a rate of 63 per 100,000 population as compared with 40 deaths and a rate of 63 in 1926. Automobile accidents were the cause of 8 of these deaths as compared with 9 in 1926.

REPORT OF SUPERINTENDENT

JANUARY 1, 1928.

Dr. Edmund B. FitzGerald, Health Commissioner.

DEAR SIR:—I hereby submit the annual report of the Department of Health for the year ending December 31, 1927.

The personnel of the department is as follows:

Commissioner of Health and Insp. of Milk.....	Dr. Edm. B. FitzGerald
Superintendent	Thomas G. Smith
Clerk	Verna M. Kelley
Sanitary Inspector	A. A. Robertson
Assistant Milk Inspector	James O'Dowd
Plumbing Inspector	J. J. Keniley
Inspector of Meats and Provisions.....	Howard O. Rogers
Dispensary Physician	Dr C. J. Lynch
Child Welfare Physician.....	Dr. Rachel E. Hardwick
Venereal Disease Physician.....	Dr. E. E. Smith
Bacteriologist	Dr. E. E. Smith
Tuberculosis Nurse	Gertrude T. Russell, R.N.
Contagious Nurse	Cath. F. Coleman, R.N.
Child Welfare Nurse.....	Nettie D. Fowler, R.N.
Child Welfare Nurse.....	Mary E. Keeley, R.N.
Inspector of Animals and Slaughtering.....	Dr. E. A. deVarennes

Under date of January 1, 1927, the Visiting Nurse Association took over the pre-natal work, which was performed by Miss Keeley during the year 1926. Miss Keeley was transferred to the Child Welfare work to assist Mrs. Fowler.

Dr. Hardwick was appointed Child Welfare Physician to take the position made vacant by the appointment of Dr. FitzGerald as Health Commissioner.

Appended you will find the report of the various inspectors and nurses, also report of diseases and deaths reported for the year 1927.

See Auditor's report of receipts and payments.

Respectfully submitted,

THOMAS G. SMITH,
Superintendent.

REPORT OF CHILD WELFARE PHYSICIAN

EDMUND B. FITZGERALD, M.D., *Health Commissioner.*

DEAR DOCTOR:—The report of the Child Welfare activities for the year ending December 31, 1927, is herewith submitted.

The detailed statistical data of the clinics will be found in the report of the Child Welfare Nurse. Her report will include the number of clinics held during the year, the average attendance, the number of new cases enrolled, and the total clinic registration.

Certain facts implied by these figures seem worthy of special note:

a. The number of newly registered children for the year 1927 shows a continued interest in the character of service which the clinic offers.

b. Infants are being enrolled at the clinics at much younger age than formerly. This is a very important step in the progress of our Child Welfare work, since it has enabled us to reestablish the mother's breast milk supply in many cases where the object of clinic attendance was to seek advice about artificial feeding because a hungry baby was dissatisfied.

c. Of the four clinics having the largest attendance only three now have the service of a physician in regular attendance.

The new clinics have been added to our program this year. The clinic for pre-school age children (ages 3 to 6 years) and the Orthopaedic clinic, each meeting once a month.

There have been eight of these clinics, and although the attendance has been small for statistical material, the number has been all that the present staff could handle.

The results of the examinations have indicated an urgent need for mothers to watch the child's health and habits during the years from the nursery to the schoolroom.

The importance of the orthopaedic examinations is made clear from the findings recorded in a separate report.

During the latter part of the year, certain regulations in the administration of the clinics have been worked out successfully. The problem of conference with the examining physician has been arranged so that each mother receives a number in order of her arrival at the clinic session. In sequence these babies are seen by the physician in charge. The number of children to be seen on each afternoon is able to be fairly accurately estimated and numerals above this estimate are told early in the clinic period that they are unlikely to be seen that afternoon. If a mother chooses to wait until the end of the clinic she is always seen. Children whom the physician has asked to return on a certain date are seen on the date arranged. All new babies are examined on the first day of registration unless they prefer to postpone the conference.

As a part of the educational plan for the Children's Welfare, an endeavor was made to have brief talks given at the clinics, while the mothers were waiting for conference with the physician. The first experiment was made with a five-minute talk on "What Is Good Milk, Certified, Grade A, and Household Milk?" The speaker was one who appreciated his audience and knew his subject. He had the added attraction of two reels of interesting moving pictures to illustrate his talk. In spite of an almost ideal performance it was quite obvious to those in charge of the clinic that our present housing facilities were not suited to such a program. On

this account the plan for continuing the talks on other subjects was abandoned for the year.

With our present organization the teaching program is covered by: (a) the physician's instructions to the individual mothers at the time of the conference; (b) through the printed literature which the clinic provides as health instruction; (c) the detailed instruction given by the Child Welfare Nurse during her follow-up visits to the homes of all newly registered babies and others needing extra tutoring.

Special thought is given to cooperating with the activities of the other clinics provided by the city for the welfare of children—the Diphtheria Prevention Clinic, the Habit Clinic, and the Undernourished Children's Clinic.

During the summer months instructions were given about sun baths for babies and children. The clinics whose proximity to the beaches afforded the children the privileges of Quincy's natural resources were very successful in carrying out the plan.

For the improvement of Child Welfare work, the following recommendations are made:

1. A physician in attendance at the clinics of each ward.
2. Additional nursing service so that there may be at least two full time nurses to extend the educational program through more follow-up teaching and the arrangement of demonstrations and exhibits of health material for clinic instruction.
3. Reiteration of the recommendation made one year ago,—“Establishment of a Health Center for the correlation and centralization of pre-natal work, infant welfare clinics, tuberculosis prevention, dental hygiene, pre-school clinics, posture and nutrition classes, habit clinics and diphtheria prevention” (from City Report 1926—Dr. E. B. FitzGerald).
4. The cooperation of a Children's Ward at the Quincy City Hospital to which could be referred children needing hospital care under the direction of a pediatrician but unable to afford this privilege as a private patient. Difficult feeding cases frequently present this problem.

In closing, may I express my appreciation for your generous helpfulness and understanding of the problems involved in this work. I wish also to thank for their cooperation, Mrs. Fowler and Miss Keeley, the Child Welfare nurses to whom is due much credit for the success of the clinics; Dr. Katzeff and the physicians from the Graduate School of Harvard Medical School, who have volunteered several months of service; the Boston Dispensary Hospital for Children; the personnel of the Health Department, the Fore River Club, the West Quincy and Atlantic Councils of the K. of C., the Presbyterian Church of South Quincy, the Trustees of Woodward Institute and the Quincy and Wollaston Women's Clubs.

Respectfully submitted,

RACHEL L. HARDWICK,
Child Welfare Physician.

REPORT OF CHILD WELFARE NURSE

JANUARY 1, 1928.

DR. E. B. FITZGERALD, *Health Commissioner*.

DEAR DOCTOR:—I herewith submit my eighth annual report of my work as Child Welfare Nurse for the year ending December 31, 1927.

The assistance of an additional nurse, Miss Mary Keeley, aided the child welfare work to a great extent. As it was possible to do a great deal more follow-up work we were able to learn more about home conditions and were better able to give proper assistance to the mother and to the child. Miss Keeley has assisted at clinics when necessary and has had charge of the Quincy Point Clinic which is held at the Fore River Club House.

There were 2,217 home visits made to babies. Nine boarding homes for babies were inspected. There were 147 babies referred to their family physician and seven babies referred to local physicians for special treatments. Two were referred to the Quincy City Hospital for X-ray of the thymus. Fifteen were referred to the Children's Hospital for the following reasons: dislocated hip, fractured nose, osteomyelitis, acrodynia, attendance at the muscle training, heart and orthopedic clinics. One was referred for the fitting of an abdominal supporter; four babies were referred to the Boston Dispensary; three to free beds as feeding cases and one to skin department. Three were referred to the Habit Clinic at the Quincy Dispensary. Four were referred to the Tuberculosis Clinic for Von Pirquet tests. I also assisted at the Diphtheria Prevention Clinics held on the same day as the Child Welfare Clinics.

Beginning May 10, 1927, a Pre-school Clinic was held once a month at the Woodward Institute on the same day as the Baby Clinic. Seventy children between the ages of 3 and 6 years attended at this clinic. Dr. Miriam Katzeff, a specialist in orthopedics, made 89 examinations in addition to those made by Dr. Rachel Hardwick. Four cases of birth injuries, 31 weak feet needing shoe correction, one infection of the shoulder, one dislocated hip, 15 postural defects and seven late and inactive rickets. Sixty of the eighty-nine children are being supervised at the present time.

During 1927 there were 65 deaths among babies under the age of one year. Nine of these were registered at the clinics but were not under direct supervision at the time of death.

The causes of deaths were as follows:

Bronchial pneumonia	2
Infectious diarrhea	2
Imbecility	1
Erysipelas	1
Malnutrition	1*
Suffocation	1
Pertussis	1

*Six weeks old—attended clinic once.

There were 622 new enrollments during the year, making a total of 1,752 registered babies.

There were 247 clinics held during the year with a total attendance of 7,047, making an average attendance of 28.

	Attendance	Percentage Increase or Decrease
Ward 1 Woodward Institute	1,685	6% decrease
Ward 2 Fore River Club	722	14.3% decrease
Ward 3 Presbyterian Church	1,307	19% increase
Ward 4 K. of C. Hall, West Quincy.....	678	8.1% decrease
Ward 5 Library Building, Wollaston.....	1,469	37% decrease
Ward 6 K. of C. Hall, Atlantic.....	1,186	13% increase
	<hr/> 7,047	<hr/> 10.6% decrease

The total attendance at clinics since 1920 is as follows:

1920	539
1921	2,504
1922	2,757
1923	3,686
1924	5,023
1925	7,550
1926	7,800
1927	7,047

At this time I wish to thank Dr. Edmund FitzGerald, the Health Commissioner; the Public Welfare Department; Quincy and Wollaston Women's Clubs; the Visiting Nurses of the Quincy Women's Club; the Quincy Hospital and the physicians of Quincy for the many courtesies extended the Child Welfare Division of the Health Department. To Dr. Rachel Hardwick, Dr. Miriam Katzeff and other physicians who so kindly gave their time and untiring assistance in the clinic work, and for their many courtesies to me, I express my deep appreciation.

Respectfully submitted,

NETTIE DENTON FOWLER, R.N.,
Child Welfare Nurse.

REPORT OF ORTHOPAEDIC PHYSICIAN

JANUARY 2, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner.*

DEAR DOCTOR:—The report of the work in the Orthopaedic Clinics during 1927 is as follows:

The first clinic for the orthopaedic examination of infants and children was held on May 18, 1927. Subsequent clinics have been held on the second Thursday of each month, meeting with the Child Welfare Clinics at Woodward Institute.

One of the definite advantages in having these clinics meet at the same session has been the possibility of correlating, at the child's first visit, the general physical examination made by the Child Welfare physician and the special examination made by the orthopaedist. This plan gives the mother in one visit the complete picture gained from two examinations.

The total number of Orthopaedic Clinics during 1927 has been eight. Eighty-nine examinations have been made and the progress of cases has been followed monthly.

The object of the examination has been to determine the quality and functional power of the child's joint, muscle, and bone mechanism. To this end measurements and tests have been made for the early detection of:

- (a) Congenital anomalies such as club feet, deformities of the knees, dislocation of hips, delayed union of the spinal column, wry neck, etc.
- (b) Birth injuries with paralyses.
- (c) Affections of the bones due to nutritional disturbances such as rickets with its concomitant tendency to bow leg and knock knee.
- (d) Static deformities including faulty posture, pronated feet, and lateral curvature of the spine.

The children examined have represented ages from early infancy (age one month) through the pre-school age (six years). The incidence of conditions occurring in the children examined was as follows:

Weak feet	No. 31
Faulty posture, round shoulders, flat chests, prominent abdomen, weak backs.....	" 15
Rickets with beginning bow legs or knock knees.....	" 7
Birth injuries with paralyses.....	" 4
Dislocated hips	" 1
Generalized muscles weakness with retarded joint function such as markedly delayed sitting, standing and walking	" 7
Faulty shoe and undergarment hygiene predisposing to foot disorders and poor posture	" 60

Each mother is given an explanation of the findings during the examination with recommendations for the care of her child. A large proportion of the advice has included directions for selecting proper footwear and instruction in exercises for muscle strengthening.

It is not without some degree of gratification that we note that one of the youngest cases of congenital dislocation of the hip on

record (age 6 months) was detected at our Quincy Clinic. Treatment for this child was instituted early enough so that she will have a normally functioning joint when she is ready to begin to walk.

Much of the success of this work is due to the interest and co-operation of Mrs. Fowler and Miss Keeley, nurses in attendance at the clinics. It has been their task to acquaint the mothers with the service which is offered.

In closing, it is my pleasure to pay tribute to you, Dr. Fitzgerald, whose foresight has allowed Preventive Orthopaedics to be a part of the Child Welfare program.

Respectfully submitted,

M. G. KATZEFF, M.D.

REPORT OF PRE-NATAL NURSE

JANUARY 1, 1928.

DR. E. B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—I herewith submit my report for the year ending December 31, 1927:

Pre-natal visits	303
Blood pressures	120
Urinalyses	155
Visits to babies	842
Visits to contagious cases	195

Commencing about September 20th, most of my time was devoted to taking histories preliminary to the survey conducted in the public schools by the State Department of Public Health.

During the last two weeks of the year my time was devoted to assisting the contagious nurse, quarantining and releasing measles cases.

Throughout the entire year I assisted at the Child Welfare Clinics as shown in Mrs. Fowler's report.

Respectfully submitted,

MARY E. KEELEY, R.N.

REPORT OF QUINCY DISPENSARY

JANUARY 1, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR DOCTOR:—The following report of Quincy Dispensary for the year ending December 31, 1927, is respectfully submitted:

Clinics held	51
Attendance at clinics	130
Contacts examined	67
Von Pirquet tests done on contacts.....	36

Undernourished or Underweight and Contact Clinic:

Clinics held	52
Attendance	652
Vaccinations done	11
Von Pirquet tests done	55

For the actual figures as to the type of cases and disposal of same, see the report of Miss Russell, Tuberculosis Nurse.

To my mind, from a health standpoint, the outstanding problem for the City of Quincy is, "What is the best way to handle the so-called undernourished children, both school and pre-school age in the city?"

Of course, practically speaking, this means the pre-tubercular treatment of children of school and pre-school age. Physical examination, X-ray and tubercular tests prove this fact beyond doubt.

The first question is, "How many such cases of school and pre-school age exist in Quincy?" An accurate survey of one school done by the Quincy Board of Health, about 1½ years ago, showed 18 per cent needing definite treatment.

The present survey of Quincy public schools by Massachusetts State Board of Health physicians will give us an accurate idea of the number at the present time. In other cities tabulated, the per cent has been between 18-24 per cent.

Assuming Quincy to be average, we are forced to contemplate about 2,000 children in the city needing a definite regime of treatment to prevent their falling later, either into a state of Hilum T.B. or, what's worse, developing pulmonary tuberculosis. Of course, you must readily see that this is not the whole story, for there is probably a good proportion of children in the pre-school age that would greatly increase this if an accurate survey were done.

The next question in this problem is, How to handle it? The best method so far introduced is undoubtedly the one adopted by the State of Massachusetts in its so-called ten-year program, namely, life properly supervised, both medically and by counselors, wherein the children can be given forced nourishment, proper exercises, live and sleep outdoors and all else that will be conducive to the quick developments of their general condition and especially their lungs.

To conserve time for education, vacation periods are chosen, with extension in the fall for those who do not quickly respond.

Camp treatment when properly done is always expensive, but if improperly or insufficiently undertaken is, of course, of no value medically. The most economical and practical procedure is by the cooperation of several communities, such as the Norfolk County Hospital Association is now doing at Braintree. Here we have a health camp for boys and girls, admirably situated, and splendidly administered, supervised by a personnel of individual specialists in nursing, teaching, and athletic capacity, and all working harmoniously under the general supervision of the superintendent of Norfolk County Hospital, who also is a lung specialist.

With such a plant already built, it seems to me proper to spread the needs of these undernourished children before the council for definite financial aid—supported by general taxation, rather than depending, as at present, upon general charity.

The amount of money obtained from sale of Christmas seals is now the sole means of caring for these children and is far from adequate.

By stimulating civic interest and financial assistance now, we will not only do right by the children, but will avoid expending many times the amount in caring for tuberculosis patients and families of the future.

Preventive measures are not only the best but they are also the cheapest.

As is well known, the inducement for undertaking the problem of pre-tubercular condition of the children is that results at this age are practically 100 per cent cures, whereas left to adult age it is a very different story.

In closing, I wish especially to thank Miss Russell, the dispensary nurse, and yourself for your splendid cooperation during the year.

Yours truly,

C. J. LYNCH,
Dispensary Physician.

REPORT OF TUBERCULOSIS NURSE

JANUARY 1, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner.*

DEAR DOCTOR:—I herewith submit to you my annual report for the year ending December 31, 1927, of the Tuberculosis Dispensary:

Cases of tuberculosis in city.....	313
Active cases	171
Arrested cases	85
Hospital cases	57

New cases reported during the year	84

Suspicious	22
Negative	0
VonPirquet tests done on contacts	36
Negative	9
Positive	27

Forty-eight cases were referred to the Norfolk County Hospital for X-ray and further examinations by Dr. Pillsbury during the year and but two (2) were provided with transportation.

Undernourished or Underweight and Contact Clinic

Clinics held	52
Attendance	652
Referred to Quincy City Hospital for tonsils and adenoids....	9
Vaccinations done	11
VonPirquet tests done	55
Negative	24
Positive	31
Referred to Boston Dispensary for extraction of teeth.....	1
Referred to the Children's Hospital for treatment.....	2
Sent to Deaconess Convalescent Home	1
Referred to Norfolk County Hospital for X-rays.....	36

The Saturday morning clinics have increased in attendance of 160 this year over last year, and the interest which the children and parents have shown has been very pleasing to the workers. Dr. Lynch has personally attended the fifty-two children's clinics and fifty-one adult clinics.

In connection with our children's clinic we are fortunate in having our Norfolk County Health Camp at Braintree Highlands, where the children were carefully supervised by Dr. Nahum S. Pillsbury, superintendent of the Norfolk County Hospital, and the

assistance of two graduate nurses, one for the boys' camp and one for the girls' camp; also eight women counselors.

This year our Braintree camp had an enrollment of eighty (80) children, forty (40) boys and forty (40) girls.

Each counselor was responsible for her ten children, and daily routine was followed throughout the camp life. A graduate of the Forsyth Dental School had charge of the tooth brush drills and stressed the importance of clean teeth towards good health. Every child attended his own church on Sunday. The usual picnic was held at Duxbury Beach. No medicine was administered with the exception of one ounce of cod liver oil twice a day.

The usual stay of the camp children is eight weeks, but this year there were twenty children who needed extended camp life so arrangements were made through Dr. Pillsbury to keep the twenty (20) children for six more weeks. Ten of these were from Quincy. A teacher was hired and school session was held daily. Our average gain for the girls was 6.12 pounds and for the boys 5.29 pounds, our camp having made one of the biggest gains in all the camps.

I regret that I was unable to send my full quota of thirty-two children to camp, but due to lack of funds Brookline was given Quincy's quota and Quincy sent twenty (20)—all that I had money for.

In closing, I wish to extend my thanks and appreciation to the personnel of the Health Department who gave their cooperation during the year; to Dr. Lynch, dispensary physician, and Dr. Pillsbury of the Norfolk County Hospital, for his interest in my patients, especially the camp children; also Mr. Fernald and Miss Waddell, who gave their assistance to the less fortunate cases. This year we had a new worker in our midst, Miss Thomas, of the Society for the Prevention of Cruelty to Children, who so cheerfully rendered aid to three of my cases.

Respectfully submitted,

GERTRUDE T. RUSSELL, R.N.,
Dispensary Nursc.

REPORT OF CONTAGIOUS NURSE

JANUARY 1, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR DOCTOR:—I herewith submit my third annual report of contagious work for the year ending 1927.

1,194 cases of diseases were reported as follows:

Measles	409
Scarlet fever	376
Whooping cough	92
Chicken pox	82
Mumps	80
Diphtheria	54
Lobar Pneumonia	37
Anterior Poliomyelitis	17
German measles	13
Influenza	12
Encephalitis	2
Rabid dog bite	11
Septic sore throat	2
Typhoid fever	4
Actinomycosis	1
Ophthalmia	3

Measles

There was the usual outbreak of measles during the spring months. During the middle of December the disease became epidemic in Atlantic and Wollaston. One death has occurred from this disease.

Scarlet Fever

Scarlet fever was unusually prevalent during the year, affecting principally Wards 1 and 2. Most of the cases were of a mild type. Of the 376 cases reported, 62 of these were sent to the Brighton Hospital for treatment. There was a total of six deaths; four occurred in Quincy and two in the hospital.

Diphtheria

Much has been done during the past year in the prevention of this disease. The three toxin anti-toxin treatments were given to 2,803 school children. In March a clinic was started to give the children of pre-school age the treatments. It is held once a week for three successive weeks in each ward of the city. During the past year 289 children of pre-school age have had the three treatments, making a total of 3,092 children immunized.

Of the 54 cases reported during the year, 11 cases were cared for in Brighton Hospital. In connection with the follow-up work 428 cultures were taken. Some carriers were found by this means. One death in Quincy and one in the hospital resulted from diphtheria.

Anterior Poliomyelitis

Seventeen cases were reported during August, September and October, many more than the previous year, yet Quincy was fortunate in not having the epidemic that occurred in other cities. One patient died at home.

Mumps—Chicken Pox

Eighty cases of mumps were reported, mostly from Ward 6. Eighty-two cases of chicken pox were reported from the various wards of the city.

Whooping Cough

Ninety-two cases were reported from Wards 5 and 6. Two deaths occurred from this disease.

Typhoid Fever

Only four cases reported during 1927. These cases were investigated. Nothing definite regarding the source of infection in two cases could be obtained. The other two cases were no doubt contracted outside of the city. There was one death.

Lobar Pneumonia—Influenza

Twenty deaths occurred out of the 37 cases of lobar reported. Out of 11 cases of influenza reported there were nine deaths.

In connection with contagious follow-up work 2,594 visits were made, including checking up on quarantine rules, the taking of cultures and examination of contacts and releases from quarantine. One hundred visits were made in connection with the school clinic histories.

Office hours were held daily from 9 to 9.30 A. M. and 1 to 1.30 P. M. in the Health Department by the contagious nurse. One afternoon a week was spent at the T. A. T. clinics held in the various wards.

Respectfully submitted,

CATHERINE F. COLEMAN, R.N.,
Contagious Nurse.

REPORT OF QUINCY HABIT CLINIC

JANUARY 1, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner.*

DEAR DR. FITZGERALD:—The following is a report of the Quincy Habit Clinic from January 1, 1927, to December 31, 1927.

Number of weekly clinics held.....	47
Number of new cases referred	48
Pre-school age	31
Number of children attending—new.....	42
Number of children attending—old.....	12
Total number of children attending	54
Number of visits made by children.....	171
Number of visits made by social worker.....	273

Problems for which referred:

Behavior problems, viz., screaming, temper, disobedience, crying, negativism, irritability	13
Speech disorders	9
“Nervousness”	8
Retardation	8
Enuresis	5
Food capriciousness	5
Thumb-sucking	5
Poor school work	3
Fears	2
Masturbation	2
Nail biting	2
Question of feeble-mindedness.....	2
Babyishness	1
Lying	1
Shyness	1
Soiling	1
Stealing	1
Truancy	1

Sources of case material:

Physicians	11
Schools	11
Patients brought by mothers.....	8
Mothers of other patients.....	5
Nurses	4
Quincy F. W. S.	2
Other hospitals	2
S. P. C. C.	2
Social workers of Habit Clinic.....	2
Children's Bureau	1

There has been conducted, in conjunction with clinical work done by the Division of Mental Hygiene, a relatively extensive educational program which was done in an effort to educate the community in the problems of mental hygiene and the type of service

that such a specialized clinic had to offer. This part of the program has been carried on through cooperation of such groups, as Wollaston Women's Club, Quincy Women's Club, City Federation of Women's Clubs, and Parent-Teacher Association, and talks to the teachers in the schools. The local newspaper has been most helpful in its willingness to aid the clinic in its educational program.

Respectfully submitted,

OLIVE A. COOPER, M.D.,

Assistant to Director Division of Mental Hygiene.

REPORT OF SANITARY INSPECTOR

JANUARY 1, 1928.

DR. E. B. FITZGERALD, *Health Commissioner.*

DEAR SIR:—Herewith is submitted my report for the year ending December 31, 1927.

Total 47

Coal Dust Nuisance

The coal blowing from the plant of the Edison Electric Illuminating Company at North Weymouth was the source of numerous complaints during the spring and summer months. There has been some improvement in conditions over the preceding summer, and it is hoped with the continued cooperation of the Edison officials and the State Department of Public Health that there will be still further improvements.

Harbor Pollution

In my report for 1926 reference was made to the pollution of the bathing beaches. Numerous complaints were received during the past summer that under certain tidal and wind conditions that the water was covered with a thick black scum and that bathing was practically impossible. A resolve will be introduced into the 1928 session of the legislature calling for an investigation by the State Department of Public Health to determine the source or sources of the nuisance.

Garbage

During the early spring, steps were taken to compel every person transporting garbage through the streets of the city to register with the Department of Health as required by law. The regulations of this department relative to the conditions of the vehicles used were enforced, resulting in a big improvement in this respect.

It might not be amiss to suggest that some consideration be given in the very near future to other methods of garbage disposal. Quincy has been more fortunate than most cities and the cost of disposal is comparatively low. At the present time the garbage is sold to farmers in outlying towns to be used in feeding to pigs. These towns are growing very rapidly and it is only a question of a few years before the boards of health in these towns will refuse to grant permits for the keeping of pigs. When that time comes this city will be compelled to adopt some other method of disposal.

Respectfully submitted,

A. A. ROBERTSON,
Sanitary Inspector.

JANUARY 1, 1928.

DR. E. B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—Herewith is submitted my report of activities other than those as Sanitary Inspector for the year ending December 31, 1927.

Culture Stations

Culture stations were maintained at eight drug stores in various sections of the city where smallpox virus, various culture outfits and diphtheria anti-toxin were available for physicians.

A supply of serums was kept at the Dispensary and a supply of culture outfits at the office in City Hall.

In addition to serums supplied by the State Department of Public Health, the following materials were supplied by this department:

Scarlet fever toxin for active immunization.

Dick test outfits for determining susceptibility to scarlet fever.

Anti-rabic serum.

Diphtheria Prevention Clinics

During the year 40 diphtheria prevention clinics were conducted by this department in addition to those held in the public and parochial schools. These clinics were conducted once a week in conjunction with the child welfare clinics. The attendance since the first of September has averaged over 75 each week. It is of interest to note that the attendance has been larger when the appeal was sent to the child itself than was the case when the appeal was sent to the parents.

Mortality and Morbidity Reports and Charts

During the year there were kept morbidity charts for diphtheria, scarlet fever, measles and whooping cough. These charts showed the expectancy each week for the four diseases and also the number of cases each week in 1927.

Morbidity reports by wards were prepared each month, and these reports were consolidated at the end of the year for the annual report.

A list of deaths showing the cause, sex, age and nativity was prepared each month and these were also consolidated at the end of the year for the annual report.

Newspaper Publicity

The Patriot-Ledger has been very generous in devoting space to the activities of this department. A report of communicable diseases and deaths was published weekly throughout the year. Special articles on various phases of public health activities were prepared and published from time to time.

Health Education

The Health Department booth at the Chamber of Commerce "Trading Post" acquainted a large number of people with the

departmental activities. It is not possible to estimate the number of persons who visited the booth during the three days of the Trading Post, but some idea may be gained when it is stated that two reels of motion pictures, one on diphtheria prevention and another on milk, were shown 19 different times to approximately 2,800 people.

Commencing June 1, 1927, this department issued a "Monthly Bulletin," which was mailed to physicians, school masters and others throughout the city. The mailing list at present numbers over 350.

Venereal Diseases

During the year 26 cases of venereal diseases were reported as follows:

Gonorrhea	9
Syphilis	17
Total	<hr/> 26

Notices of discontinued treatment before being rendered non-infectious were received in 12 cases, and in 9 of these cases we were successful in having the patient returned to treatment.

Respectfully submitted,

A. A. ROBERTSON.

REPORT OF THE MILK INSPECTOR

JANUARY 1, 1928.

DR. E. B. FITZGERALD, *Health Commissioner.*

DEAR SIR:—I herewith submit the following report of the Sanitary Milk Inspector for the year ending December 31, 1927.

The following statistics refer to milk, cream, ice cream and oleo-margarine consumed, processed and produced in the city of Quincy:

Dairies in City of Quincy

1 cow	19
2 cows	4
3 to 5 cows	6
5 to 10 cows	3
11 to 25 cows	5
26 and over	3
Total number of dairies in Quincy	39
Total number of dairies within 15 miles.....	9
Total number of cows in Quincy.....	296
Total number of cows within 15 miles.....	211
Total number of cows supplying milk to Quincy	507
Raw milk supplied to Quincy (quarts).....	3,407
Milk contractors' processing and storage plants in Quincy and nearby towns:	
In Quincy	6
In Holbrook	2
In Randolph	2
In Hingham	2
In Milton	2
In North Pembroke	1
In Southboro	1
Teams, auto cars and trucks employed in the distribution of milk, cream and ice cream	127
Milk consumed in Quincy per day (quarts).....	30,474
Pasteurized milk consumed in Quincy per day (quarts).....	27,069
Raw milk consumed in Quincy per day (quarts).....	3,405
Grade A baby and special milk in Quincy per day (quarts)..	2,111
Certified milk consumed in Quincy per day (quarts).....	400
Per cent pasteurized	90
Per cent raw	10
Cream consumed in Quincy per day (quarts).....	1,977
Ice cream consumed in Quincy per day (gals.).....	2,503
Ice cream produced and manufactured in Quincy per day (gals.)	421
Buttermilk consumed in Quincy	483
Number of dairies scored in Quincy and nearby towns.....	71

Table Classification of Dairies Inspected and Scored

Scoring 30 to 40	3
Scoring 41 to 50	17
Scoring 51 to 60	13
Scoring 61 to 70	29
Scoring 71 and over	0
Retail licenses issued, milk, ice cream and oleomargarine.....	822
Revenue from same	\$435.50
Cows examined for streptococci	80
Milk samples collected for streptococci and pus.....	10
Milk samples collected	1,472
For bacteria	736
For chemical test	736
Milk samples collected from teams, autos and trucks.....	1,007
Milk samples collected from stores	299
Milk samples collected from dairies	142
Milk samples collected from restaurants	20
Milk samples collected from bakeries	4
	1,472
Cream and ice cream samples collected	47
Number of stores visited	608
Number of dairies visited	257
Number of milk rooms visited	131
Number of milk processing plants visited	117
Number of ice cream manufacturing plants visited.....	38
Number of restaurants visited	101
Number of bakeries visited	7
Complaints investigated	5
Milk licenses revoked	1

The price of milk in the City of Quincy has remained the same as 1926 with the exception of during the shortage, caused by the floods in New Hampshire and Vermont.

The chain stores have charged for cash and carry, 12 cents per quart and they distributed over 4,000 quarts in Quincy and 400 quarts of cream. The charge for certified milk is 30 cents.

All ice cream manufacturing plants and milk pasteurization plants are obliged to have a special license which requires more special sanitary inspection. The work in this department is growing more every year.

Many local producers are establishing pasteurization systems, and the percentage of raw milk is becoming less each year.

Respectfully submitted,

JAMES O'DOWD,
Acting Milk Inspector.

REPORT OF PLUMBING INSPECTOR

JANUARY 1, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—As inspector of plumbing I have the honor to submit my thirty-fourth annual report.

Financial Statement

Appropriation	\$200 00
Expended:	
Transportation	\$185 00
Office	70
Telephone	10 00
	195 70

Unexpended balance \$4 30

Much time and attention was given this year so that all stores and markets that handle any kind of meats or foodstuffs were clean and sanitary in every way, according to the rules of this department.

We are growing fast to be the business center for all surrounding towns. More people are coming here to trade and do their marketing each year. This year the holiday business in our mar-

kets and stores was the largest ever; our marketmen, especially, were more than pleased with the large amount of poultry of all kinds that was sold. I found many markets completely all sold out and conditions best ever.

Wollaston and Atlantic are fast growing to be a central district by themselves. Large business enterprises are gradually building up and creating a demand for more stores and markets of a larger type and better equipped with all the latest up-to-date sanitary fixtures for handling goods to the customer in the shortest time possible.

On April 5th, 1927, Mr. Fred R. Nivers, deputy inspector of fish, called at this office. We made inspections all over the city of all fish markets and stores where fresh fish is sold for food. He expressed himself much pleased with the fine quality of fish used here and the neat, clean conditions in which he found the markets. He was very grateful to me for giving him a day for this purpose, which I was very glad to do.

Number of stores	326
Number of markets	235
Number of fruit stores	46
Number of creameries	7
Number of cafés	14
Number of delicatessens ..	3

We have one hundred so-called chain stores in our city this year. Cash and carry stores are sometimes cheaper than those giving credit and delivery. Certainly carrying food a short distance is no hardship. The clean stores should be preferred. In all stores food should be covered so that it will not be touched by flies, insects or fingers. The housewife should go to the store to select her food, especially meats and fresh fruits and vegetables. At the same time, she will learn to know and compare prices and brands. She will also keep in touch with any special bargains that are offered.

Respectfully submitted,

HOWARD ROGERS,

Inspector of Meats and Provisions.

REPORT OF INSPECTOR OF ANIMALS AND SLAUGHTERING

JANUARY 1, 1928.

DR. E. B. FITZGERALD, *Health Commissioner*.

DEAR DOCTOR:—I hereby submit my annual report for the year 1927 as Inspector of Animals and Slaughtering:

Number of dogs quarantined	90
Number of positive cases of rabies from December 1, 1926, to December 1, 1927.....	36
Number of cows inspected	265

Respectfully submitted,

DR. E. A. deVARENNES,
Inspector of Animals and Slaughtering.

REPORT OF PHYSICIAN FOR VENEREAL DISEASES

JANUARY 1, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR DR. FITZGERALD:—I have record of the following work done in clinic at the Dispensary during the past year:

Number of patients	31
Number of visits to clinic	280
Injections mercury	108
Injections sulpharsphenamine	131
Wasserman tests	26
Treatment for gonorrhoea	13

Yours truly,

EDWIN E. SMITH, M.D.

REPORT OF BACTERIOLOGIST

JANUARY 1, 1928.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR DR. FITZGERALD:—The total number of samples of milk submitted for examination during the year was 1,456; 720 for bacteriological examination and 736 for chemical tests.

There were in addition, 10 samples of cream and 24 samples of ice cream sent in for examination.

Yours truly,

EDWIN E. SMITH, M.D.

REPORT OF BOARD OF MANAGERS

*To His Honor the Mayor and the
President and Members of the City Council:*

GENTLEMEN:—The Board of Managers of the Hospital Department respectfully submits its report for the year ending December 31st, 1927.

The new Nurses Home was finished in May, and has been of great benefit to the hospital.

The use of our X-Ray Department is increasing very rapidly, and now shows a substantial profit to the hospital.

We gratefully acknowledge your hearty cooperation, the generous contributions and the active and helpful interest of the hospital aid associations, the churches and other organizations of the city, and the many words of appreciation and suggestions from our patients and friends.

The financial statement of the operations of the past year, together with the report of the Superintendent, are annexed hereto.

CHARLES A. PRICE, *Chairman*
MAURICE P. SPILLANE, *Secretary*
GEORGE TAYLOR
JOHN O. GOLBRANSON
ERNEST B. NEAL.

REPORT OF SUPERINTENDENT

To the Board of Managers, Quincy City Hospital.

CONCLUSION

Early on the morning of Oct. 4th, Patrolman John J. Fitzgerald discovered a man working on the safe in Pill Bros. store on Hancock Street. Reserve Officer Alfred N. Hollis came along shortly after this and was directed by Fitzgerald to watch the back of the store, with instructions to be careful as there was a man in the store. Hollis went through the alley toward the rear of the store and within a very short time Fitzgerald heard two shots, which sounded from the direction of Revere Road. Fitzgerald ran down Revere Road to Mechanic Street, but saw no one, so went in behind Pill Bros., where he found Hollis lying dead on the platform near the back door.

Reserve Officer Hollis was a faithful and efficient officer and died in the discharge of his duty of protecting lives and property.

The work of Patrolman Fitzgerald, in discovering and attempting to trap the burglars in the building, was commendable and worthy of much praise.

The office of the Quincy Motor Co. was entered and the safe smashed and contents taken the same night and undoubtedly by the same ones who entered Pill Bros. and murdered Officer Hollis.

The members of this department, assisted by the State police, have worked long and earnestly to discover the murderer, but have been unable so far to apprehend the guilty party.

As is usual following a sensational crime, there was an epidemic of small breaks in different sections of the city. These breaks were cleared up shortly after by the arrest and confessions of several juvenile offenders, who were brought before the Court and dealt with there.

With the exception of these breaks, which unfortunately cost the life of a Police Officer, and those smaller offences committed by boys, the city has been remarkably free of crime during the past year. In my opinion this has been due to the watchfulness of the Police, and I take this opportunity to thank every member of the Department for his good conduct and devotion to duty, which has been oftentimes rendered under the most trying circumstances.

The signal system has been improved by the addition of a cable on Adams Street from Hancock to Beale Street. This cable was installed jointly by the Fire and Police Departments and contains wires for both departments.

The Hancock Street cable, which was in poor condition, has been repaired and some of it replaced with new. Considerable old and worn-out wire in the overhead circuits has also been replaced with new.

The flashlights have proved to be a great aid to the Department and I hope to add more lights in the coming year.

The automatic traffic signals, which were installed on Hancock Street, are giving very general satisfaction, and three officers have been relieved from traffic posts and assigned to other duties.

These signals are now being installed at East Squantum and Atlantic Streets, Franklin and Water Streets, Newport Avenue and Furnace Brook Parkway, Hancock and Granite Streets, Hancock and School Streets, and at the important intersections along the southern artery.

If these signals work out as well at these points as the ones already installed on Hancock Street, it will be possible to abolish two more fixed traffic posts and use the officers for other duty.

An additional night route was established in November to give better protection to the business district. This route necessitates the employment of two Reserve Officers, but I expect when the new traffic lights are in operation that it can be taken care of by the regular force.

There has recently been perfected and put on the market a device which enables direct secret communication to be had between one Police Department and all others which are equipped with this apparatus.

This instrument is leased and maintained by the Telephone Company, and will transmit typewritten messages from one point to any other that is connected with it.

The City of Boston has put these instruments in all its Police Stations, and other cities and towns are considering their installation. I believe it will be only a short time before many of the Police Departments are equipped with this device, and I strongly recommend that this department be provided with it.

In conclusion I wish to express my appreciation to His Honor, Mayor McGrath, and the Honorable City Council, for the very generous way in which they have assisted me in promoting the efficiency of the Department.

I also wish to thank the City Auditor and his staff for the interest they have shown in the welfare of the Department and the many courtesies they have extended to me.

I also feel deeply grateful to the Justices, Clerks, Probation Officers and Court Officers of the District Court of East Norfolk and to the District Attorney and his assistants, for the courtesy and consideration shown to the Department during the year.

Respectfully submitted,

ERNEST H. BISHOP,
Chief of Police.

REPORT OF FIRE DEPARTMENT

QUINCY, MASS., JANUARY 14, 1928.

HON. THOMAS J. McGRATH, *Mayor, City of Quincy.*

DEAR SIR:—I respectfully submit the annual report of the Fire Department for the year ending December 31, 1927.

Personnel of Department

Chief of Department, Alfred L. Mead.

Assistant Engineers, Louis K. Badger, Frank C. Packard, Albert E. Stephenson.

Alarm Department Personnel

Gavin, William A., Supt. of Fire Alarm.
 Smith, Thomas, Lineman.
 Leonard, George, Lineman.

APPARATUS

Central Station

One Seagrave pumping engine.
 One Seagrave ladder truck.
 One LaFrance combination.
 One White combination (reserve).
 One Buick chief's car.

Atlantic Station

One Seagrave pumping engine.
 One Seagrave ladder truck.

Quincy Point Station

One White pumping engine.

Wollaston Station

One Seagrave pumping engine.
 One Seagrave ladder truck.

West Quincy Station

One White pumping engine.
One White ladder truck.

Houghs Neck Station

One White pumping engine.
One White ladder truck.

Fire Alarm Department

One Dodge truck.

FIRE ALARMS

During the year there were 660 alarms.

Bell alarms, 162.

Still and telephone, 498.

False alarms, 29.

The Central Station responded to 333 alarms, 158 bell, 64 still or telephone.

The Wollaston Station responded to 226 alarms, 81 bell, 145 still or telephone.

The Atlantic Station responded to 180 alarms, 40 bell, 140 still or telephone.

The Quincy Point Station responded to 99 alarms, 38 bell, 61 still or telephone.

The West Quincy Station responded to 141 alarms, 53 bell, 88 still or telephone.

The Houghs Neck Station responded to 63 alarms, 12 bell, 51 still or telephone.

The total number of feet of hose laid was.....	71,300
Central Station laid	31,550
Wollaston Station laid	9,200
Atlantic Station laid	10,900
Quincy Point Station laid	7,250
West Quincy Station laid.....	8,650
Houghs Neck Station laid	3,750
Number of feet of ladders raised	4,183
Number of gallons of chemicals used	4,750
Number of hours absent from quarters	617
Number of hours engines worked	71½
Number of inspections made	27,390
Number of drills (hours)	460

VALUATIONS, INSURANCE AND LOSSES

Value of property involved	\$2,280,974 00
Insurance on same	1,862,975 00
Loss insured and uninsured	134,841 00

Fire Losses for the Year of 1927

Month	Buildings	Contents	Losses
January	\$4,796 00	\$3,339 00	\$8,135 00
February	6,960 00	5,162 00	12,122 00
March	3,590 00	2,323 00	5,913 00
April	12,065 00	11,189 00	23,254 00
May	4,496 00	9,738 00	14,234 00
June	498 00	498 00
July	1,630 00	2,240 00	3,870 00
August	12,643 00	3,183 00	15,826 00
September	1,235 00	1,660 00	2,895 00
October	3,411 00	1,672 00	5,083 00
November	18,923 00	12,432 00	31,355 00
December	6,502 00	5,154 00	11,656 00
	\$76,749 00	\$58,092 00	\$134,841 00

The fire losses for the past year are about \$30,000.00 less than in 1926. There have been ten men added to the department and a new station opened. Quincy seems to be growing every year, building increasing as well as the population; every new building adds another fire hazard. Many fires that we have should never occur. Now, for example, we have too many cellar fires in dwellings, caused by the accumulation of litter and rubbish which should not exist. It is impossible to have men in this department inspect the cellars of all the houses in the city, and I advise the occupants of dwellings to keep their places free from all rubbish.

Chimney fires are too numerous. Owners should pay more attention to the chimney. Children cause a lot of fires through the negligence of their parents. If all house owners and occupants would cooperate with this department it would seem to me that fires and fire losses would be decreased to a great extent.

During the year, while we have had a great number of fires, five of this number caused over one-third of the total loss of the year. While I appreciate the fact that replacement values are the causes which make the losses much larger than years ago, yet in my mind it seems that some adjustments that are made are too much, thus bringing the fire losses up and keeping the insurance rates up. Very often the insurance companies salvage goods, but the fire departments are never given credit for any salvaged goods which they are entitled to. If this was done fire losses would be much smaller in a good many cases.

In the Fire Alarm Department we have put up 826 new cross arms and strung 35.8 miles of wire. New underground cable has been pulled in ducts, amounting to 8,750 feet with suitable testing boxes. Four new boxes have been installed and five obsolete boxes have been replaced by new boxes. Five boxes have been equipped with added attachments to communicate with inside alarm systems in school houses. The total number of box tests for the year

were 2,500. There has been 100 cells of battery replaced. Battery tests 300 Mil. Amperes, readings 950, voltage readings 950. Two siren horns to replace gongs on streets have been installed, also one at Doble's Corner.

Some of the recommendations of the National Board of Underwriters should be complied with at an early date.

In Conclusion

To His Honor, the Mayor, and City Council I wish to extend my sincere thanks for their cooperation during the past year, and also to the officers and members of the department for their prompt and efficient manner in which they have performed their duties.

Very respectfully,

ALFRED L. MEAD,
Chief of Department.

REPORT OF INSPECTOR OF BUILDINGS

JANUARY 1, 1928.

HON. THOMAS J. McGRATH, *Mayor, Quincy, Mass.*

DEAR SIR:—I herewith submit the twenty-first annual report of the Building Department for the year ending December 31st, 1927.

The City of Quincy has had a remarkable growth during the past 10 years, and the year 1927 has kept pace with those years.

The prospects for the coming year look favorable for a further continuance of home building and apartment houses.

A general revision and enlargement of the Building Code was passed by the City Council and signed by His Honor the Mayor early in May of this year and became effective on June first. This revision has proved, thus far, to be very satisfactory to the citizens, and the builders have cooperated willingly in the carrying out of these requirements.

The number of housekeeping units erected the past year was 907, in which number are included 490 single family houses, the remainder being in multiple and apartment houses, three of the latter having been erected in the year 1927. Twenty-eight mercantile buildings were constructed during the year, this being a decrease of fifty per cent below the record of 1926. Fourteen manufacturing buildings, mostly of small capacity, were erected. These last two classifications, which in my opinion are of vast importance to the welfare of our city, are not keeping pace with the building of homes. It behooves us to devise some means of encouraging industries and business to locate here. If we fail to accomplish this, I fear that our homes will be forced to provide the revenue to pay the ever-increasing municipal expenses.

TABULATIONS OF BUILDING OPERATIONS FOR 1927

Ward 1

Permits	Estimated Cost
91 One family dwellings.....	\$454,250 00
6 Two family dwellings.....	43,000 00

SEWER DEPARTMENT

MR. FREDERICK E. TUPPER, *Commissioner of Public Works, Quincy, Mass.*

DEAR SIR:—I herewith submit a tabular description of the work done by the Sewer Division during the year ending December 31, 1927. Five and one hundred fourteen hundredths miles of pipe sewers were laid during the year in sizes from 8 inch to 15 inch, making a total of 113.0 miles of sewers to date.

The construction of surface and storm drains for the year 1927 was done under the supervision of the Sewer Division, and the list of such drains will be found in the report of the City Engineer.

For the financial statement see the Auditor's Report.

The number of house connections made to buildings for the year were 524 in wards as follows:

Ward 1.....	121	Ward 4.....	90
Ward 2.....	72	Ward 5.....	110
Ward 3.....	45	Ward 6.....	86

The total number of feet laid, 24,001.6 at a cost of \$24,577.24, thus making the average cost per foot \$1.023.

Average length per connection.....	45.80 feet
Average cost per connection.....	\$46.90

Buildings as follows:

Single houses	335	Schools	4
Two-family houses	106	Churches	4
Three-family houses	3	Halls	2
Four-apartment and over houses	44	Manufacturing	1
Blocks, apartments and stores	10	Mercantile	9
		Gas stations	6

WALTER S. McKENZIE,
General Foreman.

WILLIAM L. FOSTER,
Treasurer.

Hingham, December 31, 1927.

(Unpaid bills amounting to \$1,204.04 carried over to be paid in 1928.)

Trustees of Weymouth Fore River Bridge,

GENTLEMEN:—I have examined the accounts of William L. Foster, treasurer of the Trustees of Weymouth Fore River Bridge, for the year 1927, reconciled the bank account, and I hereby certify that the same are correct with proper vouchers.

(Signed) J. IRVING BOTTING,
Town Accountant.

Hingham, January 16, 1928.

REPORT OF CITY PLANNING BOARD

To His Honor the Mayor and Members of the City Council.

GENTLEMEN:—We are prepared to report at this time that a comprehensive city plan upon a scale of 700 feet to the inch has been prepared, covering recommendations of the past years and is available for reference.

Upon it will be found the various studies which we have urgently suggested adoption of in previous reports.

The center section comprising an area within a radius of one mile from City Hall is enclosed herewith.

The possibilities of more direct thoroughfares to the west are being studied and skirting the rock bound ridge of Pine Hill at its extreme north and south terminals.

Acquiring of the so-called Stratton lot at Atlantic for a recreation ground is recommended, providing the Hall playground can be taken over possibly for school purposes and the playground at Atlantic Station retained for the use of children or for a preserved open space at a reasonable distance from existing streets.

By the tabulation following it will be noted that a total of 250,000 persons use the very narrow and dangerous footway between the Quincy station and Granite street during the year. With the increased population west of the tracks we advise that the possibility of two double turnstiles for outbound passengers be taken up with the railroad, pending the putting in of its required subway under the tracks near the depot.

The Board has considered several possible sites for a new City Hall location and admits that from all points of view and the requirements of accessibility and civic grouping it is not prepared at this time to definitely make favorable report.

For the foot traffic tabulation we are indebted to the garage attendants at Granite street and to representatives of the N. Y., N. H. & H. R. R., who made the twenty-four hour count possible.

Tables of the origin and destination investigation were very carefully prepared by an expert.

Cooperation of the Quincy Chamber of Commerce the past year has been very helpful and our membership upon the City Traffic Committee we hope has been of useful aid.

Respectfully submitted,

CITY PLANNING BOARD,

WILSON MARSH, *Chairman*,
JAMES E. W. GEARY, *Vice Chairman*,
THEO. J. CRAIG,
WILLIAM CHAPMAN,
JAMES J. MCPHILLIPS.

PATRICK F. O'BRIEN, *Clerk*.

Traffic Count

Location, Quincy—Hancock street, north of Washington street.
 Direction, north bound.
 Date, August 1, 1927.

Time	No.	Remarks
8.00 A. M.-6.00 P. M.	7919	12.00-1.30 P. M. Out

Location, Quincy—Hancock street, north of Washington street.
 Direction, south bound.
 Date, August 2, 1927.

Time	No.	Remarks
8.00 A. M.-6.00 P. M.	7436	12.00-1.30 P. M. Out

Location, Quincy—Washington street, near Weymouth Line at Fore River.
 Direction, both.
 Date, August 3, 1927.

Time	No.	Remarks
8.00 A. M.-6.00 P. M.	8453	12.00-1.30 P. M. Out

Location, Quincy—School street, west of Quincy avenue and Hancock street.
 Direction, both.
 Date, August 4, 1927.

Time	No.	Remarks
8.00 A. M.-6.00 P. M.	4321	12.00-1.30 P. M. Out

Traffic Survey

Footpath Quincy Station to Granite Street
 City Planning Board, May 3, 1927

7-10 A. M.	255
10- 4 P. M.	139
4- 7 P. M.	242
7- 7 A. M. 4th	96
Total	<u>732</u>

The high point in the traffic count was reached at Hancock street between 8.00 and 8.30 in the morning. when the total registered 1,063 cars or 32 per minute.

Washington street tabulation traffic in both directions showed between 4.30 and 5.00 P. M. a total of 770 cars or about one car a second.

At the Fore River bridge on Washington street when the bridge was open for five minutes 117 cars were held up. Again during the opening of the drawbridge for ten minutes 318 cars were held up.

A comparison of the Hancock street traffic which would make a total of 28,800 for sixteen hours is interesting as compared with the Planning Board record of June 5, 1926, of 23,305 for the same period of time.

On Washington street a total of 15,912 upon the above count is to be compared with the Planning Board report of 1926 counting 9,749 cars.

BOARD OF SURVEY

JANUARY 1, 1928.

To His Honor, the Mayor and Members of the City Council:

GENTLEMEN:—The members of the Board of Survey respectfully submit herewith its thirteenth annual report for the year ending December 31, 1927.

The Board organized on March 3, 1927, and re-elected Mr. William G. Shaw as Chairman for the ensuing year.

On March 18th the Board gave a hearing on the petition of John J. McFadden for the acceptance of a street or way northerly from Adams Street, near Greenwood Avenue, and the following letter to Mr. McFadden will give the action taken by the Board:

Mr. John J. McFadden, 19 Hodges Avenue, Quincy, Mass.

DEAR SIR:—The Board of Survey considered your plan for a proposed street from Adams Street and 200 feet from the easterly line of Greenwood Avenue and they thought they could not accept the street as shown on plan, and would suggest that your plan and a plan of the land just easterly be worked out together to the advantage of both owners and that the Board would reserve its decision until such time as that could be done.

Please let the Board know what you think of this suggestion.

Yours respectfully,

PATRICK F. O'BRIEN,
Clerk of the Board.

On March 18th the Board gave a hearing on petition of Brown and Stackpole for the acceptance of the following streets at "Quincy Shores," off Palmer Street at "Germantown."

Doane Street	682 feet long, 40 feet wide
Shedd Street	1,340 feet long, 40 feet wide
Sargent Street	660 feet long, 40 feet wide
Hodgkinson Street	1,081 feet long, 40 feet wide
Howe Street	1,015 feet long, 40 feet wide

The plans were explained by Mr. Stackpole and as the layout was made in accordance with the requirements of the Board, the layout was accepted.

On March 18th the Board gave a hearing on the petition of Fred B. Rice for the acceptance of the following streets on the northerly side of the Furnace Brook Parkway and westerly from Newport Avenue.

Emmons Road	670 feet long, 40 feet wide
Lillian Road	300 feet long, 40 feet wide

The plans were explained by W. S. Carson, Civil Engineer, for Mr. Rice, and as they conformed to the requirements of the Board of Survey the layout was accepted.

On March 18th the Board gave final approval to the following streets as petitioned for in 1925 by the Wollaston Land and Construction Company:

Norfolk Street	520 feet long, 40 feet wide
Albany Street	520 feet long, 40 feet wide
Sherman Street	880 feet long, 40 feet wide
Granger Street	300 feet long, 40 feet wide
Milton Street	280 feet long, 40 feet wide
Chatham Street	880 feet long, 40 feet wide
Pine Street	520 feet long, 50 feet wide
Wilson Avenue	940 feet long, 50 feet wide
Exeter Street	300 feet long, 40 feet wide
Harvard Street	1,070 feet long, 50 feet wide
Elmwood Avenue	960 feet long, 40 feet wide

The approval of the following streets was laid over until recommendations by the Board were carried out:

- Part of Exeter Street, drainage.
- Part of Pine Street, grading.
- Part of Sherman Street, grading.
- Piermont Street, stone bounds.
- Granger Street, stone bounds.

Part of Harvard Street and Wilson Avenue, until settlement is reached between the Citizens Gas Company and the Wollaston Land and Construction Company as to expense of lowering gas pipe where grade was changed.

On October 14th the Board gave a hearing on the petition of Madeline A. Saulnier for the acceptance of Sunnyside Road extension to the Milton Town Line, a distance of about 280 feet. The Board voted to accept the layout when stone bounds were set.

On October 14th the Board gave a hearing on the petition of James D. Fay for the acceptance of Fay Street extension to the Milton Town Line. The plan was explained by George D. McKay, Civil Engineer, and the Board instructed the Clerk to communicate with the Town Engineer of Milton to see if a petition for a layout in Milton was applied for and what action the Board of Survey of Milton had taken. The Town Engineer said that no petition was received and also that the Board of Survey of Milton did not approve any street less than 50 feet in width.

On October 14th the Board gave a hearing on the petition of C. C. Pope for the acceptance of Bay State Road on the northerly side of Metropolitan Parkway in the Atlantic section. After viewing the plan the Board accepted the layout as all requirements of the Board were complied with.

December 2nd the Board gave a hearing on the petition of Henry M. Faxon for the acceptance of the following streets in South Quincy near the junction of Quincy Avenue and Water Street:

Hyde Street	800 feet long, 40 feet wide
Hardwick Street	1,120 feet long, 40 feet wide
Stanley Street	300 feet long, 40 feet wide
Blanchard Street	200 feet long, 40 feet wide
Faxon Lane	1,500 feet long, 40 feet wide

Dyer Terrace	200 feet long, 40 feet wide
Mortimer Terrace	240 feet long, 40 feet wide

It was voted to give the layout a tentative acceptance until the finished plans and profiles were furnished.

December 9th the Board gave a hearing on the petition of Silia Linden for the layout of the following streets at South Quincy north of Water Street:

Brook Road extension	1,245 feet, 50 feet wide
Payson Street	210 feet, 40 feet wide
Booth Street	385 feet, 40 feet wide

It was voted to give the plan a tentative approval until the finished plans were received.

On December 9th the Board gave a hearing to the Wollaston Land and Construction Company on the streets which were held up until recommendations by the Board were carried out.

Granger Street, plan approved.

Washington Street, plan approved.

Milton Street, plan approved.

Piermont Street, plan approved.

Elmwood Street, plan approved.

Exeter Street, plan approved, more grading required.

Pine Street, plan approved, more grading required.

Respectfully submitted,

WILLIAM G. SHAW, *Chairman*,
GEORGE H. NEWCOMB,
WILLIAM A. CRESSWELL,

Board of Survey.

PATRICK F. O'BRIEN, *Clerk.*

REPORT OF CITY SOLICITOR

JANUARY 1, 1928.

HON. THOMAS J. McGRATH, *Mayor of City of Quincy.*

DEAR SIR:—During the year the City Solicitor has appeared in all cases in which the city was interested. In addition to these duties I have prepared all legal papers on behalf of the city departments and have given opinions whenever requested.

I have been present at all meetings of the Council and have advised that body on all legal points raised by it.

Respectfully submitted,

J. J. McANARNEY,
City Solicitor.

REPORT OF ENGINEERING DEPARTMENT

JANUARY 1, 1928.

To His Honor, the Mayor and Members of the City Council:

DEAR SIRs:—I herewith respectfully submit the twenty-eighth annual report of the Engineering Department for the year ending December 31, 1927.

Lines and grades were given on about 120 streets as requested by property owners and builders.

Assessors' Plans

During the year approximately 4,650 real estate transfers were issued and 1,400 permits for new buildings, all of which had to be correctly placed on the Assessors' Plans.

New Streets 1927

An unusually large number of streets were accepted during the year. Public hearings were held on 95 streets and 58 were accepted as public streets.

The Public Works Department built 30 streets at an expense of \$160,000, which gave employment to a large number of men.

The Public Works Department not being equipped to build all the streets accepted, it was decided to build some of them by contract. Bids were received and contract awarded to Coleman Bros. of Boston, the lowest bidder.

Nineteen streets were let out by contract and were finished before the end of the year, except three, Milton Road, Sharon Road, and part of Edwin Street, which were built on marsh land, and the macadam surface will not be put on until the filling has had time to settle.

The total miles of streets built in 1927 is six miles.

See schedule of new streets.

Streets Rebuilt 1927

There was a total of 4.18 miles of city streets rebuilt during the year.

For itemized list see schedule.

Sewer

Lines and grades were given on 5.12 miles of sewers which were built during the year. This work required the services of one party (three men) the entire year.

For schedule see report of Commissioner of Public Works.

Drains

The drainage question is an important one and the cause of complaints after storms at all seasons of the year.

The Highway Department built the drains in the streets that they constructed and the contractors built the drains included in their contract.

The drainage of the Montclair swamp, so called, was let out by contract to A. G. Tomasello & Sons, Inc., the lowest bidder.

A 36-inch concrete pipe was laid from Wilson Avenue, through Taylor Street, Hobart Street to Beumont Street to the edge of the swamp.

An open ditch for a length of 1,200 feet was built through the swamp, which will lower the water level in the swamp about 6 feet.

The drainage of Milton Road, Sharon Road and Edwin Street required piling foundation, the location being through a salt marsh.

The last installment of the 24-inch drain in Faxon Field was placed, which required a piling foundation. The surface drainage of the field will lead to the manholes connected with this drain, and the water be carried off to the Town River Bay.

See schedule of drains built.

Granolithic Sidewalks 1927

Bids were received for the construction of granolithic sidewalks and the contract was awarded to Michael E. Shay & Company. Work was started in July and continued to December 1, 1927.

Walks were built on 57 streets, a length of 24,217 feet.

See schedule of granolithic walks.

Amiesite Sidewalks

Amiesite sidewalks were built on 6,120 feet of sidewalks.

For itemized list see schedule.

Elimination of Grade Crossings

Another chapter on the question of the elimination of grade crossings on the N. Y., N. H. & H. R. R. Co. has been enacted. The Superior Court has been applied to, asking the railroad company to show cause why the decree of the court, ordering the elimination of the grade crossings, should not be carried out.

Hearings were held in Boston, and the question was referred to the Court at Dedham, and at present no decision has been reached.

Zoning

During the year 1927 the Quincy Chamber of Commerce took up the question of zoning, and by inviting the public, by notice in the local press, to express their views on the question, a new plan was made which was submitted to the Mayor and City Council, who will take the matter up again and try to adopt a Zoning Ordinance that will be satisfactory.

For financial statement see Auditor's report.

Respectfully submitted,

PATRICK F. O'BRIEN, *City Engineer.*

REPORT OF THE MANAGER OF PUBLIC BURIAL PLACES

JANUARY 1, 1928.

HON. THOMAS J. MCGRATH, *Mayor, Quincy, Mass.*

DEAR SIR:—The Manager of Public Burial Places respectfully presents the following financial report for the year ending December 31, 1927:

Expenditures

Manager's salary	\$ 2,400 00
Superintendent's salary	2,200 00
Clerk's salary	650 00
Cemetery—labor	18,061 25
Cemetery—supplies	1,242 55
Telephone	72 31
Office—supplies	116 41
Truck upkeep	499 62
Miscellaneous	97 00

\$25,339 14

Receipts

Care of lots	\$ 3,710 00
Sale of lots	8,195 00
Sale of single graves	1,905 00
Interments	6,327 00
Foundations & grading	2,163 43
Perpetual care fund—interest.....	4,139 54
Other trust funds—interest	165 79

\$26,605 76

	Appropriation	Expended
Grading—Mt. Wollaston Cemetery.....	\$2,500 00	\$2,497 50
Care—Hancock Cemetery.....	500 00	500 00

During the year ending December 31, 1927, there were 455 burials in Mount Wollaston Cemetery.

The sum of \$11,190.00 was added to the Perpetual Care Fund, a detailed statement of the investment will be found in the City Treasurer's report.

Respectfully submitted,

WELLINGTON W. MITCHELL,
Manager of Public Burial Places.

REPORT OF SEALER OF WEIGHTS AND MEASURES

QUINCY, MASS., JAN. 1, 1928.

HON. THOMAS J. McGRATH, *Mayor of City of Quincy.*

SIR:—Respectfully submit the annual report of the Sealer of Weights and Measures for the year ending December 31, 1927.

During the year 1250 places of business have been visited by the Sealer and Deputy and the work of sealing performed. The largest sum \$918.13 ever collected for this work has been collected and turned into the treasury.

There has been a great increase in the number of gasoline pumps installed in this city the total being 323. The sealing and testing of these pumps require a great amount of time and sometimes many calls, but no fees are charged after the annual sealing.

Cities and towns are allowed to issue licenses for the sale of fish, fruit and vegetables to hawkers and pedlars, but for no other commodities.

We have issued 114 licenses, fees for which amount to the sum of \$570. Hawkers' and pedlars' licenses for the sale of other commodities are issued by the State, Division of Standards, for which the fee is \$52.00. If the said license is issued to be used in the City of Quincy only, \$25.00 is paid to the City by the State, from the \$27.00 required for such license.

The Sealer and Deputy have been active in enforcing this law, and the resulting fees will be turned into the City Treasury from the State.

Following will be found the summary of work done by the department.

Respectfully submitted,

JAMES M. CANTFILL,
Sealer of Weights and Measures.

Being cared for in private hospitals.....	1
Adults in state hospital	8
Persons buried during the year 1927.....	6

I wish to especially mention a few of the many changes and improvements made by this department during the year just closed.

Many of the rooms at the City Infirmary were in deplorable condition. These rooms were refinished, being painted, floors refinished and new floor coverings in the dining room, sitting room and living room. All the work was done by the inmates with exception of the papering. The reception room on the first floor was without furniture. This room was furnished with a three piece set, table and rug for the floor. Curtain materials were bought and Mrs. Vaughn made the curtains. Five new beds, mattresses and springs were bought and all the old beds refinished and enameled.

Through the kindness of Miss Laura Hayward, an upright piano was installed in the women's sitting room on the second floor.

During the summer the inmates worked a very successful garden which supplied all the fresh vegetables needed for the table at the home. Mrs. Vaughn also had over two hundred jars canned for winter use.

At this time I wish to call attention to the fact that we have ten more inmates at the City Infirmary than we had the first of last year. The present infirmary was built over forty years ago, and at the present time the institution is very inadequate for our present needs. We have no way of caring for chronic cases. Heretofore we have been able to place them in state institutions, such as Bridgewater and Tewksbury, but now they are refusing us admittance in these places, on account of them being overcrowded with state cases, so we are obliged at the present time to board a few cases out at the expense of from \$12.00 to \$15.00 a week, and in one or two hospital cases, which are being cared for in other cities, as high as \$4.00 a day.

I would recommend that provisions be made to build an addition to our present building or a new building in another location, that would not be so near Quincy Square.

Many perplexing situations have arisen and I have tried at all times to be fair in my decisions after hearing both sides of the case.

At this time I wish to express my appreciation to the following for their hearty cooperation and kind assistance during the past year: Miss Waddell and her assistants, Chief Probation Officer Fahey and his assistants, Dr. Richard Ash, Mr. and Mrs. Vaughn, who have so ably performed their duties at the City Infirmary, Mrs. Mary Wall, secretary of the Welfare Office, and all others in authority.

Respectfully submitted,

CHANNING T. FURNALD,
Commissioner of Public Welfare.

ANNUAL REPORT OF THE PARK DEPARTMENT

QUINCY, MASS., JANUARY 14, 1928.

To His Honor Thomas J. McGrath, Mayor:

The following is the report of the Park Commission for the year 1927, the membership of which is composed of the following: Yrjo M. Matson, Thomas J. Larkin and Loretto D. Tocci, your appointees. The first above-named was elected chairman and secretary of the Board.

Merrymount Park

This is the largest and most used of our parks as is very apparent from the number of permits issued for the various athletic and other functions conducted therein.

For Merrymount Upper Field one hundred and seventy permits were granted for baseball, four for football, and fifteen for soccer. For Merrymount Lower Field sixty-one permits were issued for baseball, ten for soccer. For Merrymount Third Field seven permits were issued for baseball, and twelve for picnics. Two picnics were held on Pine Island.

Band Stand

Ten band concerts were held in the Merrymount Band Stand by the Quincy Kiwanis Club.

Tennis Courts

At the Merrymount tennis courts, four thousand eight hundred and forty-eight persons signed up for tennis games during the season. The use of the courts was restricted to one hour per person, from the hours of 7 A. M. to 8 P. M. However, many persons used the courts early from sunrise to 7 A. M., it being unnecessary to mark up for games played prior to 7 A. M. In addition to the foregoing use of the Merrymount tennis courts, the same were used by the High School girls under the direction of the dean, Miss Josephine D. Baker, during the months of May, June, and September and October on Monday, Wednesday and Friday afternoons of each week from two to five o'clock. A self-explanatory letter from Miss Baker is incorporated herewith, viz.:

"November 4, 1927.

"Mr. Y. M. Matson, Park Commissioner,
City of Quincy, Massachusetts.

"Dear Mr. Matson:

"On September 23, 1927, you granted me a permit for the High School girls to use the Merrymount Court and the South Quincy

Court on Mondays, Wednesdays and Fridays. Since that time by managing hour relays from three to five we have had twenty-four girls on the Merrymount Courts on each of the three days and ten girls on Mondays and Wednesdays on the South Quincy Court. On most of those days High School teachers instructed the girls in the game. In all, we taught ninety-two girls tennis once a week. Really, with our 'extras' we had more than that.

"Even now, when the tennis season is closing, I want to keep the Merrymount Courts on Mondays and the South Quincy Courts on Wednesdays for a few more weeks. The other days we will no longer hold.

"By next year may we have better nets? And is it too much to hope that we may have courts—many of them—in the field near the school? We could accomplish so much more.

"Thank you for your cooperation.

"Yours truly,

"JOSEPHINE BAKER."

Adams Memorial

On April 19th, the Adams Memorial was dedicated at Merrymount Park with His Honor the Mayor in charge of the exercises, an address being given by His Excellency the Governor, Alvan T. Fuller.

Merrymount Oval

As in years passed the great American gridiron classic game of football was played on the Oval, thirty-eight permits being issued therefor. Four games of soccer were also played on this field. The events occurring on this field have drawn large attendances of spectators. It was estimated that on Children's Day, held under the direction of the School Department, the attendance was five thousand. At the football game of Quincy High School vs. Jamaica, Long Island, High School, the attendance was estimated at thirty-five hundred. In spite of the rain, the attendance at the football games on Thanksgiving Day, between the Trojans and Atlantic football team, was also estimated at thirty-five hundred. During the football season the High School team also practised here nearly every afternoon. The High School track team also used this field considerably.

General

The work of filling the Fenno street corner of Merrymount Park was continued during such time as clean ashes were available. This work is not as yet completed.

The hollow in the rear of the Band Stand at Merrymount Park was cleaned and flooded for skating for little children.

Some work was also done toward securing a skating pond on Merrymount Park on the northerly side of the new southern artery. A good-sized skating pond will be available here for the public next winter. On account of the construction of the southern artery through Merrymount Park it was necessary to move the comfort station. This was done under the supervision of the Park

Department and it is expected that the commonwealth will reimburse the city for the expenses incurred.

Two floats were maintained at the so-called "Sandberg's Bath Tub" for the convenience of bathers.

Recommendations

Absolute necessity requires the immediate construction of a bath house at Merrymount Park.

At some future time a new bridge ought to be constructed from Merrymount Park to Pine Island, as the present one is not strong enough to withstand the flow and movement of ice caused by the rise and fall of the tide.

Faxon Field

The Park Department takes this opportunity for expressing its appreciation to our esteemed citizen, Henry M. Faxon, for his cooperation and generosity in spending thousands of dollars this year in grading and filling Faxon Field, thereby making it fit for use for football and soccer and for five regulation tennis courts to be ready next spring.

Permits for sixteen football games and six soccer games were issued for this field. In addition to this the High School team held many practice games.

The construction of tennis courts on this field, near the High School, cannot too strongly be urged.

Houghs Neck

A supervised playground was conducted here during the summer with an average daily attendance of sixty.

Mr. Joseph Reardon, assisted by Miss Mary Drohan, was in charge. The following permits were issued for this field: Baseball, thirty-four; football, one.

Complaints were received from residents living adjacent to the playground of windows being broken during baseball games. The department recommends the acquisition of additional land contiguous with the playground, or abandonment of the field and the purchase of another site.

Manet Lake

This pond was cleared of debris and weeds for skating and a hockey rink was built thereon. When the surface of the ice was good the average daily attendance at the pond was about seven hundred. Work should be done here next summer with the view of eradicating the cat-o'-nine-tails from the pond. There is also a small portion in the southeasterly corner of the pond, now privately owned, which should be acquired by the city.

Adams Shore

A pretty little circular park is located at Adams Shore, with a flagstaff in the center. The grass was kept well mowed throughout the season. Some dressing and fertilizer was spread thereon in the fall.

Maypole Park

On December 30, 1922, the Merrymount Company conveyed to the city of Quincy by deed a parcel of land situated on Samoset avenue and Ridgeway drive, subject to the following conditions:

"That said city of Quincy or its successors shall forever maintain the land hereby conveyed as a public park which shall remain open forever for the free use of all of the inhabitants of said city of Quincy, and shall be called 'Maypole Park' forever."

Ward Two

The playground equipment formerly located at the Washington School was transferred to the Ward Two playground on Mound street, the purpose being to centralize the Ward Two playground.

Heretofore part of the activities of the supervised playground were conducted at the Washington School yard and another part of the activities on the Ward Two playground. Miss Ethel Rear-don, assisted by Mr. Arnold Ganley, was in charge of this playground.

During the year the following permits were issued for this field, viz.: Baseball, forty-three; football, three; soccer, one.

Mound Street Bath House

This bath house was extensively repaired and painted. The bath house and Ward Two Playground were not as well patronized as their capacity will permit. This, undoubtedly, is due to the very poor condition of Mound street, which is the only means of ingress and egress.

Avalon Beach

The Government Beach Association gave to the city of Quincy one chute, one large float, two small floats, two sand boxes, and some benches "to keep and maintain as the property of the city of Quincy, for the benefit of its citizens. With this provision, that the property shall be kept and maintained at the Government Beach, Avalon avenue, Quincy Point, where it is now stationed." The Park Department accepted the above mentioned property and repaired the same forthwith. A canopy was built over one of the sand boxes. This is the most beautiful marine park within our city. The beach was intensely used for bathing purposes. On hot days the attendance ran as high as three thousand. The citizens of this section seem to take great pride in this beach, and the Government Beach Association held its annual water carnival, at which there was an attendance of approximately thirty-five hundred, and citizens from all sections of the city participated.

Some repair work was also done on the piers.

The Park Department recommends setting up a flag staff at a convenient place on the beach.

Whiton Park

This little park, surrounded by hedges and flowers, carpeted with beautiful green grass, and circled by a fine gravel walk extends to one a silent invitation to sit upon the benches placed under

the large shade trees, and it is very often accepted by the mothers and little children of the locality.

Elm Street Park

A supervised playground was conducted here for the children. Miss Eleanor A. Bruton, assisted by Miss Ethel E. Housula and Mr. Arnold Ganley, was in charge. The average daily attendance was three hundred and twenty-five.

Bradford Street Playground

A supervised playground was conducted here, Miss Lillian E. Hendry, assisted by Miss Margaret M. Donovan, being in charge. The average daily attendance was one hundred. A tennis court is located at this playground and instruction in tennis was given by the instructors daily. During the months of May and June, September and October the tennis court was reserved for the High School girls on Monday, Wednesday and Friday afternoons from two to five o'clock. Some trouble was experienced on this playground on account of boys pulling down the halyards from the flagstaff. The matter was reported to the police.

Another tennis court is recommended for this playground. A comfort station on this playground is an absolute necessity, and it should be constructed immediately.

Ward Three Playground

This is the most heavily patronized supervised playground in our city, the average daily attendance being about three hundred and fifty. Miss Esther M. Likander, assisted by Miss Margaret McDermott and Mr. John McGinty, was in charge.

Baseball, football and soccer were also played on this field and the following number of permits were issued, viz.: Baseball, one hundred eighteen; football, seven. Complaints of windows being broken in Mr. Morganti's greenhouse by ball players have been made to this department for a number of years. The only way to eliminate the cause of the complaints is to construct a very much higher backstop on the baseball diamond.

A tennis court and a comfort station are recommended for this playground, the latter being a dire necessity.

William T. Shea Park

A flag pole was set on this park and re-dedication exercises were held on Columbus Day. The exercises commenced with a flag raising by the Boy Scouts. Addresses were made by His Honor the Mayor, Hon. Edward J. Sandberg, and Councillor William P. Hughes. Yrjo M. Matson, chairman of the Park Commission, officiated at the exercises.

Ward Four Playground

This playground was very little used except for the supervised playground which was well attended, being in charge of Miss Mary L. Mullarkey, assisted by Mr. Joseph O'Brien.

A special appropriation of twenty-five hundred dollars was made for filling the swamp on the westerly end of the playground. The following permits were issued for this field: Baseball, thirty-two; football, none; soccer, none.

Another appropriation should be made for a surface of loam on the filled area.

A comfort station should be built immediately.

Eaton's Pond

Through the courtesy of Mr. Lawrence H. Abbott of the Granite City Ice Company this pond was available for skating during the winter, and the Park Department takes this opportunity to express its appreciation and thanks to Mr. Abbott and the Granite City Ice Company. When skating was good the average daily attendance was approximately five hundred.

Adams Street Plot

The grass and hedges on the plot at the junction of Adams street and Furnace Brook Parkway were kept trimmed, thereby improving the appearance of the entrance to our city.

Wollaston School

A supervised playground was conducted at the Wollaston School playground with an average daily attendance of eighty-five. Miss Anne Wegelius, assisted by Mr. Arnold Ganley, was in charge.

The activities at this field were somewhat limited because of the small area of the ground. A great deal of basketry work was done. Harry Smith, an attendant at this playground, was awarded the prize in basketry.

Safford Park

This beautiful park is shaded by large trees and is surrounded by hedges. The grass was kept mowed, the hedges trimmed and benches were set out for public use.

Massachusetts Field Playground

This playground is located near the Massachusetts Field School and a supervised playground was conducted thereon with an average daily attendance of forty-five. The activities of this playground were somewhat limited because the field is small. Miss Nattie was in charge here.

Atlantic Playground

A supervised playground was conducted here with an average daily attendance of two hundred and fifty. Mr. Stephen White, assisted by Miss Elizabeth McConarty, was in charge.

Many activities are conducted on this playground and the following permits were issued, viz.: Baseball, one hundred and twenty-nine; football, seven.

A joint celebration was conducted on this playground on July 4th by the Ward Six Patriotic Association and the Atlantic Athletic Association.

Soccer was also played on this field by the Grammar School children.

For many years this playground has been a source of complaints to the Park Department, because of windows being broken in houses and stores near by, by batted baseballs. The Park Department recommends the immediate taking of the so-called Stratton lot for playground purposes, and discontinuance of baseball games at the Atlantic Field as the only remedy for the complaints. The Stratton lot could also be flooded in the winter time for skating.

Squantum Playground

A newly equipped supervised playground was conducted here, Miss Muriel G. Harris, assisted by Wallace Sadlier, being in charge. The average daily attendance was forty-five. Other activities were conducted on this playground and the following permits were issued, viz.: Baseball, twenty-four; football, one. A celebration was held on the playground on the Fourth of July by the Squantum Improvement Association. It is planned to provide this playground with a skating rink for next winter.

Robert Burns Monument

This monument was thoroughly cleaned. The grass on the plot was kept mowed and small hedges planted.

School Street Plot

A well shaded triangular plot at the junction of School and Pleasant streets was kept in condition.

Warwick Park

Warwick Park was laid out, seeded, and a flag pole erected thereon.

Policing

No money was expended by the Park Department for policing.

Old Police Station

The old police station has been used as a storehouse by the Park Department.

Daily Program

The following was the daily program of the playgrounds:

Nine o'clock:

Flag raising and pledge of allegiance.

Arrange swings and see-saws.

Nine fifteen to one o'clock:

Playground games for smaller children.

Nine thirty:

Baseball for large boys.

Indoor baseball for small boys.

Folk dancing and playground games for girls.

Eleven o'clock:

Bean bag, ring toss, for small children; quoits for larger boys.

Weaving for girls.

One o'clock:

Baseball, indoor baseball, volley ball, slug ball, weaving for girls.
Three thirty:

Playground games for boys and girls.
Take down flag at sunset.

Annual Field Day

A well attended field day was held on September 2nd, with the following program, viz.:

One thirty P. M.:

1. Indoor baseball games (boys 12 years or under), Ward Six vs. Elm Street—Mr. White and Mr. Deane in charge.
2. Slug ball for girls—Picked teams.
3. Croquet match—Mr. Sadlier and Miss Harris in charge.

Two fifteen P. M.:

4. Dances—Miss McConarty in charge.
5. Quoits (one boy), bean bag (one boy and one girl, 12 or under), ring toss (one boy and one girl, 12 or under), Mr. O'Brien, Mr. Sadlier, Misses McConarty, Donovan and Drohan in charge.
6. Dances—Maenad's Revel (Mass. Field Playground)—Miss Nattie in charge.
7. Forty yard dash (girls), one entrant—Mr. Reardon, Misses Bruton and Likander in charge.
8. Fifty yard dash (boys), one entrant—Messrs. Ganley, Reardon, McGinty in charge.
9. Dances—Norwegian Mountain March—Bo-Peep (Adams)—Miss Hendry in charge.
10. Three-legged race (40 yards), one team, either boys or girls—Mr. White, Misses McDermott and Hendry in charge.
11. Dances—Farmers' Dance—Old Roger, Sailor's Horn Pipe (Ward 3)—Miss Likander in charge.
12. Dances—Butterflies, Houghs Neck Playground—Miss Drohan in charge.
13. Sack race, forty yards, one entrant—Mr. Ganley, Misses Mullarkey and Nattie in charge.
14. Dances—Indian—Highland Fling (Elm Street)—Miss Bruton in charge.
15. Wheelbarrow race (10 boys and girls), 10 yards—Mr. Deane, Mr. White and Miss Reardon in charge.
16. Dances—German Circle—Hickery Dickery Dock—Crested Hen (Ward Four Playground)—Miss Mullarkey in charge.
17. Relay race (25 yards, 10 boys and 10 girls—Mr. Reardon, Mr. O'Brien, Misses Drohan, Hendry in charge.
18. Dances—Dances of Nations (Ward Two)—Miss Reardon in charge.

"Star Spangled Banner"

The foregoing programs compare favorably with those of other cities. The playground supervisor and instructors are very efficient.

Faxon Park

Most of the year's appropriation for trees was spent at Faxon Park, the work being done under the direction of the city forester, Andrew Stewart. The Park Department also cleared a large area of underbrush. The park commands a large and magnificent view of the entire city and the waterfront. The public should specially hie themselves hither and observe the panorama.

The construction of Faxon Park road, the only approach to the park, cannot be too strongly urged. A few picnics were held in this park during the past summer.

Boy Scouts

During the year the Boy Scouts of America have rendered the patriotic services of raising the flags on all playgrounds and parks on holidays. The Park Department at this time thanks the Boy Scouts of America for the services rendered.

General Recommendations

The Park Department recommends equipping new playgrounds at Montclair, Norfolk Downs, and the Government School at Quincy Point, and the acquisition of land for playground purposes on West street, West Quincy.

Playground Season

It is recommended that the supervised playgrounds be conducted after school commencing May first; all day sessions from July to Labor Day; after school hours from Labor Day to Thanksgiving. Many cities are now operating their playgrounds in this manner.

Expenditures

The expenditures for the Park Department in the past have been all out of proportion as compared with other cities in that they have been very small. Recreation is becoming a necessity, instead of a luxury, and it must be expected that future expenditures will be much greater. For expenditures for this year I respectfully invite your attention to the Auditor's report.

Respectfully submitted,

YRJO M. MATSON,
Chairman.

ANNUAL REPORT OF THE TRUSTEES OF THE THOMAS CRANE PUBLIC LIBRARY

FOR THE YEAR ENDING DECEMBER 31, 1927.

REPORT OF THE TRUSTEES

To His Honor, the Mayor of the City of Quincy:

The fifty-seventh annual report of the Trustees of the Thomas Crane Public Library is submitted herewith.

During the year 1927 the use of the facilities of the library increased in a gratifying manner, the circulation being well over the half million mark. This indicates the widespread interest of our citizens in the privileges afforded them by our library and its branches, and emphasizes our duty to meet the growing requirements of the public regarding good books and literature.

From the point of view of economy of management, the trustees are able to report that our unit cost per volume circulated is \$.095 as compared with the average for libraries in cities of over 50,000 population of \$.155. Our municipality can feel that maximum results are being obtained from our library system and from the annual city appropriation.

The use made of the new Montclair branch in its first year justifies the wisdom of its establishment. It reached a circulation of nearly 25,000 and was seventh of the ten branches in the number of books issued.

Attention is invited to the desirability, fully explained in the librarian's report, of a change of location of the Parker Branch at Norfolk Downs from the basement of the Francis W. Parker School to quarters better adapted to the needs of this fast growing branch.

During the year numerous repairs and alterations have been made in the main library building including rewiring and new lighting fixtures in the reading rooms and book stacks. An urgent improvement which should be made at an early date is the better illumination of the approach and entrance to this building.

The increase of \$2,000 in the annual appropriation made possible the more extensive purchase of books with greater duplication for the various branches. As books are the stock in trade of the library, an increase of funds will have to be made from time to time to meet the urgent and growing needs of the library patrons.

The librarian and his staff have worked faithfully and zealously and to their efficiency, ability and loyalty are due the excellent results which have been obtained.

Respectfully submitted,

GEORGE E. ADAMS, *Chairman*,
GEORGIANA CUSHING LANE, *Secretary*.

JAMES H. SANKEY,

Treasurer. ~~RECEIVED~~

GEORGIANA CUSHING LANE,

Auditing Committee.

LIBRARIAN'S REPORT

To the Trustees of the Thomas Crane Public Library:

The report of the Librarian for the year ending December 31, 1927, is herewith submitted.

Beyond the possibility of doubt, more people have walked a mile for a book than ever did or ever will walk a mile for a Camel. Yet this fact has never been so strenuously advertised. Public libraries have very properly refrained from shouting their wares from the housetops or the roadsides and have seldom sought and have so seldom been awarded the limelight. This has not been due to the fact that their administrators have anything to conceal or have any lack of belief in the practical value of their services to a community. Perhaps too much have they adopted the attitude of the physician or the lawyer who feels that if the quality of his services is high, people will find him out and that satisfied clients should be his only advertisement. However, if a city is appropriating money for the support of a public library, it is only fair that the library should endeavor to show from time to time and in a modest and seemly manner how the money is being spent and the extent and quality of the service rendered. With such an idea in mind, we welcomed the opportunity afforded by the Trading Post of the Quincy Chamber of Commerce to show the citizens of our city so far as the limitations of space permitted something of the work of the Thomas Crane Public Library.

The committee of the Chamber of Commerce in charge of the Trading Post were not only favorable to the suggestion but responded by allotting for our use a booth in a very central and desirable location. A large map of Quincy (5' x 3½') was placed in the background of the booth with red streamers reaching out to the ten branches, the City Hospital and the nineteen schools where the library maintains classroom libraries, thus showing the extent of the service. Under the map we filled shelves with selected books on all subjects with special emphasis on business and technical books and books on home-making. The sides of the booth were lined with attractive posters, many of which proved the artistic talent of our own staff. A large flier containing both the printed text and a fac-simile of the Declaration of Independence with a library directory was given away to those interested, together with copies of the last issue of the library Bulletin. All the members of the staff had hours assigned for work at the Trading Post, and when not engaged in answering the questions of those interested, occupied their time by preparing books for circulation. It was made possible for all who wished to sign borrowers' application slips and to designate the branch or other agency to which their borrower's card should be sent, and a gratifying number of new borrowers availed themselves of this opportunity. As over 15,000 people visited the Trading Post in the three days it was open, it may be assumed that the same number saw our exhibit and that many realized for the first time something of the character of the work done by our public library. Even if not a new borrower had been added to our files, we believe that the exhibit would have been worth the time and energy spent in its preparation.

Circulation figures showing the number of books loaned for home use do not tell the whole story of the activities of a public library, but they do form probably the best statistical guide we have for measuring the response of a community to the services

rendered by its public library. With a certain amount of satisfaction, therefore, we report that the response of the people of Quincy to their public library has been greater than in any previous year in its history. Over one-half million books have been loaned from the various agencies of the Thomas Crane Public Library during 1927, the exact number being 512,221, a gain of nearly ten per cent over the figures for 1926. Though not susceptible of numerical proof, we are quite sure that there has been a like increase in the use of the main library for reference purposes and for reading in the building itself. While the increase in circulation is probably only a normal increase, for Quincy is growing rapidly, it would indicate at least that the library is keeping pace with that growth and is not lagging behind. Furthermore, it is a fact that in very few cities comparative in size to Quincy have the libraries so large a circulation and that in many cities of over 100,000 population the public libraries have not yet reached the goal of a half million books loaned in one year. The latest statistics published by the American Library Association show the average per capita library circulation in cities in the United States over 50,000 in population to be less than 4. Our per capita circulation was 8.4. The unit cost per volume circulated \$.095 last year was well below the average unit cost for cities of the same size or larger. Analysis of the circulation statistics shows that the main library registered a satisfactory gain of more than 5,000 in books loaned over 1926 and that all the branches but three had more or less substantial increases.

In the Librarian's report for 1926 we laid considerable stress on the fact that the size of our book stock was wholly inadequate to meet the legitimate demands for books created by the increased circulation and the extensions of branch service. We are glad to report that our request for an increase of \$2,000 in the budget appropriation for books was very willingly granted by Mayor and Council and that in this past year we have not only been able to purchase more new books than usual but have duplicated more extensively for the branches and have made many much needed replacements. A large and growing circulation increases the wear and tear on books and necessitates the annual withdrawal of a large number from active service. Our total book stock was increased from 67,228 at the end of 1926 to 71,710 on Dec. 31, 1927. I should like, however, to repeat what I said in my report last year, that I do not know of another library in the country having a circulation as large as that of this library which does not have a book collection of over 100,000 volumes.

On Jan. 5, 1927, the Montclair Branch, the tenth branch in the Quincy library system, was opened to the public. Situated in one wing of the new Montclair Community House, and equipped with modern library furniture and shelving, we consider it one of our most attractive branches from the physical standpoint. That it has been appreciated by residents of the Montclair district is indicated by a home use of 24,814 books, exceeding the circulation of some of our other branches. Any fear that the opening of this branch might draw circulation from the three nearest branches happily proved unfounded for two of these made gains this year and the other had only a very small proportional loss.

In the fall, the General Palmer Branch at Adams Shore was moved into smaller but more attractive quarters in the same block and the book stock was augmented by a considerable number of

new books. A gratifying increase in circulation followed the change, more than three times as many books were loaned in October, November and December as in the same months in 1926.

Since 1921, the Parker Branch at Norfolk Downs has occupied a fenced-off portion of a basement room in the Francis W. Parker School, the entrance being in the rear of the building across the large playground. There are many decided drawbacks connected with such a location, the chief drawback being that the allotted space is large enough only for a minimum amount of shelving and furniture and there is not opportunity for growth. In my report last year I called attention to the fact that these quarters were fast being outgrown and that a new location providing more space for shelves and reading tables would soon be needed. This past year the circulation has again increased and it is the feeling of the trustees and the librarian that the change of location should be made early in 1928, particularly as quarters which are adequate and allow for future growth are available in a location as well located from the library point of view as the present site. It is also altogether probable in view of the contemplated changes and extensions of the Quincy school facilities that our tenure in the Parker School would be limited in any event. It seems, therefore, that we should take advantage of the present opportunity to provide the better library service which the increasing patronage of the Parker Branch merits and warrants. Items to effect this change have been included in the 1928 budget.

The library service at the Quincy City Hospital has been rewarded by a marked increase in the use of books and by commendation of the character of the personal service rendered. We have continued our cooperation with the Americanization work of the Quincy School system, which is in charge of Miss Nellie Perry. Additional purchases have been made of books suitable for easy reading by those to whom the English language is new. During the winter, groups of these classes visited the main library and the Temple, Baxter and Parkway branches. Talks on the public library, what it is for, how it is supported, what it contains and how it may be used with profit were made by the librarian and Miss Callahan. At these meetings, the Americanization Committee of the Women's Clubs of Quincy has assisted by furnishing refreshments and in creating an atmosphere of genuine social fellowship. The practical result of these group visits to the library is demonstrated by the fact that many members of these classes become active users of the library.

Miss Kingman reports an increase of 3,201 in the circulation of books from the children's room of the main library. The horde of children who flock into the library after school hours is visible evidence of their interest. The usual exhibit of children's books suitable for Christmas gifts was held in November and a special bulletin published at that time listed the titles of the children's books added to the library in 1927. The use made of the classroom libraries sent to the schools of Quincy has also shown an increase, the circulation being 67,602, a gain of 5,228 over the figures for 1926. The number of these libraries sent out in May was 144; this number was decreased to 118 in the fall owing to the consolidation of the upper grades in the new junior high schools, each of which has a library of its own, supplemented, however, by books from the Thomas Crane Public Library. As a matter of interest, a careful accounting shows that each book sent to the schools had

an average circulation of 12 times for the year as compared with an average turnover of 7.1 for each book in the whole library, and that the unit cost per book circulated for the classroom libraries was 1½ cents while that for the entire library was 9½ cents. The deduction to be drawn from these figures would seem to be that at a comparatively low cost we are bringing directly to many of the children of Quincy, books which not only supplement their textbooks but aid in developing a taste for reading good, wholesome literature.

The quarterly Bulletin with its annotated lists of new books has been continued and through the mail and by desk distribution has kept borrowers informed of what is being added to the library. With the cooperation and encouragement of the Quincy Patriot-Ledger, a weekly column of book comment and library information has been conducted by the librarian with a fair degree of regularity except for the summer months.

It seems that changes in the staff must occasionally occur, and it was with sincere regret that we accepted during the past year the resignations of Miss Louise Warren and Mrs. Ruth Chambers. Miss Warren, always accustomed to give more than her utmost both as general assistant and as instructor of the school children who came to learn how best to use the library, acquiesced in the advice of her physician to take a year off for rest and recuperation. We know that users of the Atlantic and Montclair branches will always remember the ever alert and quietly efficient service given by Mrs. Ruth Wilmore Chambers and share our regret at her resignation in October. The opening of a new branch this year necessitated the employment of an additional assistant and we were fortunate in securing Miss Mabel F. Porter, who brought to the library a valuable experience gained as librarian of the public library at Holbrook. Miss Porter joined the staff in March and was given the Parkway Branch as her assignment. Miss Marion Davis, who had served as summer substitute for several years, was secured for a full year's service and has taken over Mrs. Chambers' work at the Montclair Branch. In October Miss Ingrid Blom, a former resident of Atlantic, came to us from the Somerville Public Library. A very considerable part of her time is given to assisting Miss Kingman in the children's room and in her work with the schools.

Practically all the members of the staff have, at their own expense, attended one or more of the meetings of the Massachusetts Library Group at Boston, Marblehead, and Nantucket, or the Norfolk County Library Group meeting at Brookline. The advantages, both professional and social, of mixing with others in the same line of work have decided value. Several members of the staff have availed themselves of the opportunity of taking courses on library technique and evaluation of literature which have been given in Boston during the year. Staff meetings have been held with some regularity. Last fall, the staff was divided into committees of three, each of which was assigned full responsibility for the arrangements and the conduct of one staff meeting during the fall and winter. All the programs so far have been interesting, enjoyable and helpful. Twice we have had outside speakers to whom we are indebted for talks of unusual interest.

To conclude, there are doubtless many points at which our library service might be improved. We need, as I have emphasized before, to increase our stock of books by more and more purchases if we are even to begin to meet the constant demands. Both in ma-

terial and quality, we need to improve our reference services as well as other phases of our work. The wide area in service by its very extent precludes intensive cultivation. However, I am confident that the Thomas Crane Public Library is in a healthy condition, growing normally, and I can testify that it is served by a loyal, intelligent and hard-working staff and by a board of trustees genuinely interested in the work of the library and whole-hearted in its support.

Respectfully submitted,

GALEN W. HILL,
Librarian.

Statistical Summary

Population served 60,811 (Census of 1925).

Free for lending and reference.

Saturdays, 8 A. M. to 12 M.

REPORT OF SCHOOL COMMITTEE

To the Citizens of Quincy:

The School Committee submits, herewith, its annual report for the year 1927.

The Junior High School system, which we voted to adopt several years ago, is nearing completion. In February we opened the North Junior High School and in September, the South Junior High. The Quincy Point Junior High, an addition to the Daniel Webster School, is now under construction and will be occupied in September. These, together with the Central Junior High, will enable us to extend the well-recognized advantages of this system to the entire city, and will place Quincy where it belongs—among the educationally progressive communities of the country.

In the early part of the year Mr. James N. Muir assumed the duties of Superintendent of Schools. He came most highly recommended, not only because of his general qualifications for the position, but also because of his thorough knowledge, practical and technical, of Junior High Schools. We have not been disappointed. At his suggestion we have raised the standard of requirements for teachers. He has followed the wise policy of keeping in close touch with the classrooms by personal visits at frequent intervals to supplement the work of our supervisors. His suggestions and advice in regard to new buildings and matters of administration have made for economy and efficiency.

The constant problem confronting the committee, now and for some years past, is and has been the proper housing of the rapidly increasing school population. The number of pupils enrolled for the present school year, not including the State-aided schools, is 12,717, an increase of 795 over the number enrolled a year ago, and this, of course, means more schools. All of our buildings, including even the new ones, are filled almost to capacity. To solve this problem, without overstraining the financial resources of the City, is the duty of the committee, and we have, accordingly, prepared a five-year building program, after having made a most careful survey of our school needs. As part of this program we are recommending the erection of four new buildings next year,—Adams Shore, Merrymount, Houghs Neck, and Montclair.

We are pleased to report the increased use of our schools, both halls and gymnasiums, for community purposes. The gymnasiums in all the schools are being very generally used for public evening classes. Our citizens in this way are becoming better acquainted with our schools which, in turn, are furnishing real community centres.

Physical education has received a real impetus. The work has been consolidated and placed under the supervision of a physical director. An effort has been made to encourage all the pupils in the Senior and Junior High Schools to take active part in some form of athletics. During the year considerable work has been done on Faxon Field, so that it is now, in large part, available for use, and we hope that another year will see its completion.

We regret to report the death of Miss Eliza Sheahan, a veteran teacher, who had served in our schools for many years faithfully and with great credit to herself and to the city. As a token of our respect and appreciation, the Committee has voted to place a tablet in the Adams School, where she was best known. A similar tablet is also to be placed in the Washington School as a token of our appreciation of the services of the late Thomas B. Pollard, its beloved master for many years.

In closing, the Committee acknowledges with pleasure the co-operation of all in the department, from superintendent to teachers, who have helped to make the past year a most successful one.

The foregoing report was prepared by a special committee consisting of Mr. George W. Abele and Mrs. Beatrice Walker Nichols, and was adopted as the annual report of the Committee for the year 1927.

IN MEMORIAM

ANNIE F. BURNS

Born May 31, 1862

Died May 12, 1927

A faithful teacher for forty years in the
Willard School
1884—1924

DORA M. START

Born May 30, 1873

Died July 2, 1927

A faithful teacher for twenty years in
the Wollaston School
1907—1927

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

In accordance with the usual custom, I herewith submit the annual report for the public schools for the year 1927.

The facts and figures herein recorded may serve to increase the interest in the work in which we are now engaged.

Quincy is a rapidly growing city. Its population is increasing very rapidly and its school enrolment is increasing more rapidly than is the city population. One of the chief reasons for its growth is that it is distinctively a young people's city.

The former Superintendent, the late Mr. Fred H. Nickerson, better known to the school men of the State than to me, dedicated himself to the task of securing two Junior High School buildings. It was his last work here. He did this with his usual calmness of purpose and devotion to duty which were ever fruitful of results.

These new schools, the North Junior High School situated at the junction of Hancock and East Squantum streets, and the South Junior High School situated on Granite street near Center street, are splendid buildings—a credit to any city.

The North Junior High School was formally dedicated on February 8, 1927. Payson Smith, Commissioner of Education, delivered the address of the evening. The school was opened for school work on February 1, 1927. The South Junior High School was formally dedicated on Monday, November 7, 1927, which was Quincy's contribution to Education Week. Superintendent James N. Muir delivered the address of the evening. The South Junior High School was opened for instructional purposes September 7, 1927, although the building was not entirely completed.

On September 26, the enrolment of the Junior High Schools was taken. The enrolment of the North Junior was 940, which was 190 more than the capacity of the building; that of the South Junior, 839; and that of the Central Junior, 880.

On February 1, the day on which the North Junior High School was organized, 946 pupils were transferred from the elementary or grammar grades. This involved an endless amount of detail. The teachers were drawn largely from the elementary schools. The same procedure was essential in organizing the South Junior High School and these teachers were drawn largely from the elementary or grammar grades of the City of Quincy.

To complete the Junior High School building program, it was essential that a fourth Junior High School should be built. Preliminary steps were taken early in January to secure the Quincy Point Junior High School. Final plans for this school were approved by the School Committee on June 7. The appropriation was obtained from the City Council late in August. The construction of the Quincy Point Junior High was started early in September and is now well under way. It is expected that it will be delivered to the school authorities not later than July 1. We have every reason to believe it will be ready for occupancy when school opens in September. Quincy will then have four Junior High Schools,—the North Junior, South Junior, Central

Junior, and the Quincy Point Junior High Schools, with an approximate enrolment in September of 3,400 Junior High School pupils. It will enable the authorities here to extend the recognized advantages of the Junior High School program to the entire city and should place Quincy where she rightfully belongs educationally.

The Course of Study

With the beginning of the school year in September, a new Junior High School program and schedule of studies were put into use. The length of day is from 8:30 to 2:50, a continuous session allowing one-half hour for lunch periods. The periods are 55 minutes in length on the plan of directed studies, utilizing the first half of the recitation for directed study and the second half of the recitation period for recitation and check-up work. While the Junior High School program and schedule of studies have been in effect but half a year, we can safely say that they have met with general approval by pupils, teachers, and citizens.

Eighteen hundred pupils were transferred from the elementary or grammar grades during the year to the two new Junior High Schools. At present all buildings are filled to their capacity.

Realizing as the School Committee does the importance of the housing problem in a rapidly growing city, a sub-committee was appointed to act with the Superintendent on a future building program. After a careful survey by the sub-committee and Superintendent, the School Committee felt constrained to recommend to the City Council another Five-Year Building Program which is at the present time being considered by that body. The school authorities feel it is the only feasible plan without overstraining the financial resources of the City.

Physical education has received an impetus during the year. The work has been consolidated, intensified, and placed under the supervision of a physical director. In addition to the regular physical educational work of the gymnasium, a specific program was outlined to encourage all pupils of the Senior as well as Junior High Schools to take active parts in some form of athletics.

The wider use of the school buildings has been encouraged. The auditoriums, gymnasiums and various parts of the buildings have been used for community purposes during the entire year. The Junior High School gymnasiums have been used extensively for public gymnasium classes for adults. This work is being extended. The Committee passed a resolution that when 20 adults, men or women, wished to use a gymnasium for physical education purposes, the Committee will employ the teacher to take charge of the class. The gymnasiums in the Junior High Schools are opened also for competitive athletics.

One of the big items that the committee has undertaken the year just closing was the elimination of the mid-year promotions. The first factor in the work undertaken to eliminate mid-year promotions was a General Intelligence Test for all pupils from the first grade through the last year in the High School. The results of this mental test justified the efforts that the teachers, masters, and those in authority put into it.

Achievement tests based on the content of the work that the pupils covered during the first half of the year were given during the month of February. These tests were given in arithmetic, spelling, geography, history, and language, in the fourth, fifth, and sixth grades. The tests are based on the content or subject matter covered by the pupils according to our own course of

study and objectives planned. In other words, these tests are our own achievement tests. The accumulation of the results of these various tests will give us a fairly accurate measure of the pupils' standing. The mental tests co-mingled with the judgments of the teachers and masters as well as the results of the achievement tests will give us some standard of where all the children rightfully belong.

Health Program

In addition to the regular routine health examinations and the work of the school physician and nurses, two very important health campaigns were conducted in the public schools—one, an extensive diphtheria prevention program in which 2,388 children received the toxin and anti-toxin treatments. Of these, 2,197 completed the treatments in the schools. This was done through the establishment of weekly clinics by the City Health Department together with the co-operation of the school physician and school nurses. We feel that this immunization work is a decided forward step in our school health work.

The other, the School Clinic, is the most complete health examination of school children ever undertaken in Quincy and one of the largest and most complete Clinics ever carried on in the State.

The preliminary work was done by the school physician, school nurses, and two nurses from the City Health Department. This consisted of a health questionnaire with about 60 questions. These questions related to the state of health, the age, school grade, the habits of eating, rest, play, the amusements and the present and past histories of the children. These histories were recorded and tabulated by the school nurses and compiled ready for the immediate use of the staff of the State Department of Public Health. The school physician, Dr. Drew, and the school nurses gave most of their time to the preliminary work from the time the schools opened in September until they re-opened in January.

The purpose of the Clinic is to promote the health of the school children and to prevent disease by calling attention to any defect or infection that may be found that the condition may be remedied before serious illness results. In any case where medical treatment is necessary, a report of the examination will be sent to the parents advising them to consult their family physician.

Children do not attend the Clinic and are not examined without the written permission of the parents.

The State Department's personnel consisted of five physicians, one nurse, an x-ray technician, two dietitians, and two stenographers, and one attendant. These, together with the school physician, four school nurses, and two nurses from the City Health Department, constituted the working force of the Clinic conducted in Quincy.

They began their work in Quincy on January 3, 1928 and completed it about March 21. Seven thousand pupils from the elementary and junior high schools have been examined. Needless to say, these schools have been beehives of industry. All participants have been earnest in their endeavor to wage a war on tuberculosis. It is a great work well done. We trust it can be followed through and carried on to the end.

The Assistant Superintendent has reported for the State-aided, Academic Evening, Academic Summer Schools, and special classes. Because of the importance attached to these reports, they are given in full. Under separate headings will be found a short report of the High School Principal, Supervisors and School Physician.

The Day Industrial School

Many people know that \$47,500 was appropriated for the Quincy Industrial School in 1927; few know that all of the money is not expended and that more than one-half the amount actually spent comes back to the city treasurer in other ways. During the school year ending in June, 1927, \$46,096.65 was spent to maintain the Industrial School while the following amounts were received by the treasury because of the school:

Tuition for pupils living outside of Quincy.....	\$4,380 00
Cash for products made by the school.....	1,879 59
Aid from the State of Massachusetts.....	17,890 96
Aid from the Federal Government	3,400 20
Total Receipts	\$27,550 75
Net cost to City of Quincy.....	\$18,545 90

It actually cost \$252.07 to educate each boy in the school, but the cost to the city for each pupil was only \$101.42.

In addition to the cash receipts above mentioned, the boys do much work for the public schools and other departments of the city for which no charge is made as the students need real jobs in which to get trade experience. The teachers of the school estimated the value of this labor to be over \$7,000. Many of the simpler electrical and plumbing repair jobs in the schools are done by industrial school boys. Below are listed a few of the larger jobs done by the boys in other departments.

Stove pipes for Portable Buildings made and installed.

48 Manual Training Benches, each equipped with vises made by the machine department.

2 Sheet Metal Benches.

16 Bolenius Racks.

36 Art Tables begun in May, 1927, completed in Sept., 1927.

36 Mechanical Drawing Tables begun in May, 1927, completed in Sept., 1927.

The type of instruction offered, the number of boys enrolled, and growth of the school is shown by the following tabulation:

Year	1921- '22	1922- '23	1923- '24	1924- '25*	1925- '26	1926- '27
Auto Mechanics	17	30	42
Electrical	32	33	39	40	36	36
Machine	31	32	33	42	37	34
Plumbing	18	21	18	42	37	38
Sheet Metal	18	18	20	16	18	19
Woodworking	48	60	75	70	70	65
Total	147	164	185	227	228	234

*Entered New Building.

In three years the automobile department has reached its capacity. The sheet metal and woodworking departments are the only ones where there are not waiting lists. This school is open to neighboring communities, on payment of tuition fees after Quincy applications are filled, but for several years relatively few boys have enrolled from outside the city because we have not the facilities to care for them. Undoubtedly, there are fifty or more boys outside the city who would gladly come if it were known they could be enrolled. Although the school has been built but three years it is necessary to use the corridors to assemble the work of some departments and increased facilities are needed if the school is to function to the highest point of efficiency.

Thirteen teachers and a Director are employed in the school and all but one, the teacher of English, civics and hygiene, have had eight or more years' experience in the trade which they teach plus training in methods of teaching. Within a year Boston, which has just started a plumbing department, has taken two of our teachers in that department. We regret losing the men, but were gratified that Boston came to Quincy to find the men properly qualified to teach the trade. The instructors of the Industrial School are specially trained and perform their duties well, all are making a careful study of their courses of study to better adapt the instruction to the needs of the trade they teach and the boy being taught. The increased efficiency of the school is reflected in the per cent of attendance. In 1924, the attendance for this school was 89.78 per cent, four per cent less than that of the regular day schools. In 1927 the per cent of daily attendance was 94.1 which is within .5 per cent of the regular day schools, which were obliged to improve their attendance nearly one per cent to keep ahead of the Industrial School.

Quincy Home Making School

The average membership for the school year 1926-27 was 43.11 as against 41.86 of the preceding year. To educate these 43 girls \$13,327.27 was expended, but during the same period the following amounts were received in the city treasury because of the Home Making School:

Tuition for pupils outside the city.....	\$585 00
Cash received for work done.....	1,303 77
Aid from the State of Massachusetts.....	5,227 36
Aid from the Federal Government.....	754 57
Miscellaneous receipts	4 28

Total receipts	\$7,874 98
Net cost to the City of Quincy	\$5,452 29

Although the total cost of running the school was \$963.11 more than the total cost the previous year, the net cost to the city was \$918.61 less than the net cost for the school year 1925-26.

The school employs four full-time teachers, a Director, and two part-time teachers. Every girl receives instruction in Dressmaking, Cooking, Housekeeping, Laundry, Millinery, Home Nursing, Textiles, Arithmetic, Science, English, and History. Laundry and Textiles are given in the first year only, and in the second year girls are allowed to make a choice and specialize in either cooking or sewing depending on their interest and ability. Those girls choosing clothing are given six hours per week in clothing and a minimum assignment of two hours a week in foods. The special

foods girls have six hours a week in foods and two hours in clothing.

The special girls in clothing conduct the newest and most successful innovation of the year, "The Tiny Tot Shop," which is organized on a real shop basis. Orders are filled for outside customers for children's garments ranging from two to six years. At present the customer furnishes the material and the girls make the garment at a charge of \$1.00. Since the starting of the shop the girls have had all the orders they could fill.

As in the Industrial School, the teachers have been busy under the leadership of the Director, Miss Caroline M. Wilson, revising the courses of study. More girls should take advantage of the opportunity which is provided by the school. Successful graduates of the school may enter the Junior Class of the Senior High or go on to the Boston Trade School for Girls if they so desire.

The Continuation School

The table below shows the enrolment in the Continuation School ever since it was added to the Quincy school system:

CONTINUATION SCHOOL ENROLMENT
1920-1927 inclusive

	1919- '20	1920- '21	1921- '22	1922- '23	1923- '24	1924- '25	1925- '26	1926- '27
Boys	104	136	62	77	71	127	67	84
Girls	35	53	36	27	28	50	26	56
Total	139	189	98	104	99	177	93	140

In 1925-26, \$6,016.62 was spent to educate the 93 pupils enrolled; in 1926-27 it cost \$4,951.22 to give the same training as before to 140 boys and girls, a reduction of \$1,065.40 in the cost of running the school.

Furthermore, the following amounts were received by the city treasurer because of the Continuation School:

Tuition fees	\$81 84
Cash for work done	56 22
Aid from the State of Massachusetts.....	2,171 08
Aid from the Federal Government	450 61
Total receipts	\$2,759 75
Net cost to City of Quincy	\$2,191 47

The lower cost was accomplished by reducing the teaching force.

Mr. Harlan Harrington, who has been Director since the school was opened, was transferred to the North Junior High School in February, 1927, as sub-master and gave only two hours per day to the Continuation School. In September, Mr. Harrington's connection with the school ceased and Mr. Dana Clark, who had been the shop instructor, became Director and now handles all the work for the boys as well as directing the work for the girls.

Although 140 boys and girls registered in the school during the year, but 68 were enrolled when school closed in June. Of the 48 boys discharged, 31 became sixteen years of age, 14 moved from the city, three returned to the regular day school. Of the 24 girls discharged, 14 became sixteen, seven moved and three returned to the regular day school.

All youths between 14 and 16 years of age who have left school to go to work must attend the Continuation School for four hours per week. If a Continuation School pupil loses his job he must attend Continuation School for 20 hours per week until he gets a new job or return to the regular day school.

The boys receive manual instruction in Home Mechanics for one-half the time and arithmetic, English, civics and hygiene for the other half. The academic work is, as far as possible, related to their day employment. The girls have the same amount and type of academic work and their choice of household arts or commercial work.

In the few hours a week which the Continuation School has the individual it cannot hope to discover the work he can do best and also train him to do it. It does, however, make a determined effort to discover the youth's interests and abilities and direct him toward that form of employment best fitted for him. The teachers in developing the pupils seek to use only such instructional material as will be of use to the student in his daily life.

Continuation School teachers are required by the State to visit both the homes of their pupils and the place of their employment. The school thus becomes a connecting link between the home and the job. The right type of a teacher has an opportunity to do much social service work, the value of which cannot be measured.

The Evening Industrial School

During the school year 1926-'27, \$2,489.27 was spent on Evening Industrial Education for Men. The following amounts were received in the city treasury because of this form of education:

Tuition fees for men living outside Quincy.....	\$232 00
Registration fees	188 00
Aid from the State of Massachusetts.....	913 13
Aid from the Federal Government.....	170 00
<hr/>	
Total receipts	\$1,503 13
Net cost to City of Quincy.....	\$986 14

The following tabulation shows the type of instruction offered and the number of men enrolled for the last five years:

DATA ON EVENING INDUSTRIAL SCHOOL REGISTRATION

Class	1922-'23	1923-'24	1924-'25	1925-'26	1926-'27
Shop Mathematics for Electricians	No class	No class	No class	No class	13
Automobile Mechanics	No class	No class	No class	24	26
Electrical wiring	18	16	33	45	31
Drawing for Granite Cutters.....	No class	11	No class	No class	No class
Machine Shop Practice	16	27	25	21	19
Machine Drawing and Shop Mathematics	No class	No class	No class	27	41
Plumbing	No class	No class	39	52	46
Roof Framing ...	No class	47	26	36	10
Sheet Metal Drafting	28	45	25	29	33
Ship Blue Print Reading	No class	No class	No class	No class	63
Totals	62	146	148	234	282

The classes in Roof Framing and Shop Mathematics for Electricians did not prove successful because of lack of numbers, the former was closed after nine meetings and the latter after six meetings.

The class in Ship Blue Print Reading was conducted at the Fore River Ship Yard from 4-6 P. M. and proved so successful that it was necessary to run the class in two divisions. It was one of the few successful Blue Print Reading classes in the State. The Machine Drawing and Shop Mathematics class was in two sections,—one at the Boston Gear Works and the other at Fore River. The evening industrial classes carried on within the factory are new for Quincy and are successful. The State authorities agree with us that more men should take advantage of such opportunities. We are ready to establish evening trade classes whenever 15 or more men are willing to attend regularly with these limitations: men enrolling for evening industrial work must be engaged during the day in the trade to be studied in the evening and must be 16 years of age.

Ten teachers were employed in this work, all of whom have had many years' experience in the trade and several in teaching the trade to others. A registration fee of one dollar is charged each person enrolling which is returned to all who have been present 75 per cent of the time. Just one-third of those enrolled received the dollar back. If the men paid more for the instruction, I believe the attendance would be greater. Because the instruction is practically free, some people tend to undervalue it and fail to appreciate the opportunity which lies near at hand to be obtained with little effort.

Evening Practical Arts Classes for Women

Forty-eight classes were held during the school year 1926-'27 in subjects as shown in the following tabulation under the direct supervision of Miss Nellie A. Perry:

ENROLMENT DATA

	1922-'23	1923-'24	1924-'25	1925-'26	1926-'27
Millinery	287	220	277	122	112
Cooking	15	34	42	85	105
Dressmaking	376	591	619	730	726
Home Nursing	19	12	17	16
Total	697	857	955	937	959

To conduct these classes it cost \$9,538.53, but the following sums came into the city treasury:

Tuition fees for 22 non-resident pupils.....	\$192 78
Registration fee	384 00
Aid from the State of Massachusetts.....	4,061 91
Aid from the Federal Government.....	957 30
Total receipts	\$5,595 99
Net cost to City of Quincy.....	\$3,942 54

The women in these classes spent \$13,695.07 for material with which to make dresses and hats and the market value of the finished product was estimated at \$49,971.07, a net saving to the women of \$36,276.00 obtained at a cost to the city of \$3,942.54. These classes are then a paying investment in dollars and cents. Furthermore, the skill which the women acquire in dressmaking, millinery and cooking remains with them as a permanent accomplishment. The teachers also stress economical buying in all departments and in dressmaking attention is given to the texture of materials, laundering qualities and becoming color combinations.

Fourteen teachers were used in this type of work, most of whom have been teaching such classes in Quincy for several years. All have had practical trade experience in the subject which they teach and must maintain contact with the trade so that the women who come to them for instruction receive the latest and best methods of procedure.

Although called evening classes, at least one is held in the morning and several are held in the afternoon. Whenever a group of at least 15 women over 16 years of age and not attending a regular day school desire instruction in any of the household arts, it will be furnished for them.

The enrolment data shows the increasing interest of the women in cooking. For the first time all applications for instruction could not be filled and women were placed on a waiting list. The opening of the Junior High Schools will remedy the situation by providing more facilities for cooking.

Because of the popular small felt hat which can be purchased at a low price, the interest in millinery classes has steadily declined during the last few years.

More women should enroll in the home nursing classes; those who did enroll were most enthusiastic and reported to Miss Perry that the knowledge gained was of great practical value.

Americanization Work

In the early years of Quincy's history the inhabitants were all English speaking from Anglo-Saxon stock. In 1920, when the last national census was taken, 28.5 per cent, or over 13,000 of the total population were foreign born, 13.2 per cent came from non-English speaking lands, and 40.1 per cent of the population had one or more of the parents born in foreign lands. This presence in the city of thousands of people unused to American ways of living and government, often unable to read or even speak English, presents a difficult problem.

Teaching the foreign born to read, write, speak English and understand our methods of government is the duty of those engaged in the Americanization work of the School Department.

During the school year of 1926-1927, \$4,322.23 was spent in this work, of which amount the State of Massachusetts reimbursed the city treasury \$2,036.11. Thus the net cost to the city was only \$2,286.12. For this expenditure of money the city received the services of a supervisor of Americanization, Miss Nellie A. Perry, and seventeen teachers who carried on the work shown in the following tabulation:

Americanization Classes

	Number	Enroll- ment	Length of Session	No. of Meetings Per Year
Evening School Classes.....	13	331	2 hrs.	42
Factory Classes	4	66	1 hr.	42
Home Classes	8	55	2 hrs.	10 to 20
Other Classes	1	15	2 hrs.	42
	26	467		

Of the four hundred and sixty-seven enrolled 27 were under 21 years of age, 118 were from 21-25 years of age, 164 were from 26-35 years of age, and 158 were over 35 years of age.

Under the leadership of Miss Perry, many organizations are helping in this important work and the foreign born individual is given many opportunities of learning American customs through social intercourse.

All the teachers engaged in the work aid those who desire it in taking the proper legal steps toward citizenship. Miss Perry keeps regular office hours and several hundred aliens are helped by her every year in obtaining their first and second naturalization papers.

The census of 1920 showed that 3 per cent of the Quincy population was illiterate with an illiteracy of 8.3 per cent among the

foreign born. Quincy was more fortunate than the state as a whole, but it is confidently expected that our Americanization program will have greatly reduced the illiteracy percentages by the time of the next census in 1930.

The Evening Academic School

During the fiscal year 1927, \$2,601.86 was spent for evening academic school instruction. For that sum of money an evening school, employing fourteen teachers and a principal under the direction of the Assistant Superintendent of Schools, was maintained three evenings per week for eighteen weeks.

The table below shows the subjects offered and the fall enrollment for the last five years:

Subjects	1923	1924	1925	1926	1927
Bookkeeping	66	86	82	83	79
Business Arithmetic	80	90	100	92	119
Business English	111	164	178	128	191
Penmanship	81	54	96	55	89
Elementary Stenography ..	105	186	166	165	142
Advanced Stenography	24	32
Elementary Typewriting ..	-64	182	235	215	194
Advanced Typewriting	36
Mechanical Drawing	75	182	87	92	69
Grammar School Subjects..	23	18	11	23
Algebra	13	49	35
Cultural English	48

In the fall of 1927, 435 adults enrolled for the above courses, but less than 300 were really serious in their efforts. Several young people enrolled, paid the registration fee of one dollar and never returned to receive instruction; many others attended classes for a few evenings and on finding that real, hard, earnest work was required, withdrew.

As one will note from the list of courses the school is largely vocational in its nature and meets the needs of adults engaged in the business world during the day. Classes are small, the instruction is largely individual in character and adapted to the varying needs of the different pupils. Effort is made to meet the educational demands of all serious minded students over sixteen years of age. New classes have been formed and will continue to be whenever fifteen or more students will enroll; the classes in advanced stenography, advanced bookkeeping and algebra are examples of classes formed to meet the requirements of our students. Whenever an insufficient number of pupils does not warrant starting a new type of instruction those interested are directed to the place in Boston or elsewhere that the desired educational instruction may be found. Many students ask and receive counsel in regard to their educational program. Any adult wishing advice on what to study in the evening and where to obtain the instruction will gladly be given assistance.

The Academic Summer School

The table below shows comparative data for the seven years that the summer school has been in operation:

DATA ON ACADEMIC SUMMER SCHOOL

Grades	Year	Total Enroll-ment	Average Mem-ber-ship	Per Cent Daily Attend-ance	Total cost	Cost per Pupil
VB to VIIIA inclusive	1921	391	334.84	92.61	\$1,425 08	\$4 26
	1922	417	364.52	91.60	\$1,598 25	\$4 38
	1923	361	296.43	93.35	\$1,517 06	\$5 11
	1924	405	340.40	95.60	\$2,187 82	\$6 42
	1925	375	334.40	97.90	\$2,153 99	\$6 44
	1926	465	406.59	96.97	\$2,141 55	\$5 27
	1927	423	394.46	98.48	\$2,336 71	\$5 92

Comparisons of the total cost and cost per pupil for 1927 with the figures for other years should not be made because in other years the summer school was carried on for six weeks and in 1927 it was carried on for only five weeks. The total cost was greater in 1927 although the period was shorter, due to the increase in salaries granted the summer school teachers and principals.

The interest and seriousness of the pupils is shown by the high per cent of attendance, which is 98.48, in spite of the fact that attendance is voluntary and sessions are held during the hot weather.

Of the pupils enrolled, 296 were trying to win lost promotions. Of these, 25 or 8.5 per cent were dropped or withdrew before the end of the term; 18 or 6 per cent failed; and 253 or 85.5 per cent were successful. One hundred and twenty-one were in school to remove a condition in one subject; 21 or 17.3 per cent withdrew before the end of the term; 6 or 5 per cent failed and 94 or 77.7 per cent were successful. Twenty-four were trying to gain a grammar grade diploma and 23 succeeded.

The real test of the value of summer school work is the character of the work done by the summer school pupils in the regular day classes the following term. All the non-promoted pupils who did successful work in summer school were given trial promotions to the next grade. Of the 253 successful pupils 231 appeared in school in the following fall; the other 22 had left the city or gone to work. At the end of the first ten weeks 98 or 42.4 per cent of the summer pupils were doing passing work in all subjects; 55 or 23.8 per cent were failing in one of the subjects studied in summer school; 14 or 6.1 per cent were doing passing work in the subjects studied in summer school but were failing in one other subject; 64 or 27.7 per cent were not doing passing work in two or more subjects.

It is reasonable to suppose that those now doing passing work will continue to do so, as the first few weeks in a new school environment are the most difficult, and that some of the pupils now doing unsatisfactory work will improve. On the basis of the present figures, however, 167 pupils will probably be able to pass on to the next grade in January and have thus been saved one-half

year of school time. In addition to the time saved for the pupil \$5,945.20 has been saved to the city for those pupils on the basis that it takes \$35.60 to educate a pupil for one-half a school year.

Of the 94 pupils who succeeded in removing conditions in the summer, 88 reported to school in the fall. At the end of the first ten weeks 57 or 64.7 per cent of these pupils were passing in all subjects; 16 or 18 per cent were failing in a subject studied at summer school; 5 or 5.6 per cent were failing in a subject not studied in summer school; and 10 or 11.3 per cent were failing in two or more subjects. The foregoing figures indicate that at least 78 pupils will pass on to the next grade who might otherwise fail to do so. On the basis of past studies it is reasonable to suppose that one-third or 26 of the above would have failed to pass the next grade if they had not received the benefit of summer school. Thus \$925.60 is saved for the city, making a total cash saving of \$6,870.80 on an investment of \$2,336.71, or a net saving of \$4,534.09.

The great gain, however, comes not in dollars saved but in the confidence in themselves regained by many pupils and the encouragement which they have received to continue their education.

Continuing the policy of the summer of 1926, attention was centered on arithmetic and silent reading. Although many pupils studied geography, history, and English, the work was conducted in such a way as to emphasize the value of correct reading habits. The Ayres Burgess Silent Reading Test P. S. 3 was given to all pupils during the first week of summer school and the median of all grades was found to be below the normal for the grades. During the last week the pupils were retested with the Ayres Burgess Test P. S. 4 and a noticeable improvement was shown. All grades but the eighth had, in five weeks, brought their medians up to the normal median for the grades. Considering the short time which had elapsed the improvement was commendable.

In the past it has been impossible to care for all the pupils failing in but one subject who desired to attend summer school. In view of the good showing made this fall by such pupils who were admitted to summer school it would seem to be advisable to extend summer school privileges to all pupils conditioned in one subject as well as the non-promoted.

Special Classes

The need of more special classes for retarded pupils is still one of the pressing needs of our school system. Again during the spring and fall of 1927 many pupils suspected of being mentally retarded were examined under the same plan as outlined in the school report for 1926. Several more children who should be receiving special class instruction were discovered. There are now in the system 183 children who are, or soon will be, three or more years mentally retarded.

At present there are but two special classes for retarded children. It was thought that the opening of the North and South Junior High Schools would relieve the existing schools so that rooms for special classes would be available. Such did not prove to be the case, owing to the large increase in the regular school enrollment. The opening of the Quincy Point Junior High School in September, 1928, may relieve some rooms in that section, but adequate room for special classes will not be available until the city has more school buildings.

The Lincoln, Daniel Webster, Willard, and John Hancock schools are in great need of special class accommodations.

The two special classes, one at the Thomas B. Pollard School and the other at the Adams School, are unable to care for all the children in those schools needing the instruction and care the special classes give.

The classes are limited to sixteen pupils so that the teacher may give the necessary individual aid. At least one hour of each school day is devoted to some form of handiwork. Withdrawing the retarded pupil from the regular class room has been a big relief to the teachers and the backward child makes greater progress in a small class under the care of a teacher trained to teach backward children.

REPORT OF THE HIGH SCHOOL PRINCIPAL

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

Dear Mr. Muir:

I have the pleasure of presenting to you my annual report for the Senior High School. Comparative statistics of enrolment and membership for recent years are as follows:

	1925	1926	1927
Number enrolled	1,395	1,524	1,594
Membership at date	1,349	1,480	1,552

The reorganization of the school in January will add nearly a hundred pupils to number given above and we shall have more than reached the limit of accommodation in one session. At the opening of the school year next September unless additional room can be found somewhere, it will be necessary to establish again a system of two platoons and require some of the classes to attend an afternoon session.

Last year I reported the establishment of a position of dean of girls. There has now been over a year to watch this work and form some opinion of its value. In the first place I am convinced that the School Committee was very wise in its choice of Miss Baker to serve as dean. She has established happy relations with teachers, pupils, parents, and the city at large. She has carefully studied the needs of all the girls and has been meeting these needs in a remarkable way considering the short time she has been at work. In this connection I may say that it is evident that there is still considerable misunderstanding regarding the duties of a dean of girls and in fact regarding the whole matter of guidance as employed in our schools. There seems to be a fear that somewhere the duties of the parent and the home are being usurped or supplanted. I hope I may make it plain that the aim of this work is to supplement the work of the home and to give guidance in matters where the parent would not be expected to be qualified to

give competent advice. Vocational and curriculum guidance require an expert to be successful and are a large part of the work of a dean. Many girls find difficulty with social adjustment in the school and there is scarcely a girl who could not be more to herself and to the school if she could have the wise direction and advice of an interested and properly qualified woman. Civic relations and ethics enter largely into this program and moral guidance to some extent, but usually only incidentally. Moreover, girls well equipped mentally, morally, and socially are used to help other girls not so favored. There is a big work to do and we have as yet only made a start.

Reports received from colleges concerning our graduates who entered these colleges last September indicate that these graduates are uniformly maintaining creditable standing and in several cases have received special honorable mention. These reports confirm our judgment regarding the graduates and also show that the preparation received in our school was adequate.

Scholarships were awarded to graduates last June as follows:

Wollaston Woman's Club Scholarships to Marjorie H. Moles, class of June, 1927, who entered Jackson College, and Dorothy J. Dinegan, class of February, 1927, who entered Bridgewater Normal School.

Quincy Women's Club Scholarship to Melba Barnes, class of June, 1927, who entered Radcliffe College.

Rotary Club Scholarship to Gordon J. Peterson, class of June, 1927, who entered Brown University.

The Washington and Franklin Medal for excellence in American History was awarded to Jean J. Harper, class of June, 1927.

We have made two studies this year in connection with our pupils which have been of great interest and considerable value. The first was a study of graduates for the past five years who entered employment immediately after leaving school and the second was a study of possible relation between afternoon employment and scholarship of pupils now in the school.

To obtain information for the first study a questionnaire was sent to every graduate concerned. Replies were received from approximately 30 per cent of them. This was only a fair response but yet seemed to furnish us just the information we sought. The graduate was asked to state the character of occupation which he entered, the salary, method of securing position, reason for selecting same, High School subjects which had been found useful and any suggestions as to changes in curriculum which might be helpful to other pupils following him. Limited space will not permit discussion of the results of this questionnaire, but a few facts learned will be of interest and value.

Character of occupation:

45 per cent reported themselves in clerical work,
20 per cent in secretarial work, 15 per cent doing bookkeeping,
8 per cent in mechanical work and the rest in a wide variety
of occupations.

Salary:

Average beginning salary was \$14.39.

Average present salary was from \$16 to \$26.86 depending on length of service.

Method of securing position:

- 25 per cent position, through relatives or friends,
- 25 per cent by personal application, 20 per cent through further education, 15 per cent through Employment Agencies, 10 per cent through school references, 5 per cent through newspaper advertisements.

Reason for selecting occupation:

- 30 per cent interest in work, 20 per cent possibility of advancement, 15 per cent for experience, 15 per cent necessity, 20 per cent had no answer to this question.

High School subjects found useful:

- 60 per cent mention English, 35 per cent Typewriting, 25 per cent Bookkeeping, 20 per cent Stenography, 15 per cent Foreign Languages, 15 per cent Mathematics, 15 per cent Sciences, 10 per cent History, 10 per cent Drawing, 3 per cent Music.

The suggestions for changes in curriculum were many and varied but were mostly concerning some subject already offered in the school but which the graduate had not taken and which later experience showed would have been useful in the particular occupation in which the graduate was engaged.

In the second study we gained the following information: 294 pupils reported themselves in afternoon employment. Of these 187 are passing in all subjects and 107 are failing in one or more subjects. Further study brought out two interesting facts, one that several honor pupils are in the number employed while many of the pupils who are serious discipline and scholarship problems are not in the afternoon employment group. Interviews with employers of many of the employed pupils have shown that those doing satisfactory school work are also uniformly giving good service in employment whereas the opposite appears to be almost as generally true in the case of those failing in school work. The study seemed to show that afternoon employment was not a large factor in the matter of success or failure in school work. It rather proved what we already knew that the elements of success are mental ability, interest, energy, application, and seemed to indicate that a lack of any of the last three was a particularly serious handicap.

In closing may I say that we are grateful to the school committee for the loyal support which they have always given us and may I express to you our appreciation of the cooperation and help we have had from you at all times.

Respectfully submitted,

ERNEST L. COLLINS.

REPORT OF SUPERVISOR OF MUSIC

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

It gives me pleasure to submit the following report for the music department:

In planning a music course for the public schools our two great objectives should be,—first, to give the boys and girls such an understanding and appreciation of music that they may be able through life to enjoy and participate in music to a greater degree; and second, in the later years of the secondary schools to provide vocational training for those who show marked talent or interest in music.

The music department this year shows a steady and sure advance, with growth in each department. The children are being approached through every musical channel possible:—first, through vocal work which includes singing of songs and reading of music in the classrooms, choruses and glee clubs; second, through listening to music, embodied in listening lessons with the Victrola and in music memory contests; third, through participation in instrumental music, accomplished by classes organized for the study of band and orchestral instruments.

The vocal work is organized and outlined carefully for the grade teachers and the Junior High School music teachers, with one aim in mind, namely, that the boy or girl be able to read, sing and interpret music pleasurably and intelligently.

Music appreciation has been motivated as it has been for a number of years by the music memory contest which culminates in a concert of music memory numbers given to the children who receive the highest scores in the contest. Actual music appreciation work attends this contest plan, not merely the memorizing of given tunes.

In the instrumental class department which is carried on entirely outside of school time, instruction for all band and orchestral instruments is offered at twenty-five cents a lesson. This work is expanding the grammar school orchestras, which, in turn, prepare boys and girls for better work in the Junior High School orchestras. The latter have a combined enrollment of one hundred and fifty.

In Junior High Schools chorus singing is required of every pupil during the three years. Orchestra, glee club and band are after-school activities. In Senior High School all music is elective and is granted diploma credit. This credit is offered for chorus work, harmony, music appreciation, approved piano study, glee club, orchestra and band.

During the past year three concerts have been given:—a music memory program given by the Boston Symphony Orchestral Club to approximately eleven hundred children; an instrumental concert in which five hundred and fifty children participated, demonstrating the development of instrumental work from first year classes through the high school orchestra and band; and a high school concert, when a selected group of one hundred and fifty mixed voices presented Coleridge-Taylor's "Hiawatha's Wedding Feast."

In closing, may I express my gratitude to the school officials, the school committee, the teachers and the community for their encouragement and hearty cooperation in the music work, and I wish also at this time to commend Miss Tuthill and Mr. Taylor for their splendid assistance.

Respectfully submitted,

MAUDE M. HOWES,
Supervisor of Music.

REPORT OF GRAMMAR SUPERVISOR

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

As a "follow up" of the objectives or Problems in geography, history, English and arithmetic, our teachers have been constructing different types of tests in these subjects. This construction, when finished, will include a True-False Test, a Completion Test, a Multiple Response Test, and a Judgment Test.

The first semester's work consisted of True-False Tests for the months of February, April and June, and Completion Tests for the months of March and May. Each teacher made out and gave to her own class the type of test scheduled for the particular month. She also sent, to the office, a copy of the test, which she had given.

From the tests submitted, composite tests were made. These tests were then used for the corresponding months of the second semester. The class Medians were recorded at the office, thus permitting a comparison of the results obtained in the different sections of the city, and making possible a survey, which led, not only, to necessary, but also to desirable and helpful adjustments.

The purpose of these tests was not that of promotion or demotion. In fact, they were designated to get away from the traditional type of examination, which allowed, "a great range of individual choice" in the manner of answering the questions, and also as great a range in the interpretation of the written answers. Their object was to achieve one of the "wider" and better uses of testing which is to review, or "help in the process of recall," and to be the medium by which the pupils could "rival their own best efforts." With this goal in view, tests become a means of promoting one of the highest types of social education.

In closing, I desire not only to express to you and my co-workers, the principals and teachers, my deep and sincere appreciation of a hearty support, but especially to commend the teachers for their loyal cooperation and untiring zeal in "carrying on," all that has been undertaken for the good of the boys and girls of Quincy.

Respectfully submitted,

HELEN MAUDE DELICKER,
Grammar Supervisor.

REPORT OF THE PRIMARY SUPERVISOR

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

It is with pleasure that I submit my annual report as Primary Supervisor.

In accordance with my plan of previous years, I shall touch upon but one phase of our work this year, the teaching of geography in our primary grades.

A growing interest in geographic knowledge today universally recognized as "a need common to all enlightened people," has placed geography at the present time among the most important of the content subjects.

In the first three grades geography is not made a specific branch of study in itself, yet much geographic content is included in the subject matter of these grades. Nature study, civics, and especially history and reading, offer excellent opportunity for the indirect teaching of this culturally and practically valuable subject. The child's approach is based on well organized problems and projects. By way of example, the life about him, including a study of environmental and climatic conditions, social and industrial customs of his own community, and later of the American Indians and the Eskimos, gives the child his earliest introduction to the realm of geography.

In the fourth grade the formal study of geography is begun. Here the child becomes acquainted with globes and maps; he is encouraged to read as extensively as he can, the relevant geographic material furnished by the school and city libraries and his own home, through the media of reference books, and of magazines and newspapers; he is led to make his individual contributions to the work of his class, by participating in the collection of pictures, products of the various countries, and other specimens related to the subject, the making of maps and charts, and of scrapbooks of material bearing on the various countries,—all of which is of importance in the creation of a vivid impression of distant places and peoples.

Our purpose here is not the encyclopedic amassing of innumerable little-connected details, but, on the basis of the many data actually before the child the organization of the more salient facts, and a few broad generalizations of the principal thoughts so derived. Definite, clear assignments on the part of the teacher, in the form of questions, stated problems, references for reading, and suggestions for map studies precede the child's own geographical study.

Our wider aim is the creation of a sympathetic attitude towards all people through a growing understanding of their life background and customs; the building of a more solid foundation for effective future study, not only of geography but of the many other subjects to which a knowledge of geography is essential; and an increased interest and appreciation on the part of the child, in and of his own country through comparison.

In closing, I wish to thank you as superintendent, the principals, and the teachers for the spirit of cooperation so evident throughout this past year.

Respectfully submitted,

ELSA SCHOSHUSEN, *Primary Supervisor.*

REPORT OF SUPERVISOR OF DRAWING

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit my annual report upon the drawing department in the public schools of Quincy.

Year by year the city has increased its school accommodations for the children, until it has become necessary this year, to engage an assistant to the Supervisor of Drawing. Miss Helen Ash was secured for this position, thus giving the supervisor time for work in the Junior High Schools.

With the opening of the South Junior High School, another full time art teacher was added to the department. The Art Department now consists of a supervisor, assistant supervisor, High School Art teacher, and three Junior High School Art teachers. Upon opening the next Junior High School, now in process of construction, another Art teacher will be added to the present force.

Last May, the Art Department was requested to make paper hats for the annual Boys' Week parade, sponsored by the Rotary Club of Quincy. The time was short, but teachers and pupils put in many hours overtime, and turned out about 3,500 paper hats, on time. The Sewing Department very generously assisted in sewing bands for the hats.

At present, the Junior High pupils are engaged upon posters for the Trading Post contest, launched by the Chamber of Commerce. The classes are seriously handicapped by the shortness of the drawing time allotted them in Junior High School, 60 minutes per week, but do the best that is possible under the circumstances.

I am glad to have this opportunity to express my appreciation of the cordial cooperation which I meet throughout the city.

Respectfully submitted,

AMY E. ADAMS,
Supervisor of Drawing.

REPORT OF SUPERVISOR OF PHYSICAL EDUCATION

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit the report of the department of Physical Education for the year, 1927.

The policy of physical training at the Senior High School has been changed but very little from last year.

The work of this department in the Junior High Schools has undergone very radical changes. The opening of the North Junior

High School in February and the South Junior High School in September gave the physical education instructors a very busy year. Problems arising with these new programs were met twice during this time. The program in use in these new schools as well as at the Central Junior High School may be divided into five groups.

1. Medical Examinations. Every pupil entering gymnasium work and competitive sports has this examination covering heart, lungs, and hernia. As in the past years these examinations were given by Dr. Drew and Dr. Smith assisted by Dr. Rachel Hardwick, Child Welfare Physician.

2. Gymnasium Classes. Classes meeting weekly for a one-hour period, allowing time for a balanced program with change of clothing and shower bath.

3. Inter-class games. These activities interest large numbers of pupils and afford the less skillful performer an opportunity for playing these games.

4. Inter-school games. In these contests competition is limited to Quincy schools. Inter-school leagues were conducted in soccer, basketball, baseball, and track for boys and slug-ball, baseball, and tennis for girls.

5. Leaders' Clubs. A daily setting up drill of five minutes duration is given in each room. Student leaders, both boys and girls, are carefully selected and are given special training for this work. About forty pupils in each school participate in this activity.

We are looking ahead to the opening of the new Junior High School at Quincy Point when we will have an ideal arrangement of four schools meeting each other in the various sports.

The addition of one teacher of physical training this year has enabled us to greatly enlarge our program and in 1928 other new teachers must be added to the department.

In closing I wish to express my appreciation to all who have co-operated in promoting the work in physical training.

Very truly yours,

WILLIAM H. WHITING,
Supervisor of Physical Education.

REPORT OF THE SCHOOL PHYSICIAN

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit a report of the health activities of the school department for the year 1927.

Among the outstanding events, one of the important was the Diphtheria Prevention program, introduced last spring into our schools. With the co-operation of the Health Department of the city, the treatments for the prevention of diphtheria began May 2. Every school was visited once a week for three weeks by doctors under the direction of the Health Department, and, by this plan, 2,388 school children received the treatments of toxin and anti-

toxin. Of this number, 2,197 completed the treatments in the schools. The great majority of these girls and boys should now be immuned to diphtheria and therefore are protected against that disease.

We are greatly indebted to Dr. Edward A. Lane, our State District Health Officer, for his help, and wish to thank him for his co-operation in this preventive work.

We also wish to thank the Health Department and the Commissioner, Dr. Edmund B. FitzGerald, for their co-operation in this campaign. We are also especially indebted to the Health Department for the list of school children sent to the office every three weeks, who have completed the preventive treatments for diphtheria at the health clinics throughout the City.

Another activity of note that should be mentioned is the preliminary work which was done by the school nurses, with the assistance of the nurses of the Health Department, to prepare for the visit of the State Clinic to Quincy for the examination of the pupils,—according to the Ten Year Program for the Prevention of Tuberculosis among School Children, under the direction of the Division of Tuberculosis of the State Department of Health.

Notices of the examination requesting the consent of the parent were distributed to the pupils the second day of school, September 8th. In return, 6,711 requests were received and the work of visiting the homes, and taking the history of each child, commenced. Additional help was contributed by Miss Ethel L. Dill, and we are indebted to the Massachusetts Tuberculosis League for her services.

The School Committee also realized the enormous amount of work involved, and secured Mrs. Edna Hodgkinson to aid us in this preparation of histories for the Clinic. The advice and encouragement of our Superintendent, Mr. Muir, helped greatly to solve many a problem, and the month of December witnessed the completion of the preliminary work and we were ready for the Clinic, which began its work here in Quincy on January 3, 1928.

In glancing at the routine work for the year physical examinations of 1,367 pupils of the first grade have been recorded, and 437 notices of the various defects found at the time of the examination, have been sent to the parents.

It was also a privilege to help during the month of September in the program of the physical examinations arranged for our girls of the Junior and Senior High Schools.

During office hours in the morning from 8.30 to 9 o'clock, many children have been referred for inspection of various conditions,—especially from the Coddington School. Children in other schools,—referred by teacher or principal,—have also been inspected, and recommendations have been offered, according to circumstances.

The certificates of health issued according to the Labor Laws have been few, namely:

Form	C	{ work all time }	66
"	E	{ " part "	100

making a total of 166 issued.

A few age certificates have also been issued during the year.

It seems necessary to call attention to our increasing school population, in order that one may understand that the need of more workers in our Division of Hygiene is most urgent,—especially when the proper program for the health work of our Junior High Schools should be very carefully considered.

Two thousand and five hundred pupils should be the utmost maximum number for one nurse to satisfactorily inspect. It is hoped we may soon approach better conditions in our health activities by the addition of more nurses.

In closing this report, allow me to thank everyone interested in the health of our school children, for their splendid co-operation and support.

Respectfully submitted,

MARIA E. DREW, M. D.
School Physician.

Conclusion

It is only fair for me to say the School Committee has had a busy year. Twenty-seven meetings during the year show you have given unstintingly of your time and your talents in an earnest endeavor to advance the progress of the Quincy School System.

We have made splendid progress on the physical side, that is, in erecting and equipping new buildings. Many needed repairs have been made to old buildings and several of them have been freshened up a bit by painting them inside and out.

We should not lose sight of the fact that trained and skilled teachers, principals, and supervisors, grounded in the fundamentals to supervise and guide aright are essential to the completion of a real education program.

I wish to express my appreciation to teachers, principals, supervisors, and the Assistant Superintendent, and other employees of the school system, whose combined efforts have made it possible to accomplish much during the year.

I wish to express my appreciation to the Press. They have been extremely liberal in chronicling the news of the schools to keep the public informed.

I wish to thank the School Committee and the various sub-committees, with whom I have labored, for their confidence and support.

The year 1927 has been an extremely hard one but eventful and successful. Educational progress will be made, as always, by the sane judgment of fair men acting with specific information in any vital question. The strenuousness and eventfulness of the year, together with the elements above mentioned have conjoined to make it a pleasant and happy one for me.

Respectfully submitted,

JAMES N. MUIR,
Superintendent of Schools.

APPENDIX A.

STATISTICAL DATA

1. Financial Statement for the Fiscal Year Ending
December 31, 1927

1. REGULAR SCHOOLS

Appropriated by City Council.....	\$908,510 00

9. Report of the Dental Clinic, Coddington School, January 1 to
December 31, 1927

Number at present registered for treatment.....	4,075
Number of new patients registered during year.....	885
Number of patients completed	305
Total number of visits to clinic during year.....	5,920

FILLINGS

Number of amalgam fillings	1,541
Number of cement fillings	1,692
Number of synthetic fillings	222
Number of temporary stoppings	3
Number of temporary cement fillings	37
Number of miscellaneous treatments	419

EXTRACTIONS

Number of permanent teeth extracted	572
Number of temporary teeth extracted	2,024

CLEANINGS

Number of patients' teeth cleaned during year.....	1,967
Total number of operations	8,477

10. Report of Work of the School Nurses, January 1 to
December 31, 1927

Cases examined for various causes	19,849
Home calls made	2,277
Cases referred to School Physician.....	1
Cases referred to dental clinics and private dentists.....	2,323
Cases taken to eye and ear clinics	116
Cases of corrected vision	53
Cases referred to various other clinics	53
Operations for tonsils and adenoids	81
Cases of contagion found and reported.....	24

APPENDIX B.

LISTS OF GRADUATES

1. High School

(a). JANUARY, 1927

Jessie Howie Nairne Alexander	Ellen Wilhelmina Huovinen
Beatrice Margaret Anderson	Frederic Henry Ingraham
Florence Evelyn Anderson	Frank Oscar Irwin
Ellen Mildred Anderson	Irene Frances Jacobs
Mabel Anna Anderson	Ethel Viola Johnson
Leslie Samuel Armstrong	Mildred Maria Olivia Johnson
Frans Elis Backman	Myrtle Selina Johnson
Estelle Berthe Badot	Virginia R. Johnson
Gordon Hamblin Baxter	Marjorie Louise Jordan
Ethel Louise Beausang	Michael Joseph Joyce
Julius Berman	Marie Winifred Kane
Melville Stanley Berman	Esther Annette Katz
Frances Genevieve Bird	Mary Middleton Keating
Louise Bishop	Grace Theresa Kieswetter
Virginia Briggs	Robert Hathorne Kennedy
Frederic Holden Buck	Helga Sophia Knuttunen
Amelia Lawry Cameron	Rose E. Kurtis
Sylvia Victoria Carlson	Frank Ben Lantery, Jr.
Russell Hood Chapman	Madeline Leah
Alton Libby Chase	Bethan Alde Leavitt
Clara Flora Ciancianaini	George Hoyt LeCain
Marion Earlin Colpitts	Impi Elizabeth Lapanen
Daisy Helen Cooke	Verner M. Lofgren
Elizabeth Barbara Countway	Marion Easdon MacBurnie
Ethel Marion Crosby	Ruth C. MacCurdy
Leo Darr	Raymond Alex McPhail
Mary Veronica DeCoste	Alexander George Macteer
Bessie Anna Diamond	Chester Clifford Manimon
Astro Attila DiBona	Edith M. Pauline Mattson
Dorothy Jean Dinegan	William Walter Masson
Anna B. Echburg	Elizabeth Jennie Mitchell
Mary Beatrice Farrell	Margaret Costey Morris
Theresa May Fisher	Catherine Marie Murphy
Althea Richmond Foss	Proctor Murray
John Wunderlich Fuller	Gertrude Esther Nattie
Joseph Gesmer	Florence Rosamond Nelson
Ruth Gesmer	Lucetta Frances Noble
Edwin Crane Goodwin, Jr.	William A. O'Connell
Dorothy Gray	Margery Olive
Mary Josephine Griffin	Mildred Shearman Parsons
Elsie Corinne Halonen	Bertha Evelyn Pemberton
J. Russell Harcourt	Charles Wesley Powell
Edith Mae Harvey	Russell Irving Rayner
Helen Marie Hokkanen	Emma May Robertson
Thomas Gerard Hoyle	Stella Mary Robicheau
Sadie Gertrude Hughes	Annie Louise Rossi

Everett Otis Rowell
 Mary Rusconi
 Anna Elizabeth Sadlier
 Mabel Estelle Schofield
 Marjorie Helene Shea
 Agnes Louise Sheehan
 Vera Millicent Shultz
 Robert George Smith
 Charles G. Stanton
 Max Donald Stein
 Ray Winslow Stenberg

Barrie Gerard Sullivan
 Irja Sylvia Tenhunen
 Dorothy Glover Waite
 Evelyn Novella Warmington
 Ralph Elmer Wayne
 Arvo I. Wegelius
 Irma Alice Virginia Wennberg
 Helen Beatrice White
 Edith Louise Whiton
 Mildred Lauretta Wood
 John Baptiste Zanotti

(b). JUNE, 1927

Dave Abels
 Donald Gilbert Aldrich
 Herbert Kenneth Allbright
 Dorothy Elizabeth Anderson
 Mary Eva Appleton
 Ida Elizabeth Asnes
 Marion Esther Asnes
 Erle B. Ayres
 Richard Kingman Baltzer
 Melba Barnes
 Grace Anna Barton
 Clarence Roland Beckman
 Kathryn Luella Billman
 Dorothy Agnes Bishop
 Marion Louise Black
 Winifred Maye Bond
 Louise Virginia Borrelli
 Frances Anna Braun
 Dorothy Bridges
 Lawrence Eugene Brown
 Esther Josephine Burke
 Joyce Butterworth
 Laurence Albert Cahill
 Donald Groat Cameron
 Alice Wilson Campbell
 Edmund Lawrence Carey
 Joseph Aloysius Carey
 Edward Alfred Caron
 Miriam Gertrude Carr
 Eileen Dorothy Cassidy
 Paul R. Chandler
 Ida Josephine Chignola
 David W. Chute
 Nelson Noyes Cochrane
 George Louis Colburn, Jr.
 Evelyn Frances Cole
 Enia A. Coletti
 Edward Haskell Collagan
 Mary Kathlyn Collins
 Mary Frances Connors
 Lucile Cook
 David Freeman Cornish
 Isabel May Cossaboom

Charles Coulson
 Margaret Ellen Coulson
 Dorothy Beatrice Craig
 Gertrude Helen Craig
 George D. Crocker
 Rosetta Louise Crosta
 Ruth Eleanor Cruickshank
 Edward Francis Curry
 Harold Leroy Davis
 Ruth Debes
 Victor Cornelius DeBoer
 John Charles Devlin
 Mildred Constance Dixon
 Mary Magdalen Doran
 Ethel Edwards Eberts
 Ruth Gwendolyn Eldridge
 Viola El Hatton
 Ruth Myrtle Elliot
 Helen Elizabeth Erickson
 Joseph A. E. Erickson
 John Aubrey Evans
 Carleton Scott Fitch
 Margaret Agnes Fitzgerald
 Velma Vivian Foley
 Evelyn Frances Ford
 James Thomas Forrest
 Carroll Boynton Fowler
 Joseph Gerard Foy
 John Vincent Freeman, Jr.
 Rose Victoria Fruzzetti
 Buell Rounds Fuller
 Louise Gallaher
 Doris Elizabeth Gannon
 Margaret Verdine Gillis
 Marie C. Giordani
 Virginia Dorothy Goeller
 Bessie Ethel Goldman
 Ethel Louise Goodsell
 Agnes Elizabeth Gustavson
 Ruth Linnea Hager
 Winifred Evelyn Ham
 Louise Frances Hamblin
 Herbert Allan Hambro

Mildred Hamlin
Lillian Hansen
Elvira Lillian Harlow
Jean Irene Harper
Gertrude Elizabeth Hatfield
Raymond H. Heckman, Jr.
Effie L. Heggie
Aili Helen Heino
Frances Hunter Hislop
Russell Whitcomb Hoch
Lester Irving Hodgdon
Eric Bruce Hoeg
Marjorie Virginia Hoey
Harold Herbert Holmquist
Eleanor Horton
Lawrence Wood Howard
Alice Louise Howe
Waldo Albert Howe
Melva Enid Ingham
John William Jacobs
Dorothy Muriel Jensen
Alton Reynold Johnson
Elizabeth May Johnson
Lillian Caroline Johnson
Raymond O. G. Johnson
Beatrice Sylvia Kadets
Edna Louise Karlberg
Barbara Anna Kaulbeck
Mary Teresa Kelly
Helen M. Kerr
Barbara Kessen
Lucy Sydney Kingston
Harold Oliver Kinsman
Carolyn Annette Knight
Ann Marion Krasny
Hazel Ruth LaBontè
Edward Francis Lane
Raymond G. Lantery
Dorine Edythe LeBlanc
John Kenneth Leggat
Ellen Elizabeth Likander
Harrison Rice Linnell
Ruth Lints
Louise Locke
Theda B. Loud
Katherine Wells Lowe
Rose Luftman
Edith G. McCarthy
James Allan MacDonald
Donald Edmund MacDonald
Hector MacFarlane
Raymond L. McGrane
Lucy Gloria McGrath
Donald H. MacKenzie
George A. McKenzie
E. Jean MacKenzie
Bertram Hunter MacLeod

Edward Soren MacLeod
Marion Gleason Makepeace
Colin Davidson Marr
John Kenneth Martin
Elsie Duthie Maxwell
Stanley Franklin Melville
Kendall Frazier Mills
Marjorie Helen Moles
Florence Elizabeth Moore
Priscilla Morse
John Princent Moses, Jr.
Gabriel Victor Mottla
George E. Mullin, Jr.
Philip Webber Murphy
Lester Alden Nelson
Thelma Jeanette Newell
William Thomas O'Bryne
Elizabeth Oldham
W. Russell Parker
Barbara Delano Patterson
Irene Douglas Patterson
Ruth Mary Patterson
Beulah Maude Peach
John Edward Pease
Lois Crout Perkins
Georgette Ellen Perry
Enio Oris Persion
Carl Peterson
Elna Dagmar Peterson
Gordon John Peterson
Eleanor Melvina Philbrick
Ethel G. Phinney
Lavinia McKay Pierce
Nelford Platner
Priscilla Ruth Porterfield
Vivian Hazel Pratt
Mary Loretta Quin
Jean White Rankin
Gordon Brooks Read
Paul Cashman Reardon
Richard Reynolds
Lillian Catherine Riihimaki
Clarence Middleton Roth
Margaret Mary Ryan
Wallace Evan Sadlier
Harry Alfred Scott
Edward Henry Sennott, Jr.
Roy Douglas Service
Ida Clara Shangold
Arthur Richard Shaw
Clara Elizabeth Shea
Rodger Goodwin Shultz
Doris Holmes Simmons
Emily Augusta Smith
Frank Henry Smith
Isabella Alice Smith
Isadore Alta Smith

Jack Russell Smith
 Gerald Sanislaus Smyth
 Florence Ethel Snyder
 Hilda Florence Spear
 Cornelius Thomas Spillane
 Mildred Agnes Sullivan
 Madeline Swanson
 Marion Swartz
 Mary Helen Sweeney
 Dorothy Marion Taylor
 Helen Mathieson Tebbets
 John Edward Thomas
 Stanley Francis Tirrell
 Muriel Louise Todd
 Rose Tower

Ethel May Tremayne
 Dorothy Ida Tripp
 George Delavan Truitt
 Brenton Reed Turner
 Rose Sophie Turnquist
 Dorothy Janet Urquhart
 Antonio Volpe
 James Roger Ward
 Josephine Emeline Wastcoat
 Carola Fox Whitman
 Donald Whittam
 Pauline Elizabeth Winer
 John Hollinshead Wyllie
 Margaret Leola Zinck

2. Elementary Schools

(a). JANUARY, 1927

Adams School—15

Davis L. Bishop
 Rita L. Conway
 Phyllis C. Derby
 Robert H. Dexheimer
 Pearl Diamond
 Esther Downey
 Mary T. Gioncardi
 Warner O. Golbranson

Marjorie B. Harding
 Paul L. Holbrook
 Joseph P. Marchetti
 John T. Neilson
 Ellena P. Smith
 Hazel M. Taylor
 Walter F. Walsh

Atherton Hough School—22

Anna E. Briggs
 John J. Bresnahan, Jr.
 Patricia V. Craig
 Gladys M. Durgin
 Ethel M. Fleet
 Muriel E. Griffen
 Stanley V. Johnson
 Elizabeth P. Johnston
 Edward J. Kane
 Gladys E. McCormack
 Anne E. McCoole

James H. Morris
 Victor H. Nordstrom
 Eugene N. O'Connell
 Dorothy I. Page
 Hazard Robinson
 Edward W. Shaw, Jr.
 Dorothy M. Smith
 Lawrence M. Taylor
 Philip N. Wall
 Doris B. Wright
 Eleanor G. Walsh

Coddington School—27

William C. Baker
 Anthony Brandolini
 Loring A. Brown
 John H. Burroughs, Jr.
 Peter J. Chiminiello
 Martin J. Coen
 Olive E. Colburn
 Roland Cooper
 Arthur W. Cossaboom
 Gertrude Coulson
 Robina B. Dakers
 John T. Dunning
 Arthur H. Fowler, Jr.
 Margaret E. Howe

J. Stanley Johnson
 Dorothy Koeller
 Evelyn A. Lear
 Alice K. Malone
 Alfred F. Monroe
 Anthony J. Monti
 George E. Murphy
 Robert F. Piller
 Lois E. Pinkham
 Richard Porter
 Warren O. Sillen
 Jim E. Smith
 Melvin Thorner

Cranch School—21

John H. Anderson, Jr.	Nelson S. Gundersen
Frank T. Appleton, Jr.	Eben K. Hedman
A. Vivienne Blomquist	Elvie T. Holmgren
Sally E. Bradford	Esther C. Johnson
Clarence N. Carter	Agnes E. Lund
George R. W. Cedarstrom	Paul J. Mattson
Clara E. Crooker	Mildred Moreton
Irene Cutler	Albert E. Rundle
Dorothy O. Davy	Mary Salorio
Frederick J. DeCoste	Douglas D. Smeaton
H. Dexter Ferguson	

Daniel Webster School—21

Mary DiBartolomeo	Asa P. Newell
Gill D. Bowness	William J. Papile
Joanna Collins	Florence L. Pitts
Attilio DiTullio	Angel Rahaim
Rose Fragaer	Americo Risio
David Goldman	Biancha Risio
Kathleen M. Hofferty	Bernard Silver
Bertha D. Johnsen	Harold H. Slate
Joseph M. Koury	Warren E. Sundstrom
Esther Krasnigo	Wilfred Winship
James A. Muir	

Francis W. Parker School—32

Donald S. Bell	Phyllis K. Kline
Phyllis E. Brooks	John J. Lawton, Jr.
Dorothy M. Burke	Millicent S. Lewis
Maybelle G. Cook	Margaret E. Magura
Charlotte M. Cushing	Walter J. Maibach
Ray S. Derosier	Dorothy E. McCarthy
John T. Franklin, Jr.	Helen F. Murphy
Jean A. Gelas	Albert F. Ogilvie
Thomas J. Gilmartin	Helen M. Poland
Alice J. Guilmartin	Prescott F. Reimer
Erik G. Gnospelius	Dorothea M. Sullivan
Randolph C. Gray	Everett S. Todd
M. Frances Hoch	James G. Welsh, Jr.
Eloise P. Hodges	E. Hartwell White
Willard J. Hodges	F. Burton Whitman, Jr.
May L. Ingham	H. Lois Wilmore

Gridley Bryant School—8

Charles P. Beasley	Fred A. Orlando
Virginia M. Corcoran	Mary J. Speed
Eleanor Fruth	Doris R. Stenberg
Inez E. Gargaro	Rena J. Ventura

John Hancock School—17

George W. Anderson	Gussie Kotzen
Edelweiss L. Biloni	Veronica E. MacDonald
Mary A. Christiano	Margaret E. MacLeod
Richard H. Collins, Jr.	Alice A. MacPherson
Helen L. Coy	Florence V. Phillips
Nellie A. Dahlberg	Sylvia K. Nikander
Bernard P. Egan	Sulo W. Tuori
Laura G. Freberg	Alice E. Wallin
Ruth E. Johnson	

Lincoln School—14

Jennie M. Bertolami

Anna M. Farrell	Ross O. Patten
Gertrude M. Farrell	Edna L. Pelto
James M. Freel	Willis J. Smith
Florence M. Foster	William J. Sullivan
Stella M. Johnson	Dorothy V. White
Alice Lahey	Walter E. Wold

Willard Prevocational—14

Oreste E. Ariento	Cekri A. Saari
Mary J. DiFederico	Wilho A. Savela
Edith E. Harling	Walter J. Shea
Wallace H. King	Charles R. Taylor
Francis J. McCarthy	Nicholas H. Ward
Anne H. Niemi	Edwin N. Wento
John K. Nix	Frederick J. Williams

Willard School—46

Tauno H. Ahola	Vello S. Manner
William B. Anderson	Emil W. Mattson
Ernest F. Baldovin	Gertrude E. Mattson
Bernard P. Bukard	Mary McDonald
Carl E. Carlson	Grace U. Mello
Domenic Chivaroli	Beatrice E. Mills
Lillian M. Elkhill	Joseph F. Mullen
Ellen E. Fagerlund	Anna Murphy
Anna L. Frutti	Eleanor E. Myllmaki
Tauno E. Hautala	Oiva Nurmi
Mildred K. Hollnian	John B. O'Connor
Olga M. Jameson	Tyne S. Oksanen
John F. Jarvis	Michael J. Plant
Charles H. Johnson	Lava N. Quintiliani
Martha A. Kampilla	Flora M. Saastamoinen
Bertha E. Knuttunen	Charles Sacchetti
Lempi M. Koski	Mary F. Schatzl
Wilho A. Lahti	Anna F. Shea
Gertrude Laine	Evelyn Tankard
Walter M. Leppanen	Mary D. Thomas
Maine H. Linder	Miriam E. Teasdale
Helen M. Lorandean	Matilda Volpe
Irene M. Maki	Helmi R. Wuori

Wollaston School—47

Leslie H. Adam	Dorothy E. Foley
Dorothy M. Anderson	Robert S. Gillette
Amos U. Bendinelli	Beatrice D. Gladwin
Leif Borgen	Maurice V. Guarcello
Howard A. Carney	Fred F. Guzzi
Margaret J. Chase	Ervin D. Hanson
Henry H. Cheney	Tom Hey
Charlotte Clark	Esther Hirtle
B. Marjorie Cleaves	Helen Howe
Francis P. Clish	Elsie M. Larsson
Harry E. Coleman	Arthur B. Lawrence
Maizie F. Deady	Constance R. Lundy
Charlotte D. DeLorme	Elizabeth Massey
Doris E. Dodge	Earle Megathlin

Christine M. Messenger
Robert F. Meyer
Amy Morgan
Kenneth Morgan
Albert W. Mignault
Arthur F. Nicholle
Wendell L. Phillips
Adelaide C. Rogers
D. June Smail
Elizabeth E. Smith

Arthur O. Sprague
Henry L. Stevens
Dorothy Swenson
Shirley B. Viles
Evelyn V. Weymouth
Richard J. White
Alexander F. Williamson
Donald C. Wright
Ruth A. Wyand

3. Graduates from the Home Making School, June, 1927—13

Wilhelmina A. Bartlett
Mabel C. Burke
Elizabeth R. Guiliano
Mary Leah Houle
Madeline R. Joyce
Mary MacDougal
Sarah McLelland

Mary D. Meenan
Elda A. Nereo
Ruth E. Olsen
Mildred C. Trevains
Alice C. Wilson
Phyllis I. York

4. Graduates from the Industrial School, June, 1927—30

INDUSTRIAL SCHOOL

Oscar Frederick Pearson	Electrical Department
Amedeo Balducci	Plumbing Department
Lionel A. Choquette	Pattern Making Department
Henry J. O'Brien	Pattern Making Department

RECEIVING CERTIFICATES*

Joseph John Clarke	Electrical Department
Clarence D. Larson	Electrical Department
James N. White	Electrical Department
Walter J. Woveris	Electrical Department
Kenneth E. Yoerger	Electrical Department
John J. Fitzpatrick, Jr.	Machine Department
Eugene G. Morin	Machine Department
James H. Soraghan	Machine Department
Alton E. Stromwell	Machine Department
Robert Stanley Webb	Machine Department
Frank Lester Bates	Plumbing Department
Louis W. Hack	Plumbing Department
William John Harron	Plumbing Department
Daniel Lubarsky	Plumbing Department
Henry N. Petersen	Plumbing Department
Antonio Petrilli	Plumbing Department
Adam P. Trubiano	Plumbing Department
Herbert W. Acker	Sheet Metal Department
Leonard Calvin Chapman	Sheet Metal Department
Roger W. Shoals	Sheet Metal Department
Albert S. Wallander	Sheet Metal Department
Charles Edward Wight	Sheet Metal Department
Orlando Cedrone	Cabinet Making Department
Joseph E. Comeau	Cabinet Making Department
John L. Marini	Pattern Making Department
Tulio G. Nereo	Pattern Making Department

*These boys have completed their time at this school, but the State requires that they have six months' experience at the trade before they receive their diplomas. These certificates are exchanged for diplomas whenever the trade period is completed.

APPENDIX C.

SCHOOL STAFF AND TEACHERS' ORGANIZATIONS

1. Organization of Staff, December, 1927

Black face signifies attended without graduation.

Attendance for less than one year at an institution is not noted.

JAMES N. MUIR, B.S., Superintendent, University of Pennsylvania;
elected 1927.

ALBERT H. COCHRANE, Assistant Superintendent, Harvard;
elected 1925.

Senior High School—Coddington Street

Teachers	Department	Where Educated	Date of Election
Ernest L. Collins.....	Head Master	Bates College	1912
George A. Wilson.....	Submaster, Physics	Massachusetts Institute of Technology.....	1921
Josephine D. Baker.....	Dean	Wellesley College, Teachers' College of Columbia, Harvard Graduate School	1923
Sally F. Dawes.....	English department	Radeliffe College, Middlebury College, A.M.	1913
Leslie C. Millard.....	Commercial department ...	Salem Normal, Boston University, B.B.A....	1925
